Doubts over 58 more Constable works

By Geraldine Norman

A new book on John Con-stable, the great British land-scape painter, suggests that 58 paintings, hitherto considered to be by the master, are more likely to be the work of his

The fact that several of Con-stable's children, notably Lionel

stable's children, notably Lionel and Alfred, painted landscapes similar to their father's and that their work has become muddled with his, was first revealed two years ago.

The new book, by Mr Robert Hoozee, a Belgian art historian, adds another 58 tentative reattributions. L'opera completa di Constable, published by Rizzoli, an Italian company is in a series aimed at the popular market, with the title Classici d'Arte.

Because of its popular format and improbable multinational source, the publication of the book last year seems to have escaped the notice of most Anglo-Saxon scholars, with the exception of Constable specialists.

The reactions of museums The reactions of museums whose paintings have been reactifuled to the children have ranged from amazement to a cautious "one scholar did suggest it might be Lionel a year or two ago". Almost no one had seen the book or knew of its publication. seen the bo publication.

The exception was Leslie The exception was bester Parris, a Constable expert at the Tate Gallery in London. He disagrees with four or five of Mr Hoozee's reattributions, but in the main agrees that there

in the main agrees that there is a strong case for Constable's children being involved. "It needs to be looked at more carefully", he said.

There are two Tate "Constables" for which Mr Hoozee has suggested a reattribution to the children, "Leathes Water" and "Dedham Valley".

Day's strike | Liverpool dockers call for national stoppage

By R. W. Shakespeare.

Northern industries
Correspondent
Moves to call a national dock
strike over the "blacking" of
steel imports and exports will
begin today, after Friday's walkout by more than 5,000 Liver-

pool dockers.

The call came from a mass meeting of the Merseyside dockers at Liverpool Stadium yesterday. Significantly, the meeting was attended not only by senior shop stewards repre-senting the Southempton and Hull dockers but also by steel

the printing union executive and is extremely unlikely to be regions
The Liverpool dockers have now been joined by another 1,000 ancillary workers. The stoppage has halted work along whose members are responsible the entire Mersey waterfront, with about 30 ships strikebound in the port.
The men will hold another

whose members are responsible for packing and delivering all national newspapers, will come on the eve of the TUC General Council's meeting at which a call for May 14 to be converted mass meeting on Wednesday and say the strike will continue indefinitely.

Today Mr Dennis Kelly, can for May 14 to be converted into a one-day general strike will be discussed.

The only question that seems in doubt is whether the printing union will order a strike of all its 205,000 members for the full 24 hours. roday Mr Dennis Kelly, senior convener at Liverpool, will be seeing national docks officers of the Transport and General Workers' Union in London to pass on the call for a national strike, carried by an

overwhelming majority of the 4,000 men who attended yesterday's meeting.
The Southampton stewards

will be meeting early today before cashing a mass meeting of the dockers there. Similar meetings are likely in other

ports.

The moves are being made against the background of an instruction issued by the TGWU last week that dockers should refuse to handle steel shipments either for import or export. senior shop stewards repreting the Southampton and
Il dockers but also by steel

ment order in the High Court, today after failing on Saturday to take possession of two trailer loads of imported steel at Hull docks. (Our Hull Correspondent writes).

North Sea Ferries tried to release the steel from their King George Dock compound but dockers blockaded the traders with another vehicle. Steel return sought, page 2

Public spending cuts and tax reshuffle may dominate Budget

By David Blake Economics Editor

Economics Editor

Big cuts in public spending and a reshuffling of taxes to help industry are likely to dominate the Budget to be announced on Wednesday by Sir Geoffrey Howe, QC.

The Chancellor's second Budget is unlikely to contain any significant reduction in income tax for ordinary taxpavers. Instead, he is likely to limit his concessions on income tax to raising personal allow-ances, probably offsetting most of the benefits by scrapping the reduced 25 per cent band on the first £750 of taxable

At the same time, he is likely to increase excise duties on drink, tobacco and, most dramatically, petrol, cut taxes on capital transfers and capital gains, and try to help manufac-turing industry.

Worries about the impact on the retail price index of raising excise duties seem to have per-suaded the Government against a straight increase in all duties by the amount needed to take account of inflation. Instead, they are likely to

instead, they are likely to ricrease the duty on petrol par-ticularly sharply because this produces much revenue for little impact on the retail price index. Spirits and wine will also be hit but beer and tobacco are likely to get off

more lightly.

Personal tax allowances will be increased to undo some of the effects of inflation which brings more and more people within the taxman's grasp.

If the Chancellor decides to If the Chancellor decides to scrap the 25 per cent band, as Conservative policy in Opposition suggested, it is likely that those allowances would go up by at least as much as the 17.8 per cent rise implied under the terms of the "Rooker-Wise" rules. That would mean increasing the single person's allowing the single person's allowance from £1,165 to £1,372, and the married allowance from £1,815 to £2,138.

The Rooker-Wise provisions

mean that personal income tax allowances will be increased automatically to take account

By George Clark Political Correspondent

MPs and politicians are already making their assump-tions and planning their response to the Eudget.

bringing greater hostility from the trade unions, are predict-able. But there will also be

'social wage'

favourable treatment for unearned income and capital

The Chancellor's speech is likely to dwell heavily on the twin problems of rapid pay rises and the growing liquidity crisis in industry. Sir Geoffrey seems to have decided to use the proceeds of a new and severe round of public spending cuts to provide extra funds for manufacturing industry.

The mostly likely option is to cut the national insurance surcharge, which would give immediate relief to companies. It would also be of particular assistance to exporters.

He is also intending to change some of the rules governing the treatment of stock for tax purposes. At minimum, the changes will protect companies whose stocks have run down because of the steel strike.

To raise extra revenue, the Chancellor is likely to tax either oil companies or banks, or possibly both, and he is also expected to take more money off the British Gas Corporation. The worries about pay in-

creases, running at about 20 per cent a year, mean that the Chancellor will lay beavy stress on the Government's determination to bring down the inflation rate by tough application of limits on money supply. The Government wants to show the

Government wants to show the country that it is not prepared to live indefinitely with double-figure inflation.

The need to meet money supply limits, coupled with a determination not to raise interest rates from their present record level, have persuaded the Chancellor that he must keep public sector borrowing in keep public sector borrowing in the coming financial year as far below £9,000m as possible. Achieving this has not been

easy because the economy is moving into what internal Treasury forecasts predict will be the most severe recession since the Second World War. The forecast to be published on Wednesday will be less pessi-mistic than internal estimates of a 31 per cent drop in output this year, but it is sikely to show output falling by between 2 and 3 per cent.

of inflation.

The Rooker-Wise rules do not apply to the threshold for higher rate taxes, and those will recording an even sharper drop thus not necessarily rise. How-

protests from about 40 Con-

servative backbenchers who be-

lieve that the Government will be breaking its pledge to support the family if the child benefit is not increased to take

This would mean that the benefit, now £4 should be

increased by more than £1. Sir Brandon Rhys-Williams, Con-servative MP for Kensington,

one of four Tory MPs who voted against the Government

on this issue last week, said yesterday that he thought the Chancellor ought to increase it

Steel unions will be pressed to resume work during inquiry

By Paul Routledge
Labour Edgeor
Trade union rejuctance to
order an immediate resumption
of work in the sirikebound
steel industry will come under steel industry will come understrong transsure from the Government and management today as intoves to set up a committee of inquiry into the dis-pute get while way. Leaders of the steel unions

are seeking approval from Mr James Prior, Secretary of State for Employment, for that form of third-party intervention as the most promising way to end the 12-week-old strike.

But both the minister and the British Steel Corporation are anxious to write into an agreement on the inquiry that the men should go back to work while the committee takes evidence and gives its judgment.

judgment.
Some of the 13 unions involved in the dispute, notably those paying strike benefit, are ready the following strike benefit, are ready the following the front and Steel Trades Confederation and the National Union of Blassfurnacemen, have so far refused.

A jost meeting of executives of those two unions is expected to take a decision on this key issue tonlight after hearing a report on discussions with Mr Prior and the BSC, when the conditions for the pay inquiry will be known in detail.

British Steel is insisting that

should be continued to aroutasting on the union's 19.7 per cett pay claim and the corporation's 14.4 per cent pay and productivity offer; plans by the BSC to cut out 52,000 jobs and reduce steelmaking capacity by a third would not therefore form

The corporation will be asked offer to win a return to work by the process men and blast furnacemen. An extra few per cent promised ahead of the inquiry's recommendations might persuade the men to go back. some ISTC leaders suggest pri-

But the BSC is almost certain to refuse to go any farther be-fore the committee's findings. If the setting up of the in-quiry goes according to plan it could report by the end of next week, leading to an agreement about Easter. Mr Prior is being asked to numinate a chairman, though he would prefer the Advisory, Conciliation and Arbitration Sayles to take on Advisory, Conciliation and Arbitration Service to take on this delicate administrative function.

nent academics in the industrial field have been mentioned as possible chairmen. On the union side the name of Mr Jack Jones, former general secretary of the Transport and General Workers' Union and luminary of the TUC, is most often untered as the preferred choice.

Doubt on Scargill TUC seat

A discreet campaign is being fought by trade union "moderates" to prevent Mr Arthur Scargill from gaining a seat on the TUC General Council, according to left-wing supporters of his cause.

Mr Scargill, militant president of the Yorkshire area of the National Union of Mine-workers, has been chosen by his union to take up the seat about to be vacated by Mr Joseph Gormiey, the NUM president. But although he has

but attrong ne has broadened his power base for the post by winning the backing of the adjacent Nottinghamshire coalifield, traditionally a bastion of the right, his candidacy is apparently regarded with alarm and dislike by other

ing to the Scargill camp, are the Amaigamated Union of Engineering Workers, the General and Municipal Workers' Union and the National Union of Railwaysten.

of Railwaymen.

Mr Scargill, whose succession to the NUM presidency next year is counted more and more to be a near-certainty, could rely on the support of the 2,200,000-member Transport and General Veorkers' Union and the 700,000-strong National Union of Public Employees as well as of Public Employees as well as the small but vocal drivers' union, Aslet.

It is in the less politicized middle ground dominated by unions such as the National and Local Government Officers' Association (Nalgo) that Mr Scargill's candidacy is most universible ' beat the

winerable.

Mr Scargill told The Times
last night: "I am aware that
certain people are working
against me. The chances of
keeping me off could be quite good if they organize.

Parents to meet MP over pregnancy drug By Our Health Services

Correspondent
Mr Jack Ashley, Labour MP for Stoke-on-Trent, South, is to meet a group of parents this week who believe that their children's birth defects were caused by taking the anti-nausea drug. Debendor, during preg-

nancy.

A jury in Orlando, Florida, on Friday decided that the drug caused limb and chest defects in a boy. His mother sued the manufacturing company, demanding \$12m (£5.5m) compensatory and punitive damages, but was awarded only \$20,000 (£9,170) to cover the box's medical expenses.

boy's medical expenses. Mr Ashley said yesterday that he thought the drug should be withdrawn from the market The Department of Health and Social Security said that the drug was not being taken off the market, but the Committee on the Safety of Medicines had been asked last month to review the evidence about the drug ecause of public concern.

Voluntary pay curb call by ministers

By Our Political Correspondent Unless Britain has a "self-imposed incomes policy meas-playment is bound to increase, Mr James Prior, Secretary of State for Employment, said

yesterday.

He emphasized that the Government's policy of controlling the money supply was not enough; people who obtained big increases were putting other people out of work.

Mr Prior, speaking on LBC radio, was expressing the same view as that put forward, more cautiously, by Sir Geofrey these, QC, the Chancellor of the Exchequer, when he engaged in debate with Mr Denis Healey, the former chancellor, and Professor Milton Friedman, the American economist, on BBC 2 on Saturday. Friedman, the American economist, on BBC 2 on Saturday. Mr Prior said: "I think we

Shortage of key subject teachers

highlighted
From Diana Geddes

fied teachers in certain key subjects in secondary schools is again highlighted in a report published yesterday by the Secondary Heads Association

The report contains the findings of a survey of 1,267 schools, representing a quarter of all secondary schools in England and Wales. It was carried out last November by the association in conjunction with the Association of Science Educa-tion, All previous figures on the supply of specialist teachers are at least two years out of

The schools participating in the survey were asked how many full-time qualified teach ers they required to provide (a) satisfactorily for their cur-riculum, and (b) for what they considered to be the desirable curriculum for their schools. The relies to the first part showed that even when schools were trying to modify their realities, one in three or four schools lacked a mathematics teacher and one in four or five lacked a teacher of craft, design

or technology. On the criterion of what would be desirable, one in two or three schools lacked a mathematician, one in three a teacher of craft, design or technology, one in five a physicist, and one in five or six a chemist. There were marked regional variations in the shortage of

specialist teachers, with London boroughs almost twice as badly boroughs almost twice as badly off as English counties.

Figures for applications to Bachelor of Education teacher training courses, released over the weekend by the Central Register and Clearing House, suggest that the position could deteriorate farther. Only 20 applicants have chosen to specialize in chemistry and 22 in physics, compared with 351 in home eronomics and 1,740 in physical education.

However, figures for applicants to postgraduate teacher

cants to postgraduate teacher training courses show a very training courses solve a very slight improvement in the num-bers wishing to specialize in mathematics, physics, chemistry and modern languages com-Addressing the opening of

Addressing the opening of the annual conference of the SHA in Oxford yesterday, Mr John Sayer, the president urged the Government to give the highest priority to the im-plementation of the James report and its recommendations for a big increase in in-service

That was much more urgent now than when the report was accepted in 1972, he said. Fall-ing numbers of pupils in ing numbers of pupils in schools were creating in-security, stagnation and loss of morale at a time when all the ingenuity and flexibility of dedicated, up-to-date teachers

He criticized the Government for failing to tackle the issue of falling school rolls, Local take hasty decisions from year to year with little sense for the pupils in the schools or for the future. Mr Sayer also expressed

Mr Sayer also expressed deep concern over the failure of both central and local government to do snything about the rapidly deteriorating situation regarding the midday supervision of pupils.

Two fifths of SHA members had reported that they were no longer this to express a

Survey by 'The Times' indicates the inner circle of 21 who are in on the Budget secrets

Why Sir Geoffrey's eards are kept close to his chest

and David Blake

How many people this morning will know the full contems of Wednesday's Budget statement? A survey conducted by The Times indicates that probaby no more than 21 individuals will be aware of the whole story, with civil servants ouncembering ministers 14 to six and a solitary special adviser completing the total.

The full Cabinet will not be The full Cabinet will not be given details of the Chancellor

of the Exchequer's speech until the Budget Cabiner is held on Wednesday morning. There are two reasons given by Whitehall insiders to explain why most ministers are not initiated into the secret until a few hours before the Chancellor rises in " It is mainly because you can-

mot trust them. They tend to want to consult people and it sets out. It is a kickback to Jimmy Thomas [J. H. Thomas,

the contents of all important financial statements, "emerthe contents of all important-financial statements, "emer-gency packages" and budgets since he became a Treasury second permanent secretary in 1973, a depth of ex-perience unequalled by any other individual privy today to

this week's Budget secrets.
A further six Treasury offi-cials will know in full Wednesday's financial statement, and Budget report, the criterion for inclusion in *The Times* survey. Many more will have a firm idea of the sections that concern their policy divisions, but their knowledge will be partial. The Treasury half-dozen com-

Those powers cover trivial cases, more serious ones where there is voluntary disclosure or welfare reasons, or where either there is not enough evi-dence or the fraud would not

affect the total amount of benefit payable. welfare cases include those where a claimant suffers from a serious mental or physical condition, or nervous trouble, particularly if suicide is mentioned. But the guide later tells the fraud investiga-tor to advise a suspect threat-ening suicide to keep matters

in perspective.

Much of the guide is taken
up with tackling the two most
common types of fraud: not declaring work while drawing benefit, and a woman drawing benefit while living with a man.

Less space is given to guid-ance on preventing fraud, although the guide emphasizes that fraud specialists should make their colleagues who pay our benefit aware of the need to watch for particular weak-nesses in the system.

Mr Prentice in his letter to staff says that he is determined to make the new anti-fraud campaign a success. But he reminds them that fraud work reminds them that fraud work remains a small proportion of the department's work. The 1,000 additional posts for specialist fraud officers is a "substantial commitment", but compares with 87,000 social security staff the department will employ in 1980-81.

"We are not forgetting that our main function is to see that

Phosphate 'mine' found under sea the location of unusual minerals

A new source of phosphate rock has been discovered by an ceanographic research team, which is richer than most of the refined phosphates that form a basic material of the world's fertilizer industry.

The discovery was made on an expedition of the research ship Shackleton of the Natural Environmental Research Coun-

During a survey of the floor of the Atlantic near the Equator a large deposit of phosphatized limestone was discovered. A description of rock and how it came to be formed is the subject of a paper by Dr E. J. W. Jones and Dr D. A. Goddard, geologists at University College London, in the journal Deep-

The two geologists are eager to attract the attention of commercial mineral prospectors to this underwater mine, which has economic implications that are not often associated with

of academic importance. Dr Jones said yesterday that economic interest in the ocean floor has focused primarily on

the prospects for petroleum along the continental margins and on accumulations of metal oxides and sulphides found re-cently on volcanically active

The finds are richer than most material mined from the land deposits, principally in the United States, Morocco and the Soviet-Union. The price of phosphate rock has risen at the same rate as the markets in oil. Using the description adopted

for international trade in phosphorites for the fertilizer industry, the rocks contain an average of 86 per cent of triphosphate of lime. Although phosphorites have been reported in other ocean studies, this find is unusual in the size, richness and depth of water of the deposit. It is

about 800 metres deep. Mining operations, such as the recovery of metalliferous

conducted in deeper waters.

The deposit is in the Atlantic above the Equator and about 900 kilometres due west of Freetown. An analysis was made of rocks ranging from 0.2 to 32 ilograms. An explanation of the forms

tion in the journal tells of a submerged volcano capped by an immense layer of material. Fossil evidence shows that in early Tertiary time, 50 million years ago, the crest of the volcano called Annan Seamount

voicano canen Annan Seamount lay near the surface. It supported a thriving coral reef, which grew upwards as the voicano gradually subsided. The reef became greatly enriched in phosphorus from decaying organisms that flourished and died in the vicinity.

Am elaborate chemical process incorporated the phosphorus into the reef limestone. The process ended when the circulation pattern of the Atlantic underwent a great

Atlantic underwent change that altered the shape of the huge geological basin containing the volcano. Survey leaves

Call for parents to answer for vandalism

Leicester

to answer for the acts of their children in cases of vandalism and anti-social behaviour, a report to be discussed on Wednesday by Leicestershire County Council states.

One of its other main suggestions is that courts should be empowered to make community service orders against juvenile offenders.

A working party that spent 17 months examining vandalism says legislation is also needed authorizing the police to require parents to attend at police stations and courts to hear evidence against their children involved in vandalism; and to enable police to tackle truancy and to return a child to school.

It also recommends that in addition to reducing the age of criminal responsibility from 10 to eight years of age the use of attendance centres and the juvenile bureau should be extended. The age limit of 10 to 16 for admission to centres should be extended to eight to 18, and greater police resources should be made available to

run an extended attendance carrying out their duties by centre service.

The county council will seek the views of the Home Office man on foot patrol who was and the Association of County Council's on the recommenda-

doubt that to some extent the police are under severe restrictions and limitations in carrying out their duties of law and order enforcement and there is evidence to show that, so far as many youngsters are concerned, a police presence means nothing at all. The pendulum has swung too far the other way compared with the situation which applied some years

of control with regard to the apprehension of youngsters and there are so many organizations.

ago.
Police, schoolteachers, care-takers, bus conductors, park attendants and other public servants, through no fault of their own, seem to have lost all power

of which the Council for Civil Liberties is one, paying attention to the way in which the law enforcement organizations apply their methods, that it is extremely difficult for them to carry out their duties without offending the rights and neivileages of the rights and privileges of There was also some evidence that police were handicapped in

newly trained and alert to them. He is allve to the fact that the pendulum has swung too far the other way compared with some years ago, when the application of a mild form of physical on-the-spot punishment was a recognized deterrent. There is evidence to show that a shadow of cantion

to show that a shadow of caution which can be to the benefit of the offender exists among police officers who, in some circumstances, experience difficulty in defending themselves.

The procedures should be re-There was without doubt a

link between truancy from school and juvenile crime, the report adds. In many cases truancy was the early-warning sys-tem for vandalism. Schools could do more than they were doing.

we question whemer enough is being done by teacher training colleges in preparing teachers not only academically but with an attitude towards controlling the discipline element in schools. A fresh look at the internal discipline system within school staff-ing arrangements is also called for and the working party questions

whether enough is being done by the schools to inform the educa-tion authority of persistent treaticy.

There was clearly no substitue for parental control, al-though evidence suggested that some parents abdicated their re-sponsibilities. The report accepted that phy-

sical punishment did not necessarily mean recipients became good citizens. Neither magistrates nor court officials advocated the return of corporal punishment The police could not act alone

in the ight against vandalism and much more public involvement was required. More publicity should be given to steps that might be taken by all seetions of the community to help; the feeling of a lack of com-munity spirit must be dispelled. Local authorities were not doing as much as they should

The steps advocated would involve considerable expense, but vandalism could not be re-

Firm Giscard stand on farm prices

From Ian Murray Paris, March 23

President Giscard d'Estaing today reaffirmed his intention to right to support French farmers at the forthcoming Brussels summit. He made it clear that he viewed any proposals to freeze prices as "un-realistic and unacceptable".

The President was in Lyons open the fair there with M Raymond Barre, the Prime Minister, who was elected to a Lyons seat in the legislative election.

He said France had to strive to become independent in energy suppty, develop ad-vanced industries, improve the levels of technical education for the young and the wirkers, and above all to exploit its only "raw material"—agriculture.

Because of the importance of agriculture, the President went on, it was essential to make the most of what it could pro-duce to improve the French economy. The Brussels pro-posals were not acceptable be-cause of the increase in agricultural costs and industrial

The President's chief concern, however, seemed to be that domestic politics had created a situation in which the leaders of the four main polirical groups refused in speak to each other. Within the oppo-sition, the Socialists and Communists were at doggers drawn, while within the government condition the Gaullists were constantly attacking governmetn policies.

argument with the Gaullists was one of the main points raised by M. Jean Lecanuet, president of the pro-vehicles.

Giscard Union pour la Demo cratic Française, at the group's weekend conference in Orleans. He told the 2,500 delegates that he hoped that the Gaullists would not attack their candidate so strongly before the presiden-tial election that it would make

things difficult afterwards The conference showed that despite various tendancies inside the grouping, the delegates all supported the President's policies. They were urged to become a real political machine to secure the election of their candidate at next year's presi-

dential election. President Giscord d'Estaine has not yet announced his candidature, but in his speech today in Lyons he seemed again to be planning for a long political future. He said that he stood for the "just centre' which was not a neutral line but "a line of peace and understanding to follow with much care in these tempestuous times." It was a line, he soid. which attracted twice as many

critics as any other.
The UDF conference, which is the last the group will hold before the presidential election. seemed to echo these words in approving the need for a central

force.

equivalent of Land's

The oil was so thick it had to be kept heated to 50° C in order that it could be pumped.

The oil was so thick it had to be kept heated to 50° C in order that it could be pumped.

Once into the cold waters of the Channel it set into a thick coat, mentally unacceptable which was impervious to the only available dispersant chemi-cals and on which the chalk powder—which the Navy was advised to use—lay in useless drifts.

So the oil came ashore. But when it did there was a long delay before the land part of protection authorized by the Prefecture. In consequence the resources available were minimal when most

The reasons for the delay seem twofold. For one reason launching the plan costs a lot of money to the State. More importantly it attracts the sort of bad publicity that a tourist region like Brittany, which relies so heavily on its coastline to bring in visitors, can well do

The tardiness of the authori-ties coupled with fury at the fact that the much vaunted pre-vention plan had failed to work has caused deep resentment in Brittany.

Last week five dustbins full of Tanio oil scooped from the Britany beaches were dumped on the pavement outside the Elysée Palace.

It also represents a protest at the fact that none of the 12 ministers involved in the protection plan had visited the area to see what things were like. If the Government would have come to the oil then the not come to the oil, then the oil would go to the Govern-

The wreck of the Tanio prompted M Aymar Achille-Fould, the president of the Interministerial Sea Mission, to repeat once again the French argument that, as most of the 500 million tons of oil needed by Europe are shipped round Brittany coast, then countries importing the oil should contribute to the cost

of cleaning up the beaches.

est photographer recalls 1924 deaths

in Noel, aged 90 years (above) at his home in below) in 1924, with some of his photographic on a ledge at 22,000 feet on the North Peak.

Bright-eyed in his ninety-first year, John Noel delights in an encyclopaedic memory, mustering facts and anecdotes about Everest, from the early efforts to obtain permission from the Dalai Lama to enter Tibet, to the technical details of photographic exposures and developing negatives with the aid of glacial water in a tent heated by a yak-dung stove. As well as dozens of glass negatives, sent overland in batches to The Times, he exposed and developed some 12.000ft of cine film which was later shown to packed houses in

On the subject of Mallory and Irvine, who failed to return to their tent on June 8, 1924, after being seen within 1,000ft of the summit and still moving upwards, Captain Noel dismisses suggestions that their bodies may one day be found, to help settle the argument about whether they

A body found by a Chinese climber in 1960 was that of Maurice Wilson, he says, and this view concurs with recent letters to The Times, including one from Dr Charles Warren who described how in 1935 he had found and buried the body of Wilson, who had died on a solo attempt the previous year. The body found by the Chinese was almost certainly that of Wilson, which had reemerged from the ice at a lower point 25 years later.

Might this not also happen in the case of Mallory and

Might this not also happen in the case of Mallory and Irvine? Captain Nocl thinks not. From where at least one of them is presumed to have died (and the only evidence is an ice axe identified as belonging to Irvine) they would have been swept by gales down a steep rocky slope and over

The remains would have become buried in the glacier below -perhaps to emerge briefly after 20 years or more, only to be bidden again by fresh snow. The likelihood of this brief reappearance occurring in the path of a future expedition would be remote.

So, it seems, the mountain will keep its secret, leaving forever unanswered the question whether these two Britons were the true conquerors of Everest or merely victims. And that, says Captain Noel, is as it should be

Above: Memorial cairn to the dead of three expeditions.

prices, which are up to four of produce that farmers could sell at guaranteed prices.

In the case of milk, which accounts for almost 45 per cent Farm prices: Each spring, EEC
Agriculture Ministers meet to
fix uniform "supporting"
prices for more than two thirds
of the community's farm output,
including cereals, milk, sugar,
pig meat, poultry, wine, fruit
and vegetables.

The EEC, acting through "intervention" agencies in member
states, undertakes to bay up at

siders the commission's methods discriminatory. The methods discriminatory. The general milk levy, for example, would not apply to dairy farms producing less than 60,000 litres a year; Britain has fewer farms of that size than any other member state.

Britain has also invested

heavily in extra sugar beet capacity and fears that stricter limits on price guarantees would make much of the new plant uneconomic. To many, this suggests that when it suits it Britain is as loth as any member state to get off the

CAP gravy train.

The British would like to see support prices decline in real terms. Farmers who could then not survive would be supported. by direct income aids, preferably paid for by national exchequers. But there is not the slightest chance that other member states will accept that CAP and Parliament: Last December, the European Parliament rejected the draft EEC budget for 1980, ostensibly on the grounds that farm spending was too high. This week, however, a chastened and divided Parliament seems likely to vote for a farm price increase at

least as costly as that which it rejected last year.
The only effective brake on farming spending may be the exhaustion of EEC budget revenue because of the legal limit on the amount of Value Added Tax that can be raised to finance it. That limit is likely to be reached next year and can only be lifted by the unanimous agreement of mem-

her states. David Wood and letters, page 15

OVERSEAS.

Mr Carter wins by big margin in Virginia

From David Cross Washington, March 23 President Carter has controuncing Senator Edward Ken-nedy in another key southern

Preliminary returns from a series of Democratic caucuses held in Virginian yesterday gave Mr Carter 80 per cent of the votes cast, compared with a mere 13 per cent for Mr Kennedy. Seven per cent of the

votes were uncommitted.

The results should give the President 57 of the state's 64 delegates to the Democratic National Convention in New

York this summer. Senator Kennedy picked up only five delegates and two are not com-mitted to any candidate. Accordingy to United Press International, President Carter has now won well over a third of the 1,666 delegates he needs to defeat Senator Kennedy for the nomination. Mr Carter has 604.5 delegates and the senator from Massachusetts 206.5 with 28 uncommitted.

The White House was under-standably overjoyed about the President's victory in Virgina. Preliminary estimates of the final Virginia vote indicate that Senator Kennedy will now have to capture 62 per cent of the delegates in the remaining pri-

maries and caucuses", a White House spokesman said. Senator Kennedy failed to make an impact in nearly all parts of the state. Only in the north where many commuters to Washington live did he gain 40

per cent of the vote.

Meanwhile in Missouri, Mr Ronald Reagan, the former Governor of California and probable winner of the Republican nomination, also ran true to form. Early results showed him winning virtually all of the delegates in the St Louis area and 20 outlying counties

Mr Kobie Coetzee, Deputy responsibility."

Quebec poll shows narrow majority for independence

From Ann Penketh Montreal, March 23 A narrow majority of voters

in French-speaking Quebec are in favour of political independence for the province, according to the latest opinion poll.

The poll, taken after the first week of a debate in the Quebec Legislature on the holding of a referendum on that subject, indicates that 51 per cent of the population would vote "Yes" in the referendum on for

sovereignty-association for the province, while 47 per cent would vote "No". The term means an economic union with political independence. The date of the referendum

has yet to be decided, but if public opinion continues to favour the Parti Québécois option, it may be held as early as May 19, the Queen's birthday and a public holiday in Canada. A more likely date, however, is June 2.
The three-week 35-hour

debate on the question ended last week with the adoption of the government's morion with only a slight amendment. The result was a foregone conclu-sion as Parti Québecois has

an absolute majority

The question that will be put
to the people of Quebec will
read: "The Government of
Quebec has made public its proposal to negotiate a new agreement with the rest of Canada based on the equality

laws, levy its taxes, and establish relations abroad—in other words, sovereignty—and at the same time to maintain with Canada an economic association including a common currency; no change in political status resulting from these negotia-tions wil libe effected without approval by the people through another referendum; on these terms, do you give the Government of Quebec the mandate to negotiate the proposed agree-

ment between Quebec and Canada? Yes ... No ... The amendment proposed by Mr Rodrigue Biron, the former leader of the small Union Nationale party, who left his part yto joint those in favour political independence. strengthens the promise of a second referendum. A key element in the Parti Quebecois

strategy was to remind voters that they are not being asked for a "blank cheque" only a "mandate to negotiate", and emphasizing the importance of the second referendum.

The party was thus able to exploit the middle ground taken by the Liberal opposition which grees that there is a need for fundamental constitutional change, but considers that the change can be made only within the confederation.

It is clear throm the debate that the Parti Québécois has already begun the referendum

help athletes boycott call

Mescow, March 23.—Alme Monique Berlioux, the director of the International Clympic Committee, was quoted today as saying that the IOC might give financial aid to teams attenting the Moscow Olympics against their governments' wishes.

Mnie Berlioux told Sovietsky Sport that national olympic committees in the United States. Britain and other countries wanted their arthetes to come to Moscow. "This means they have to be helpe dby us. possibly in a material way", she sald.

National Olympic committeer from the United States and 15 West European countries, meeting in Brussels yesterday, implicitly rejected calls for a boycott of the Moscow Olympics.

Moscow Olympics.

Mme Berlioux said alternative games, such as those suggested by the United States, could be ruled out because of appasition from international spodts federations and practical difficulties. For our part we will do our best to make these difficulties worse. Mhe Berlioux said.

She said she was optimistic about the Moscow games and the IOC was fully satisfied with Soviet preparations.

Soviet preparations.
Americans split: United States Olympic athletes emerged from a White House meeting with President Carter deeply divided over his announced boycom o the Moscow games.

President Carter met 150 athletes and coaches to explain his views. He rold them: "I know what the Olympics mean to you. It is not a pleasant time for me".

He said that Soviet troops had taken thousands of lives in Afghanistan, and hundreds of thousands would be lost elsewhere if the United States did not make sacrifices to preserve world neace.

After the meeting with Mr Carter, a spot poll among the athletes showed 44 against the boycom, 29 in favour, and 24 abstaining. Reuter.

Korchnoi keeps chess lead

Velden, Austria, March 23.-The seventh game or the world chess championship quarter-finals ended in a draw at the weekend after Tigran Petrosian had looked set for victory to put him level with Viktor Korchnoi, who now leads 4-3 in the maximum 14-game march.

Vietnam:

Quang Quy

By Caroline Moorehead

Mr Trink Quang Quy, a former senstor, writer and judge, is believed to be seriously ill in the "reeducation"

camp where he is being held in Thuan Hai, in southern Vier-nam. He has been a diabetic for most of his life and is now

thought to have a kidney infec-

tion. He is 78.

After the change of govern-

ment in South Vietnam in 1975,

all high-ranking members of the

former military and civilian

administration were ordered to

report to the new authorities for "reeducation". It was

originally announced that this

process would last a maximum of three years.

However, accounts reaching human rights organizations in

this country suggest that several bundreds of thousands of poli-

tical prisoners are still inside Vietnamese prisons and rehabi-

litation camps. According to Mr Hoang Huu Quynh, a former member of the Vietnamese Communist Party, who has asked for political asylum in France, the figure may be as high as 700,000.

Mr Quy was born in Co-Bi in northern Vietnam, graduated from the Hanoi School of Peda-

gogy in 1927, then worked for the financial and economic de-

partment of the administration

of North Vietnam. After the Geneva Accords of 1954 and the partition of the country, he moved to the South and became

involved in relief work

In the late 1950s and early
1960s he took trade union
courses in the United States
and Britain, and on his return

Syria and Algeria unite against peace pact

and Algeria reaffirmed during summit talks here today their determination to oppose the peace agreement between Egypt

The meeting between President Hafiz al-Assad of Syria and President Chadli Benjedid of Algeria was their second since Mr Benjedid arrived in Damascus yesterday for a two-day

Official sources said the two leaders discussed what they termed "the imperialist-Zionist-reactionary onslaught", and pledged mutual assistance to resist this threat.

The presidents also reviewed a proposal for staging a summit conference of the Front for Steadfastness and Cooperation, a five-member Arab alliance opposed to the Camp David peace agreement

The front comprises Libya, South Yemen and the Palestine Liberation Organization (PLO), as well as Syria and Algeria. Later Syrian Government officials announced that the summit conference of the front

had been postponed. They said the meeting might be held in the second half of April, but did not give any specific date. The conference had been scheduled for March 28 in Damascus.

Official sources said that Mr Assad and Mr Benjedid ex-pressed satisfaction with the development of relations between their two countries in all fields.

They were expected to meet again later today before Mr

tragedy. Cheryl Liss equally seemed to have a clear idea of what she was about as the ballerina fastidious neatness of movement that revealed the coy shallow-

Having pulled the company to-gether so well in other works, Festival Baller's new directors will need to do something soon

changes. At the matinee Matz Skoog (his soaring towns en Pair especially notable) and Nicholas Johnson, with Andria Hall as the ballerina, made a bright and spirited trio of principals.

In the evening, Jay Jolley, having danced one of the main male roles earlier in the week, moved across to the other. which if anything suits him even better except in some passages of petite batterie. Jan Willem de Roo, the other male principal, matched Jolley and Eva Evdokimova for elegance line but was severely stretched at times to vie with them in brilliance.

SEASON .

"A near-

masterpiece... • with a large brilliant cast" (Felix Barker, E. News)

MONDAY to SATURDAY at 5.30pm the early start allows peris to end at approx 10.50pm. including two intervals, one a half-hour food break

Festival Ballet ---Coliseum

Two young newcomers to the leading roles in Petrushka made e good showing at Festival Ballet's matinée on Saturday. Jean-Louis Cabane in the title part made a striking impression from the first, with a gangling appearance as though the pupper's arms and legs were dan ling loose from a couple of coathangers. It soon became apparent that he had found his own understanding of the character, not going all out for sympathy, or even making too much of the soul struggling inside the sawdust, but pressing on optimistically and letting the

ness of her pretended emotions; even her shame at Petrushka's death was optly affected.

With performances as good as those, it is a pity that some other roles are crudely played and the production a shambles. about this one.

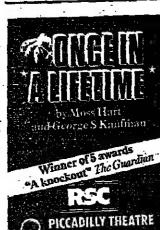

Etudes, as I have previously remarked, is looking very good this season. Both houses on Saturday brought further cast

Graham Greene's dizzying comedy

For Whom the Bell Chimes

Haymarket Studio Leicester

Ned Chaillet

There exists, for those with bizarre domestic tastes, a thriving industry in melodic doorchimes. Various national anthems are available to bring postmen to attention; alternatively, nostalgic tunes to reawaken romance in spouses who have forgotten their keys can be obtained if patriotism is out of favour. For special occasions, such as Christmas or birthdays, the door itself can answer carollers or singing telegrams. That sort of chime is what Graham Greene has in mind in For Whom the Bell Chimes, and any evocation of Hemingway of John Donne has its beginning and end in the joking title, and in the presence

Such a set of doorchimes is the distinguishing feature of a room tiled completely in white, with only a single table rising from the floor to suggest habi-

Alongside the more strident forms of theatrical nostalgia

there is a growing number of

cool, unassertive playwrights who specialise in evoking ob-scure corners of Britain remote from ever-sordid taint of

postwar life. The Cottesloe's Lark Rise adaptation was the most conspicuous example of this movement; but he main

achieved some of its most deli-

cate recent work through the plays of Robert Holman, Nick Darke and Paul Copley, whose

It has become something of a

tradition that new works com-

posed for the City of Birming-ham Symphony Orchestra will be brought to London a day or

two after the première at home. Usually they have been com-missioned under the terms of

the Feeney Trust. Friday's novelty, John McCabe's second

violin concerto, had been com-missioned by its soloist, Erich Gruenberg, who is McCabe's parmer in sonata recitals.

McCabe's first violin concerto

McCabe's first violin concerto
was his Opus 2, written in 1959
mnder the impress of T. S.
Elior's The Hollow Men. Its
successor does not wear an opus
number, and its only declared
intention is to explore the lyn-

intention is to explore the lyn-cal characteristics of the violin —melodies rather than fire-works, a laudable objective. The composer is as good as his word: the concerto's four move-ments abound in tunes, whether reflective cantilena, as in the outer movements, or something more dance-like, as in the two

The second movement, for example, is called "Dances", and is shaped something like a Hungarian Rhapsody, slow melodica

The pace of Simon Stokes's production could stand some acceleration.

Camden Choir All Hallows, NW3

Paul Griffiths

Ernst Krenek, born in 1900 and still actively composing at his home in California, is one of the great unknown quantities of twentieth-century music. Every history mentions his jazz opera Jonny spielt auf, which startled even the Berliners of 1927 and then within a couple of years had been seen everywhere from New York to Leningrad. But yesterday's success de scandale is today's untouched yellowing score, and Krenek has been lumbered with a repunas oeen imbered with a reputation which takes no account of his several more ambitious operas, of his big early symphonies or of the serial engineering of his later style.

The Camden Choir has therefore to be congratulated for their enterprise in including a substantial work by him at their Camden Festival concert on Saturday night. His Deutsche Messe, scored for chorus, organ and a small, lightly deployed ensemble of wind and percussion, dates from 1968 and offers within its brief, austere compass a full picture of Krenek the musician. The counterpoint is that of

and grandly coloured, a good vehicle for the CBSO in its present, impressive condition present, impressive condition (just home from a tour of Yugo-slavia and Austria with Christopher Seaman who conducted this concert), the woodwind and heavy brass particularly fine. The solo part suited Mr Gruenberg's artistry to a nicety, sensitive and elegant with a touch of sweetness taying and a chalstudent of renaissance music, of sweetness, taxing and a chal-lenge (I guess) but never

Ian Partridge Wigmore Hall

The fragile melancholy of the opening "In der Fremde" of Schumann's Op 39 Liederkreis does not make for the easiest start to a recital, but Ian and Jennifer Partridge broke the silence almost imperceptibly

on Friday, singing and playing with a majorained throughout the

entire evening. Although to overdramatize is to distort this cycle of fleeting poetic miniature. moments, Mr Partridge carried the art of understatement 2 linle too far: there was no change of vocal colour, for instance, in the eerie Loreler's reply in "Waldesgesprach", no sense of the sinister in Zwielicht". In fact, the voice's tone was too evenly bland throughout to catch many of

the nuances, the gentle stings-in-the-tail of several songs. More suited to Mr Partridge's range of vocal expression were Lennox Berkeley's Five Housman Songs. Apart from some in-adequately supported high and low notes, he conveyed well the aching numbness of the poetry in broad, mellifluous phrases arching over a single even line of sound.

Those qualities of agility, hearts of men", cries the penunimate song: on Friday we felt the pity, but not the horror.
The evening ended in exile,

sensitive diction and gentleness which Ian Partridge's voice shares with that of Peter Pears served him well in Britten's Who are these Children?—and: he need not have apologized for his Scottish accent. But again, a sense of drama was missing, so necessary here to convey the violent immediacy as well as the simplicity of the imagery of these poems. "The blood of children corrupts the

as it had begun, with a quietly reflective performance of Beer-hoven's An die ferne Geliebte. Some of the reviews on this page are reprinted from Satur-

but the harmonic progressions are absolutely firm, even wel-coming triads. The instruments quietly gather together the threads of an eventful life, the clarinet sounding back through Webern to Mozart, the free-wheeling trumpet living in the

air of Copland and Carter. Julian Williamson conducted a thrilling performance of this little masterpiece, his choir confident and forthright in attack and possessing an unusually wide dynamic range, enough to bring a stark beauty to those few moments of beauty to those few moments of drama in what was obviously conceived as liturgical music. Ian Sadler, the organist, held to a discreet accompanying role most of the time, but wisely allowed himself a majestic entrance in the Sanctus, and the members of the London Bach Orchestra were effective in their solemn underning. in their solemn underpinning and twiddles of decoration.

The work could be a useful companion, as it was here, to Bruckner's Mass for chorus and wind. Senarated by almost a century, the two masses gained century, the two masses gamed in equal measure from the clarity and resonance of All Hallows, a barn of late Victorian gothic which got stranded unfinished on the fringes of Hampstead, And how strange to find a church where one can not only smoke but have one's own wine. buy one's own wine.

Alberni Quartet Wigmore Hall

Noël Goodwin

Benjamin Britten's three mature string quartets span a major part of his career. The first two are from the 1940s; the third was almost the last work he lived to complete. Each in turn forms the centrepiece of three concerts in successive months by the Alberni String Quartet, whose residency at Harlow New Town since 1963 is one of the more shining examples of civic and other arts patronage in this country, and who have recently won exceptional acclaim in New York and other centres on an-American tour, Before Britten's death the Alberni players had the advantage of coathing from him in his own and other works, which lent a particular interest to their performance of the Quartet No 1 on Saturday night in the first concert of their series. A product of Britten's brief

American so journ (and of the remarkable discrimination of Mrs Elizabeth Sprague Coolidge in encouraging a new generation of quarter writing), the first quartet reflects much of the composer's youthful exuberence and invention. Its originality and compelling appeal are apparent from the outset in

the sustained, mysterious ten-sion of the higher strings over the cello's pizzicati, and con-tinue through passages of virtuoso brilliance and fun, as well as a slow movement which looks forward not only to the moon-lit moments of Peter Grimes but to the nocurnal palpitation of the following operas as well. The Alberni performance, ex-cellent throughout, had two outstanding qualities in pre-sentation: skilful shading over a wide range of dynamics, and an ideal weight of impetus in launching each phrase to sus-tain its place in the whole.

The Britten quarter was

framed, as the later ones will also be, by Beethoven and Brahms. The former's F major Quartet, Op 18 No 1, was played as a buoyant conversation piece, in which cheerfulness keeps breaking through, albeit with a special pleading quality slow movement. The degree of impetus was again skilfully judged in the B flat Quartet, Op 67, by Brahms, where the music's gift to an unmuted viola in the third movement was nicely relished by Roger Best over his temporarily subdued colleagues (Howard Davis, Peter Pople and David Smith), and in which the lyrical sweetness of the Andante was contrasted with a beguiling range of varied character elsewhere in the work.

Last night's television

Bloody Kids ATV

Michael Ratcliffe

Stephen Poliakoff's new television play was the story of two boys young enough to run like small animals so close to the ground that they escaped the great nets of adult authority and crime. "We can do anything", said Leo of the police during the tedium and menace of the school week, "they're too busy". To make the system sit up and dash about for a bit on their behalf Leo and Mike took some blood bags from the art room and staged a fight "to the death" outside the football ground before Saturfootball ground before Saturday's match. The plan worked perfectly, except that Mike really did stab Leo (story-line tended to forget this later), running off into the crowd and the town. The police spend the rest of the play listening to Leo's luxurious lies in the hospital and trying to find Mike. By the time they did they had a full-scale riot on their

hand a full-scale riot on their hands and the hospital looked more like the police station every minute, with dazed and affronted punks clamouring for attention. The boys being by then forgotten, Len smashed the fire alarm and watched with correctly a flicker of either play, called Yes and No, and by the introduction of two inter-Yes and No is another jest from Mr Greene, about the vanity of theatre, with a director privately rehearsing a young man whose entire role counsists of the words "Yes" and "No". Pompous instruction vies with an attempt at seduction to give a range of interpretation to those two words. Neatly played by with scarcely a flicker of either interest or fear as a melee of dressing gowns, saris, stretchers, tracker dogs, drip feeds and green masks streamed in panic

The Ghost Sonata BBC 1

words. Neatly played by William Hope and Derek Smith, it is a warning against reading too much into a script, with jokes about surprising the Michael Church The trouble with most child-ren's fantusies, when they write suthor with an unscripted pause. Taking it as a fair comment, there is nothing left to read into For Whom the Bell Chimes except merciment. In that play as well, Derek them down, is that they simply can't resolve them to the satisfaction of a rational adult. There they go, stepping blithely from one world to another, introducing a variety of impossible characters, flouting all known laws of nature, and get-ting quite carried away by their plot. After a while, confronted by the complexities they have produced, they falter, and out comes the inevitable clincher: and crimes with a conviction that provides the necessary bewilderment in the audience and on the stage. Ask not indeed, for whom the ball And then I woke up ".

It must have been about helf way through The Ghost Sonata that I began to fear the same would hold for this symbolist fantasy by Strindberg, and as the second helf wore on that fear proved well founded. fear proved well founded. This "chamber play", written for its author's own Intimate Theatre, set up an immensely complicated edifice which began by being wonderfully mysterious but was at the end merely mystifying.

What was it about? There were a lot of familiar Striodbergian themes: doubts about paternity and identity, the

play like a indepent from another, still possible, world. morbid fears of the man-eating propensities of Woman. It was studded with apercus of dreadful clarity, and rich in poetic thoughts about words and silence, about youth, beauty, innocence and the emotional canker of age. I gathered, after seeing it, that it was indeed cast in three movements, but as I watched it not only the plot but even the outlines of this simple structure eluded mc. Philip Saville's direction, however, capitalized magnificently on the play's surrealist qualities; this was a stunning production. The appropriate frisson was established at the outset as a large, solid house crumpled spontaneously to dust and a child vanished out of the hero's arms. Discreet and festi-dious use was made of colour

Michael Meyer's translation was heautiful, and so was the acting. Donald Pleasence brought compelling authority to the enigmatic figure of the Old Man, and Lila Kedrova miumphantly incarnated the Miss Havisham-like mummy locked away in a lumber room. When people sobbed, it was paternity and identity, the with a dry, somnambulistic obsessive pursuit of revenge, a quality; when they died, it

Problems developing

Progress for a Small Planet

By Barbara Ward

By Barbara Ward

(Tempo Smith, £3.95)

Observers of the International
scene today can point to a
catalogue of political and
economic difficulties, daunting
in complexity, which remain
unsolved—inflation, unemployment, energy uncertainties,
debt and despair in parts of
the Third World, political frictions amongst the zealots for
change, and so on.

thange, and so on. Barbara Ward sees all these items as the outcome of decades of industrial and urban development pursued in the name of misguided com-mon goals. These have either overlooked or did not perceive the exploitation of material resources and which have led to environmental pollution on a planetary scale. She is sorely troubled by threats and degradenons to our cities, farmland, coastlines, amosphere and the gulf between the rich and the poor. Deeper still, she is aware hat the social and economic differences emerging are the source of political conflicts

and of wars. A perverse outcome today is the renewed interest in armaments. If, in her view, an equal amount of human effort and material resources were devoted to evolutionary change then this could ensure that future generations are also able to enjoy our beauti-ful and inhabital planet. She wants evolutionary change in which the basic food, water and energy resources are used without the need for chemical and nuclear support. The today have little perception of a comprehensive solution of this kind. But she does not develop this point. One might

add that since the first oil crisis in 1973 the major

nations have made many efforts in a blundering sort of way which have been frus-trated by inequalities of resources and needs. However, she says, there are no implacable constraints in developing harmonious solutions This conclusion is reached only after a series of informative examinations of the same use

of science, coincident with, for any particular lack of resources, conservation and care. Energy, for example, is not a problem if remaining fossil fuels are used to provide a breathing space before energy from the sun, either directly or indirectly, is barnessed. Even the most widely canvassed risk of all, excessive population, dissolves as literacy, health and amenable jobs rep-lace earlier back-breaking lace earlier back-breaking labours in ploneer areas for which large families were the only solution. These are bold observations,

If you have not read Earbara Ward's work before, she writes as a trained journalist and columnist who has accumulated a lifetime of worldly knowledge. Much of the information in this book is drawn from international sources and, for this reason, it has textbook quali-ties. As in any social science reporting, however, her analysis is open to alternative interpretation. The passages of historical evolution tend to understate motives for change, especially where the influence of the great religions and of pioneers, might be considered Overall, the book presents the current views of this indus-trious and influential author in an attractive presentation which both asks questions and provides answers.

Forest should be the last team to fear pitfalls of foreign soil

Football Correspondent

Ajax, who have played in four European Cup-finals, winning three in succession in the early 70s, and have scored 30 goals in their six games in this season's competition, will be Nottingham Forest's eminent opponents in the semi-final round at the City Ground on April 9 and in Amsterdam on April 23. 9 and in Amsterdam on April 23.
In arguably the most attractivesounding group of four to meet
since 1976, Forest, despite being
the holders and resilient survivors
of last week's tie against Dynamo
Berlin, may find this year's semifinal as demanding as last season's
against Cologne.

against Cologne.

Ajax, still inspired by the fine Durch international, Krol, and with some interesting fresh blood, have virtually strolled into the last four with aggregate victories of 16—2 over HJK (Finland), 15—4, over Omonia Nikosla (Cyprus) and 4—0 in the last round over Racing Strasbourg, who at least held them to a goadless draw in France. Perbaps it would be as well if Forest looked farther back to last season's Uefa Cup in which Ajax son's Uefa Cup in which Ajax were knocked out in the third round by a comparatively modest

Howed ream.

The draw, made in Zurich on Saturday, ensured that at least one Englishman would appear in the final because Real Madrid, the final because Real Madrid, who are currently getting the best of Cummingham's skills, and Hamburg, who have had their money's worth from Keegan, are paired in the semi-final. Keegan's reaction was that if they knocked out Real, the Spanish supporters would take their side in the final in Madrid on May 28. I suspect the reverse may be true.

Should Hamburg fail to beat Real Madrid, Forest could find themselves in the most difficult final that the permutations allow.

themselves in the most circuit final that the permutations allow. Perer Taylor, their assistant manager, agreed that it would have been better to play Real on a home and away basis in the semi-final than in a single match final at the Bernabeu Stadium, that a force in the semi-final at the Bernabeu Stadium, the semi-final at the Bernabeu Stadium. final at the Bernabeu Stadium, but as Forest have yet to lose an away game in their two seasons of European Cup competition, they should be the last to fear the pitialls of foreign soil. Equally, they should not respect old reputations.

By John Nicholls

Portsmouth 1 Walsail 2
For a top of the table clash, albeit in the fourth division, this was for much of the afternoon a tedious game for the spectators. No doubt Walsail will be pleased at going farther ahead at the top of the division (they are now seven points clear of Huddersfield Town) while Portsmouth have only themselves to blame for not making more of their few chances.

making more of their few chances.
In front of a crowd that was larger than that at several first

division grounds, the teams took

the action was restricted to throw-ins and free kicks. After half an hour, however, Walsall pulled themselves together and began to

themselves together and began to make some progress towards the Portsmouth goal. A series of corners kept Portsmouth at full stretch and Walsall were able to move extra players into attack.

Yot there seemed no immediate danger when Macken, the right back, joined in an exchange of passes with Waddington. He was marshalled across the face of the took everyone by surprise when he suddenly swivelled and unleashed a powerful shot that beat

he suddenly swiveled and un-leashed a powerful shot that beat Knight. Walsall should have scored again minutes later when the speedy Rees outstripped every-one through the middle, but allowed Knight to pluck the ball off his toes when Penn was un-marked alongside him,

Hampden improving

Prospects have improved for Scotland's European championship match against Portugal at Hampinen Park on Wednesday. A week of bad weather had put the match, which was postponed on February 6, in doubl, but the Scotlish Football Association have told the Portuguesc party to travel to Glasgow after a marked improvement in the weather.

European semi-final round draws

Top of the table tedium

Walsall 2

as Walsall keep on course

Arsenal's opponents in the Cup Winners' Cup, Juventus, are also a widely-experienced. European club but that is not to say that their present team command the respect of those seen in the past. Italian football is in the middle of another match fixing scandar of another match-fixing scanus and Juventus themselves showed their lack of confidence in present players by becoming desperate to sign Keegan who would not become involved. Arsenal, if they have their sighs set on attacking football, should reach their first European final in 10 years.

Nottingham Forest returned to domestic matters with a 2-0 victory over Keegan's future team. Southampton, who are in danger of losing a place in next season's Uefa Cup. To have Keegan but not play in Europe is to keep a grand prix car in a col-de-sac. While Liverpool continued to win, albeit untidly against Brighton and Hove Albion at Anfield, and Manchester United did not drift further back than the existing, formidable six points after an incoherent 100th derby match win over Manchester City, two of the relegation strugglers, Derby County, with threa goals from a newcomer, Biley, and Bristol City, drew with each other and Bolton Wanderers beat Tottenham Hot spur. Manchester City cannot trust any of them to remain submissive.

There were prodigious complaints from managers in the second division, even among those who won, including Geoff Hurst of Chelsea, who said a 1—6 victory over Orient brought the first division closer but sent supporters home early. Tommy Docherty was angry at his Queen's Park Rangers who let a weakened Luton Town recover to draw after being two goals behind.

In the first division at Villa Park, the Ipswich Town manager. Nottingham Forest returned to

behind.
In the first division at Villa Park, the Ipswich Town manager, Bobby Robson, said his side, who drew 1—1 after a promising start, gave their worst performance in five months. As Max Boyce would say: "I know because I was there." Brail made a fine goal for Wark to eucourage Scotland rather more than Ipswich, and Morley gave Aston Villa an equalizer that much hard but uncoordinated work deserved.

Portsmouth looked shattered, yet only two minutes after the interval they were back in contention. Hemmerman tapped in a loose ball after a good cross from James had been blocked but not least the state of the sta

cleared. They were transformed and it was Walsall's turn to pack their defence, as the home side were on top for a while and the game at last came to life.

game at last came to lite.

Green saved the visitors from furtier panishment when he first palmed over a powerful drive from Gregory and then snatched away a header from the same player. Walsall were reduced to occasional breaks from their own

half and it was from one of these, two minutes from the end of normal time, that they stole both

points.

James and Davey collided in the James and Davey collided in the contre circle when both attempted to collect the ball. It fell clear to Penn, who sprinted away and into the Portsmouth area, where he was promptly felled by Knight. Buckley, the Walsall playermanager, made the important penalty kick look easy and Walsall were back on course for an immediate return to the third division.

Daly, who cost well over flm, whom Malcolm Allison played in the reserves last week with the declared intention of needling him into rediscovering his edge, contributed enough effort to suggest he had got the message. Young Caton also bolstered City whose fate, on the day, finally rested with Palmer, who took over from Bennert with little more than 20 minutes left. In that time he had two chances, one inviting, By Tom German Manchester U 1 Manchester C 0 The pleasantries, at least, will provide a lingering recollection of provide a ingering reconlection of a hundred derby matches between the Manchester clubs. Each club chairman presented the other with a momento of the oc-casion. Of the match itself at Old Trafford the record books will have little of distinction to hark back to than 20 minutes left. In that time he had two chances, one inviting, the other rather more demanding. He shot the first wide and headed the second in roughly the same direction. Reeves, another film signing, and Power, might also have made more of another opportunity but each left the ball to the other.

A goal which brought joy to one half of Manchester and gloom to the other. Henry's outstretched foot deflects a shot from Thomas (partly hidden) over Corrigan's head.

Memories are not made of this

These were among the high-lights, however. There was much that was unmemorable, especially in the opening half when neither goalkeeper had a worthwhile shot to save for 35 minutes. When, at last, the test came Corrigan re-ponded brilliantly. Jordan and

whens opened the way on the left for Thomas but Corrigan threw himself down swiftly United, soundly served by McQueen and Buchan, created a lot of room for themselves along that left fiznk. McIlroy volleyed one shot just a stade too high from that region and from there developed the move which brought the only goal of the afternoon. The ball bounced from a congestion of players just inside City's half of the field. A quick skip and jump by the referee suggested he was on the receiving end. Anyway, McIlroy and Albiston chased away down the left, although City seemed to have matters under control as Thomas shot. Corrigan seemed in position to cover it but the ball glanced off Henry and looped over the goalkeeper's head.

Fischer's Rome hopes dashed by broken leg

Frankfurt—West Germany re-ceived a blow to their hopes of winning the European champion-ship in Italy this June when centre forward Klaus Fischer, a regular scorer for the international side, broke a leg on Saturday and will be out for at least six months.

months.

Fischer was injured during Schalke's home defeat by Bayer Uerdingen in the West German Federal League. Horst Hrubesch, three thre Federal League. Horst Hrubesch, of Hamburg, who scored three goals against Werder Bremen in a 5-0 victory, can stake a claim for Fischer's place by a good personance against Austria on Wednesday it, as expected, he makes his first appearance in an interpretational

Bayern Munich and Eintracht Frankfurt scored a goal apiece in their encounter, but Bayern won 2—0, as Werter Lorant of Frankfurt hit the wrong goal with a spectactular long shot. Bayern's points ahead of holders Hamburg, who have a game in band. Hrubesch started Hamburg's rampage against their North German neighbours Wender; after 16 minutes and also ended it, with

the minutes and also ended it, with two more goals after 82 and 85 minutes. Milewski and Jakob added the others in a lop-sided affair that kept Hamburg's chances for a second title in a row alive.

Tony Woodcock, the English striker, scored after 51 minutes and led the charge to give FC Cologne a 2-2 draw at Borussia Mönchengladbach, after the home side had gone two up in the first half with goals by Hannes, one of them, a penalty. Woodcock kept on the pressure and put across a high cross that Littbarski headed in for the equalizer with 12 minutes to go. Cologne dropped back one point against the leaders but are still in contention for the title.

title.

VFB Stuttgart also kept pace with the top, humiliating visiting Fortuma Düsseldorf 5—1. Martin scored twice with Bernd Foerster, Kelsch and Ohlicher gerting the

others. Hertha BSC Berlin dropped back to last place again after losing 2—0 against visiting FC Kaiserslautern. Neues and Geye got the goals for the visitors with Holger Brueck missing a crucial penalty for Berlin.

Arsenal need enterprise in order to capitalize

Crystal Palace 1
afternoon in the ine at Highbury came injuntes from the end Palace were awarded at it was in keeping st of this miserable Francis put his spot ise to the centre of illowing Jennings to the centre of illowing Jennings to the centre of illowing Jennings to the proceedings. A flare-up featuring francis, Morphy and Nicholas in the Palace corner and O'Leary and Nelson in the Arsenal would have factored at last gare the crowd something to shout about A sleepy afternoon in the spring substine at Highbury came to life two minutes from the end when Crystal Palace were awarded a penalty. But it was in keeping with the rest of this miserable match that Francis put his spot tick too close to the centre of the goal, allowing Jennings to save. Thus Arsenal stretched their unbeaten run to 13 matches. unbeaten run to 13 matches.

unbeaten run to 13 matches.

Two points would have flattered Palace, but Arsenal would have had only themselves to blame for letting the game slip away from them. A London dethy used to generate excitement. Not any more, it seems. Most of Spearaday's match was played to the sound of speare from a meagre crowd of 37,000. The teams were entirely responsible for that because they were intent on containing rather than creating—a case of nothing ventured, nothing gained.

Arsenal are in the happy position of being fourth in the first division and in the semi-final rounds of the FA Cup and European Cup. Winners' Cup. However, if they are to lay their hands on a trophy this senson they will have to show more enterprise than this. The side which Terry. Neill and Don Howe have built are hasd to beat, but equally hard to watch and it is understandably difficult for the neutral speciator to watch to neutral speciator to

result for them, but one could

crowd something to shout about and this preceded Arsenal's best and this preceded Arsenal's best period.

Brady opened the scoring in fifth focty-first minute with a hearth fully flighted free trick. A minute later Stapleton hit the post wift's header and then Rix struck the other upright with a fixing 25-years shot. Palace, though, had some good chances of their own and equalized from one of them 15 minutes from time. Arsenal's offside trap went awry, fixing Sansom free to collect a long, diagonal pass from Hinshelwood and score with the minimum of and score with the minimum

and score with the minimum of first.

Palace imposed their will on Arrenal in the second half. Jennings saved well from Hilare and brilliantly from Fraces as the home defence began in look homessingly edgy—an edginess which led to Palace's late penalty and a dramatic finish.

Leading players arrested

Rome, March 23.—The Ifalian is football world trembled today when police arrested leading soccer figures in an attempt to curb corruption. After today's national league games, the police carried out arrests at grounds in Rome, Milan and Pescara. Among those taken into custody were several first division players, and Felice Colombo, president of Italy's champion club, AC Milan. Italy's fraud squad have spent months investigating what they believe to be a secret attempt to fix the results of football matches in advance, to defraud the

national lottery system. Huge-sums of money were said-to be involved.

The Lazio captain, Giuseppe Wilson, aud team colleagues Giordano, Cacciatori and Manfredonia, Milan players Albertosi and Morlin, the Avellino striker, Pellegrini, and Perousa players, Zecchini and Martira were all arrested.

Zecchini and Martira were all arrested.

Ban in danger: A 15-year-old ban on foreign footballers playing in Italy looks certain to be lifted following a meeting of first and second division club presidents in Milan yesterday.—Agence France-Presse.

Ambitions of first half the sun

Line a bunch of grapes they hang there, suspended from the nop of the second division. Eight ching to the vine of promotion but it will be a vintage year for only three. On the evidence presented on Saturday, neither Queen's Park Rangers nor Luton Town deserve to be among them. On the first day of spring, one of the qualities not on show was consistency, except perhaps in the paleness of the sun.

Paleness of the sun.

For 45 minutes, Rangers enhanced their ambitions and helped to erase those of Luton. Goddard punched two near holes, the first after only 30 seconds, in Findlay's net with the help of Burke, a withdrawn winger in the style of Robertson. It is no coincidence that Burke was transferred from Nottingham Forest last summer.

last summer.

With Roeder picking the ball up in midfield, McCreery chasing it and Currie distributing it, Ranger's eyes were wide open. Allen and Goddard provided in the vacant spaces ahead, waiting to prey on the opportunities. Before the interval, their lead should have been been described. have been beyond reach.

have been beyond reach.

At the back Wicks, like a walking telegraph pole, cleared up everything in the six and Hazeli cleaned up everything on the floor. Luton, wandering around in uncertain circles, could offer nothing in return but a half-hearted effort from Hatton which Woods gathered as though it was a stray less on the Lostus Road lawn.

a stray less on the Lostus Rose lawn.

After the break, though, the roles were reversed. Harkouk's replacement of Roeder 10 minutes into the second half was to prove significant. As if to announce his surrival, he immediately fouled Greatish and was booked. Yet west was the man he was supposed to be shadowing and West it was who sparked the retival.

The sharp bells had already

revival.

The alarm bells had already rung. Woods was the first to lose concentration and, surprised by Stein's snap shot, could only push the ball on to the ber. Hazell was the next and, determined to lose possession, gave the ball to West, who promptly sent Hatton through on the left. His cross found Wicks out of position and Stein was left free to head comfortably home.

Woods was then beaten by Price's shot but was again saved by the bar. As the next cross came over, he merely flapped it on to Hill's forelead whence it bounced back over him into the unguarded net. Luton, after an uneasy start, had at least shown their powers of recovery, yet they will need more than that if they are to go up and much more if they are to stay up.

Rangers look the more likely

Statistics again mea evaporate in nothing to Oxford

By Peter Ryde
Oxford gölfers once again ignored statistics on Saturday at Royal Liverpool by winning six of the 10 singles in their annual march against Cambridge, and the match overall by 84-64. They showed, as they had done last year and to a lesser extent in 1973 when they won the first of the present run of three wins, an ability in deliver the goods on the day which is the Exyrent prayer of every heam captain.

It was acknowledged that the one that sprang last year's surprise, but so too were Cambridge who also gave evidence of strong reserves by not losing a single match in the 18 that make up the preliminary trials of strength involving reserves and second canna. These results closiked fire paradoxical truth that Covinch had greater depth in the first side, even if they had not mitch to spare outside it.

They won four of the five matches in the lower half. Ryalls recovered his captain's choice of him by a splendid thrust at the right moment. Cambridge were molecky to lose Tickell, victim of a high moment. Cambridge were molecky to lose Tickell, victim of a high moment. Cambridge were neither, the cool, losser-foire class, overcame the rival Cambridge were reckoned to have the advantage Oxford held them. 22.—Lee Trevino birdied the final
hole today to take a one stroke
lea dover Hubert Green after
three rounds of the \$400,000
Tournament Players' Championship here.

Trevino had an eight under par
total of 208 for 54 holes, while
Green, who tied the course record
with a six under par 66, had six
birdies. Gary Player of South
Africa and Curt's Strange were
were tied for third at 210, and
another stroke away were
severiano Ballesteros of Spain,
Jack Micklans, Peter Jacobsen
Trevino scored six birdies for a
68 on the 7,000-yard course. At
the par five 18th be bit a sand
wedge to within seven feet and
made his putt for the birdie

going at Bridgend on Wales were not in the ered to win a match, by Esso as part of their rts programme, by a raity goal and two tries ed goal and a try. They of their points in the and still had ball enough ond to notch-up some

sually high number of ainst the head—7-2 in Wales—reflected their lyantage in the right s. The Welsh pack, yed some extra strength age at lock, also gained int superiority in the gardless of which side

s at stand-off half in-land to play a full back dtion, and Price, though

the left. But Price kicked the ball away and England lost their last sequine opportunity of a try.

Price could not complain about the service he got from his scrumhalf, Melville, whose later activities were restricted by a knock in the back, spun-out some dear impeccable passes even when under pressure. His eye for the opening, speed on the break, and institctive sense for doing the right thing underlined that he is a young player of exciting potential. But he remains rather frail in physique,

Wales for their part had no difficulties at stand-off half,

Wales for their part had no difficulties at stand-off half, where Bowen's relaxed and authoritative all-round performance had my colleague, Clem Thomas, always a zealous talent-spotter for his old club, Swansea, working hard on a dossier. The Welsh No 8, Robinson, scored their first try after the full back, Harris, had hit a post with

noon in attack when he seemed all but inflexibly bent on taking the wrong option. This was first apparent when, having declined to find touch out of his twenty-two, he was caught lu a ruck and the Welsh forwards produced loose ball for Jones to send in Ford at the corner.

In the second half, after Melville had broken on the open side of a lineout, the English forwards, at that time going productively in the loose, won a ruck that left at least a 3-2 overlap on the left. But Price kicked the ball away and England lost their last and, before half time, Bowen dummied across his centres for Harris to enter the line and give Cambriani room to slip the last tackle for try No 3.

Ford all but got a fourth to the second half, but just put a foot into touch. At the finish, yet another break by Melville preceded a successful Roglish publisher. another break by Melville preceded a successful English ruck and Price got his last option right

when he landed a dropped goal.

Rugby player dies

A 37-year-old rugby booker collupsed and died during a match in Gloucestershire on Saturday. Keith Harding was playing in a Dursley United second XV match against Gloucester All Blues when he collapsed in a acrummage. Mouth-to-mouth resuscitation on the pitch failed to revive him and he was carried off the pitch, dead.

Pakistan win their first series against Australia

Cricket

Lahore. March 23.—Pakistan today won a three-match series against Australia for the first time with the final Test here ending in

The last day of the series was a personal triumph for Allan Border, the Australian alf-rounder who completed his second century of the match. But the series belonged to Pakistan, led for the first time by Javed Mandad. They had won the first Test in Karachi by seven wickets and then denied Australia a scent of victory in the next two. This win was Pakistan's second in a home Test against Australia. The previous success, also in Karachi, was 24 years ago when lan Johnson's Australian played only one Test in Pakistan. Australians played only one Test in Pakistan.

Australia batted through the final day, moving from 64 for two overnight—a lead of 51—to 291 for eight at the close. Border, who made 150 not out in the first innings, scored 152 before he was out today, right at the end.

Badminton

Padukone amazes all, including Swie King

Prakash Padukone brought India Prakash Padukone brought India their first men's singles tute in the \$1-year history of the All-England badminton championships, sponsored by John Player, when he heat the favourite, Liem Swic King, of Indonesia, 15—3. 15—10, in the final at Wembley yesterday, Leoc Köppen, of Denmark, remined the women's title and England, represented in three doubles finals, won two of them.

doubles finals, won two of them.

This, though, was not an occasion for insularity. Two remarkable performances in the singles must be acknowledged first, with the victory by Padukone taking precedence because of its sheer onexpectedness. He has played Swie King four times before and always lost. It was hardly a greatinal, being too one-sided for that but will be remembered for the pattern it followed. From the moment Swie King came on court he looked surprisingly nervous for the man acknowledged as the greatest all-round player in the world, who was expected to win this title for the third time running.

ning.

In contrast, Padukone was so calm and methodical, he looked almost lackadaisical, beginning with the minute or so he kept overybody walding at the start while he carefully removed and nearly folded his track suit. Swie King's confidence can hardly have been helped when Padukone immediately went into a 10-40 lead in one hand. The Indian serred high and coolly dealt with the returns before steadily notching the points as Swie King hit wide or netted.

The Indonesian looked curlously

wide or netted.

The Indonesian looked curiously insipid: not once in the first game, which was over in eight minutes did he lund a proper smash. It was, of course, a case of him not being allowed to do so. Swie King's entire rhythm was thrown out of gear as Padukone, delaying his shot to the last pos-

Miss Köppen was superior as she beat Wiharjo Verawaty of Indonesia, 11—2, 11—5. No other woman player in the world could have done any better than the tail, strong Miss Verawaty who looked tense and flat-footed. Miss Verawaty is relatively new to European competi-tion, but after watching Swie King's downfall the thought occurred to many people that per-haps Indonesia put too much pressure to succeed on their

players.

For blazing rallies and spectacle, the men's doubles was the nighlight. Tjun Tjun and Johan Wahjudi, of Indonesia, beat Ray Stevens and Mike Tredgett, England's European champions. 10—15, 15—9, 15—10 to take this ride for the sixth time in seven years. Many of the exchanges in this match had the crowd literally squealing with excitement at every stroke, notably as the English pair pulled up in the second game from 13—1 down. At 14—9 they saved six game points.

In contrast the women's doubles players.

six game points.

In contrast the women's doubles final was sedate and marked more by feminine craffiness with Gillian Gilks and Nora Perry beating the Japanese. Yoshiko Yonekura and Atsuko Tiokuda. 11.—15. 15—7, 15—6. In the first game Mrs Gilks began slowly and Mrs Perry did not look altogether happy at the back of the court, but a greater degree of coordination came later. It was a result that once again made Mrs Gilks's unavailability for England in the future so sad.

The England selectors later announced publicly, with an unhappy knock of timing, that after 15 months of attempted conciliation, they were now abandoning all attempts to bring Mrs Gilks back into the fold. Both sides said a lot more, but finals day at the All-England was the wrong moment for such matters.

Mrs Gilks: ber performance in the doubles made ber unavailability for Eugland all the more sad.

Orwin, the Gloucester

player, who gave the airmen a valuable advantage with two exceptional first-half kicks, one from 49 metres after only six minutes, the second shortly before half time. Meanwhile, Fabian had missed three penalty attempts, one of them very simple, and had been replaced by Leigh, whose one success made the interval score 6—3.

The second half belonged conclusively to the RAF, even if no tried came until the third minute of injury time. Padden, their short-range goal-kicker, chipped over two more penalties from 22 metres to maintain their 100 per cent record in that respect. Although Warby, like his captain, the industrious Gillingham, a former Loughborough Colleges student, missed a try when a kick through went dend, the RAF stole a Navy heel and Thomas drove towards the posts. The ball went out to Wakeham who had a yawning overlap as he scored. Two minutes later Jones looped round to send the Navy substitute, Lea, over for a well-worked try, but it was merely a gesture. A case not so much of "Hello, salior" as "Goodbye, salior."

Gala must wait a week for

celebrations By Iso Mackenzie Hawick 13

By Ian Mackenzie

Hawick 13

One of the many surprising discoveries about the Gala Rugby Club is that, in spite of their formidable presence in the game, they have a remarkably poor record in terms of wimming competitions. They have frequently been bridesmaid, seidom bride.

Next Saturday the years of dissippidimens (though never despair) are likely to fall away in a riotous celebration. Then, only a meiocre Kelso side can stop Gala winning both the national league championship and the border league stife as well. Hawick's 17 border league successes in the 20 seasons since 1960 is unlikely to become 18 in 21 seasons, and for that Gala can look back with thanks to last Saturday.

Having lost, 9—12, to Hawick on their own ground last November, their own ability and worries about Hawick's apparent invincibility, at least in the Border programme. Their fears would have been confirmed had the two Lions, Renwick and Tomes, played to form. Neither there was a programme. Their fears would have been confirmed had the two Lions, Renwick and Tomes, played to form. Neither their was a program or there was a program or their their was a program or their their was a program or their fears would have been confirmed had the two Lions, Renwick and Tomes, played to form. Neither wissed two or there was a program or their their their was a program or their their their was a program or their thei

did.

Renwick did kick two penalty goals, but missed two other attempts and made rather a hash of trying to convert Whilian's try. On form, he would have won the game for Hawick. Easton kicked

on form, he woom tave agame for Hawick. Easton kicked the other penalty goal.

There is not a weak link in the present Gala team. More important, they have come to believe in themselves. Some initial trepidation on Hawick's pitch—cleared of snow by a volunteer army, working in 16 degrees of frostwas understandable. A win by a goal, a dropped goal and three penalty goals to a try and three penalty goals to a try and three penalty goals shook away all the fears. Gala's points came from Brown, with a dropped goal, a conversion and a penalty goal: Dods, who kicked two penalty goals, and Leslie, who scored the try.

Rowing

ARA come off the fence and vote in favour of Games

The Amateur Rowing Association (ARA) executive council voted by a clear majority yester-day that a British team should be sent to the Olympic Games in Moscow.

Yesterday the ARA council issued the following statement after 2 special meeting at their headquarters in Hammersmith:
"Having considered carefully all
the facets of the matter, Council believes that a British team should be sent to the twenty-second Olympics and our oarsmen should be part of that team. Accordingly, the council instructs its represen-tatives to speak and vote in favour of immediate acceptance of the invitation at the next meeting of he British Olympic Association." Since a rather bland statement hree weeks ago, the ARA council has been under pressure from the British rowing team designate. They met leading representatives

of the ARA executive on Saturday when it became apparent to the rowers, possibly for the first time, that the executive was unlikely to use them as political unlikely to use them as pointed pawns.

The mood of the ARA has changed considerably in the last few weeks. My interpretation is that councillors have become increasingly disturbed by the thought of athletes being used as front-line t roops by polliclans without other obvious measures being taken against the Soviet Union.

It is understandable that some

It is understandable that some It is understandable that some councillors were not in favour of the motion as a matter of conscience. Others may have voted for the motion only because it was the wish of their constituents rather than for persoal choice. But the ARA council is firmly behind the transport to the Olympic the team going to the Olympic Regatts, unless there is a further deterioration in the international

So there were deep undercur-rents both on the tideway and on its banks over the weekend. On Saturday the sport rather than politics took its rightful pride of place with the annual Head of the River race. But the late Groucho Marx would not have been out of place with his distinctive cigar and learning walk.

Only a match away from 'ideal' derby

However, the superb attacking play of his colleagues provided the platform for inevitable victory. Rovers clinched the issue early in By Keith Macklin Just one more game, next Saturday's second semi-final, Saturday's second semi-fittal, stands between the "burghers" and "citizens" of Kingston-uponthe second half with two tries from the cunning little scrum half sand "citizens" of Kingston-upon-Hull and their Wembley ideal of the local derby to end all local derbies. After the comfortable victory by 20 points to seven of Hull Kingston Rovers against Halifax at Headingley on Saturday, Hull need to beat Widnes at Swinton next weekend to provide, for the second time this season, a Humberside battle for a leading knockout trophy. The fact that the stage will be Rugby League's equivalent of the Royal Variety Performance at the London Paliadium gives added spice to the prospect of yet another con-frontation between the deadliest of rivals from East Hull and West Huil. Agar, and the speedy centre, Hart-ley. Smith got a fifth try for Rovers, Millward crowned his dis-Rovers, Miliward crowden his one-play by dropping a goal and the 17,500 crowd gave a tremendous cheer when gallant Halifax got a late consolation try through Staging its second game within 24 hours, Headingley provided the shock of the season yesterday. Leeds, who have a record of near invincibility on their own ground, were beaten 18—15 by Blackpool
Borough, who have been sentenced
to relegation since before Christmas. Borough were inspired by a
lively performance from their
stand-off, Alan Fairhurst, who
scored a try, kicked four goals,
and also dronned a goal

Rovers were mildly worried for about 20 minutes at Headingley. They conceded two early penalties to Halifax's dependable full back, Birts; they hit back with the first In they hit back with the first of Sullivan's two tries, got in front with a penalty from Hubbard and thereafter controlled the game totally. As expected, the brave Halifax defence fought a magnificent rearguard action, but all the pace and the flair came from Rovers and their inspiring captain and stand-off half, Roger Millward, whose greatest ambition is to win a Wembley medal and who won the Man of the Match award for a non-stop performance. Rovers were held to 8—4 at half-time, largely due to the fact that Hubbard, a very large young man who has made a great impact on Rugby League this season, could not kick goals. He shook his head in disbelief when he missed one from in front of the posts towards the end of the first half, and ended with only two successful attempts out of eight.

State Express Cup

hurst and Risman.

The defear of Leeds means that the first division championship rests between Widnes, the present leaders, and Bradford Northern, who have games in hand. Northern comfortably beat Salford 15—0 with David Redfearne, Barends and Grayshou scoring the tries and Stephenson (two) and Ferres landing goals against opponents who had a front row forward. Henney, sent off. Widnes, despite their injury problems, won comfortably at Hunslet. Wright and Bentley got their tries.

and also dropped a goal.

Leeds led 10—7 at half-time, but even in the first half they had

even in the first half they had lacked the speed and power for whichthey are famous. They scored three tries through David Smith (two) and Cunningham, and Dick (anded three goals, but Blackpool realised they were in with more than a fighting chance and an excellent all-round team display brought tries from Chester, Fairhurst and Risman.

The defeat of Leeds means that

England fightback foils fast | Mrs King bows and inventive Irish

By Sydney Friskin England 4

Lorraine Baker, aged 15, scored a double in the women's AAA intermediate national indoor championships at Cosford on Saturday. She recorded an age group record and personal best in winding the 400 metres in 55.4 seconds. An hour later Miss Baker, of Coventry Godiva, best Linsey MecDonald in the lovermediate 800 metres.

Miss Baker forced the pace from the start and, with 200 metres remaining, was 20 metres in from Miss MacDonald produced an electrifying burst as both girls hurled themselves at the 8me together. The verdict week to Mass Baker with both timed at 2 min 10.3 sec. Winners: England 4 Ireland 4
The Hockey Association' travelling circus moved yesterday from
Lord's to the artificial surface at
Crystal Palace, where England
shared eight goals with Ireland. It
enabled England to stay unbeaten
over the weekend by virtue of
their 1—0 victory over Ireland in
a less eventful metch on Saturday,
when an early goal by Wallace
proved decisive...

It seemed unlikely that Ireland

proved decisive... It seemed unlikely that Ireland would lose the grip they had taken on yesterday's match shortly after the interval, when they led 3—1 and with only seven minutes to go were 4—2 ahead. The result represented a good fightback by England, but overall Ireland played faster and more inventive hockey.

England, however, motivated from behind by the experienced

Apart from the ski equipment he will wear while competing. Stenmarks hopes to sign longterm contracts to advertise only a few big products, such as cars,

and will not become a walking biliboard, Mr Wagnsson said.

Cattousse may be latest in Lawless line of champions

The Terry Lawless champion factory, which suffered a rare setback when Jimmy Flint failed to win the British featherweight dide from Pat Cowdell, should produce another winner today when Ray Cattouse, of Balbam, may beat Dave McCabe, from Gartcosh, for the vacant British lightweight championship.

Boxing

Ingriveignt championsing.

The Lawless camp is back on course after Jim Wart's world title win over Charlie Nash last weekend; they are also back in Glasgow where the stable has a tradition of winning and retaining championships.

championships.

The atmosphere at the St Andrews sporting club tonight will be a good deal more restrained than for Watt v Nash at Kelvin Hall. This time the home crowd is likely to be disappointed. McCabe has a perfect record of 19 wins in 19 fights where Cattouse has been almost totally unemployed during the past year. Yet Cattouse has the extra touch of class, and barring accidents, this should see him through a hard fight.

In February last year. Cattouse

lard fight.

In February last year, Cattouse gave the most impressive performance of his career, stopping Johnny Claydon, who had fought both Watt and Nash for the British title. This was a final eliminator for this cortest but he has boxed only once since and that boxed only once since and that lout lasted less than one round.

In the same period, McCabe had four fights and four wins. So the loud lasted less than one round.

In the same period, McCabe had four fights and four wins. So the lasted lasted lasted last lasted lasted

Scot should take an early lead but on this occasion could find himself overtaken. scot should take an early lead but on this occasion could find himself overtaken. Fire halts training: A fire in the Caesars Palace sports pavilion prevented Larry Holmes, the World Boxing Council (WBC) heavyweight champion, from training yesterday for his title defence here against Leroy Jones on March 31, Reuter reports from Las Vegas.

The fire, started by a workman's torch, burged one wall and part of the ceiling before it was put out. Water from fire hoses damaged the ring, but it was expected that Holmes would be able to resume training today.

On the same right as the Holmes Jones fight, John Tate, the World Boxing Association (WBA) heavyweight champion, will defend his title against a fellow-American. Mike Weaver, in Knoxville, Tennessee. Tate is an overwhelming favourite but Weaver remains confident. "I don't know why people say I'm just going to Knoxville to get beat," he said. "I'm going to surprise some people. I really don't think Tate will last past the seventh round. I'll either knock him out or he'll quit. I'm gonna put pressure on him. Everyone says Tate is big and strong, but I don't think he can carry that weight when the pressure is on him."

Tate is 6 feet 4 inches (1.93m) and 240 pounds (105,72kg)—Weaver is 6 feet 1 inch (1.85m) and 205 pounds (92,87kg).

Horse trials

Haagensen the master

reigning European champion, gave an international favour to the open/intermediate division of the Shelswell horse trials near Bicester vesterday, when he competed on Monaco, the horse on whom he won his title at Lubmühlen last September. ith only 20 dressage penalties (he was a member of the Danish dressage team in the last Olympic games) he left his rivals determined to try to avoid being in the same section at subsequent spring events. With time in hand, he could afford to take things easily across country, and aithough lucky to escape a fall when he caught a leg momentarily in the "V" at fence eight, he incurred only 11 time faults and won.
Richard Lord, who is still in
the young rider category, did the
third-best dressage and went into

Nils Haagensen, Denmark's second place with a fractionally second place with a fractionally better time than Lucinda Prior-Palmer, who was giving her New Zealand horse Mairangi Bay his first pre-Badminton outing.

Judy Bradwell had the best intermediate score to win a section with Derby House, and another winner was Lucinda Moir, on the former hurdler Queen Hill, MIDLAND BANK OBEN/MYER-MEDIATE: Section D: 1. N. Pabberson's Monaco, (31 penality points, 2. Miss R. Lord's Millon Bella (46. 5. Section D: 1. Miss J. Cooper's Brit (16): 2. Miss K Meacham's St George (18). Miss K Meacham's St George (18). Stenmark not a 'billboard'

he sald.

Stockholm, March 23.—Ingemar
Stemmark, of Sweden, has decided to turn semi-professional,
Bjoern Wagnsson his lawyer and have not yet started negotiations, agent said at the weekend. Sten-mark, who won both slalom events in this year's Winter Olympics and dominates the World Cup slalom circuit, will continue to compete in world cup events on a "B" licence, his lawyer said.

licence, his lawyer said.

This licence, granted him yesterday by the Swedish sid federation, allows him to sign personal contracts to advertise products rather than drawing a share of a pool of sponsors' money. His new status may make it impossible for Stenmark to participate in any more Olympics, although these rules will be reviewed over the next four years, Mr Wagnsson said.

rivals behind

Stenmark, who recently turned 24, has won two Olympic golds, two world championship golds and three World Cup titles. Mr Wagnsson said Stemmark planned to continue skiing in World Cup events for at least two years and had no present interest in joining the American professional circuit.—Reuter. Neuper leaves

Planica, Yugoslavia, March 23.—
Hubert Neuper, of Austria, became the winner of this season's World Cup ski competition after leaving his nearest rivals well behind in the event here today. Neuper made the longest jump of 140 metres and, with the other one of 118 metres, totalled 284.4 points to win the event.

His compatriots, Armin Kogler, placed second in the overall stand-His compatriots, Armin Rogler, placed second in the overall standings, and Hans Millonig, the winner of the event yesterday, were placed second and third respectively. With leaps of 115 and 118 metres, Rogler made 261.4 points and Millonig totalled 259.6 with leaps of 121 and 110 metres.

Austrians finish first and second

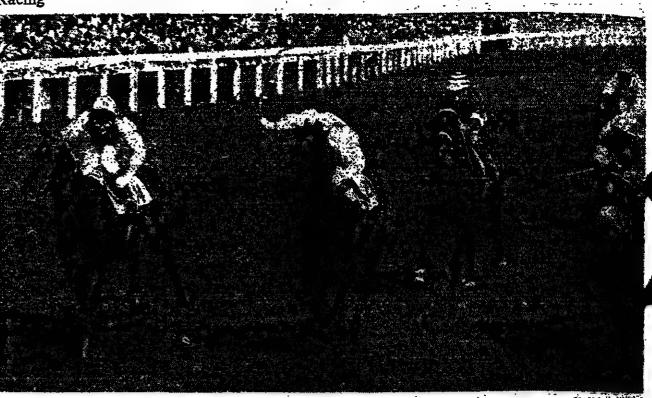

Zwiesel, West Germany, March 22.—Rudolf Huber and Christian Orlainsky, of Austria, captured first and second places in a men's European Cup giant slatom race here today. Czechoslovakia's Bohumir Zeman finished third, half a second behind the winner. Bohumir Zeman finished mire, half a second behind the winner. Huber clocked Zmin 09.24sec, and Orlainsky was timed at 2:09.56. Zeman registered 2:09.64. Italy's Siegfried Kerschbaumer retained the overall lead in the European Cup standings, and another Italian, Tiziano Bieller, who finished fourth today, headed the giant slalom classification.

By Michael Seely Great events will soon be sweeping us along and the runring of the Lincoln Handicap will be but a distant memory. Next weekend sees the staging of that fantastic spectacle, the Grand National and also the Guineas Trials at Salisbury. In Ireland the following Saturday Monteverdi, the spearhead of Vincent spearhead O'Brien's powerful team may be showing his paces in the McCairns

Trial Stakes at Phoenix Park, If the 2,000 Guineas favourite is kept in reserve for the Gladness Stakes at the Current on April 12. last October's impressive Houghton Stakes winner, Night Alert, will do duty for the stable in the Dublin race. The Craven meeting is only

three weeks away. And soon the names of the classic trainers will be uppermost in our thoughts. So now is the time to pay tribute to the patience, skill and forethought of Bill Wightman. To prepare a horse to win the first oig handicap of the season, parti-Cularly when that horse is the only animal in your yard quali-fied to run in the race, takes just as much planning and ingenuity as does the training of a Derby winner. The coup was engineered back in October and when Geoff Baxter drove King's Ride through a narrow gap between Blue Bridge and Be Better in the dying seconds of the race, Wightman was a proud and happy man. I had made the fatal mistake of asking the trainer about his chances only the day beforehand. That is when a man's innermost

That is when a man's innermost fears are to the forefront. "I fancy him a lot", the Wizard of Upham said "but basically King's Doncaster results

racing's outstanding characters got into his car and drove home to the Hampshire Downs. character

including the Hungerford Stakes at Newbury in 1975. And Wightman is also hopeful of placing King's Ride to win a pattern race. The perfectionist was nearly right. Three furlongs from home Baxter and King's Ride were travelling smoothly on the rails, handily-placed just behind the leaders. Then in a trice the picture thanged as the specialist milers. King's Ride to win a pattern race.

After Air Trooper had won a maiden race at Nottingham in 1976 Wightman told me "I'm going to win a group race with this oue." His bold words just falled to come true the following season when Air Trooper was beated a head by Trusted in the group two Queen Elizabeth II Stakes at Ascot. But the four-year-old's five victories that year had included a triumph in York's Magnet Cup under 9st 6ib. So, when Wightman says: "I'm more confident of winning a pattern race with King's Ride than I was with Air Trooper" you have got leaders. Inch in a trice the picture changed as the specialist milers, Be Better and Blue Bridge, kicked for home. King's Ride became outpaced and it was only in the last hundred yards as the two in front tired in the dead ground that the winner's stamina looked for the first time likely to gain the day. To win the Lincoln a horse's preparation has got to be started early. Even so it was surprising to hear that King's Ride had not missed a day's work since before Christmas. "I've had the horse on the move all winter", Wightman said. "It's no good starting in February. You are bound to get snopped by hard weather or with Air Trooper" you have got to take notice. on the move all winter", wight-man said. "It's no good starting in February. You are bound to get stopped by hard weather or water logged ground." And look-ing at the horses in the parade Now sixty-five years old, Wight-man is the longest-serving trainer in the country, having first taken out a licence in 1937. And Satur-day's win more than compensated the trainer for the fats of Queen-

ring you could see what the trainer meant. Besides the first three home, Black Minstrel, Bertle Me Boy and Smartset all looked dom. Summersway, and Flying Nelly, who fixished runners up in three successive Lincolns. trained to the minute. Most of the others, including my selection, Inside Quarter, all appeared as though one more race was needed to bring them to their peak. Well-versed in country lore, Bill Wightman is a farmer, naturalist and a keen shot. And he is just as patient in his bandling of gundogs as he is ju his training of his horses. "A pair Wightman leaves nothing to chance. It needed some pretty vigorous riding by Baxter to get the bast out of King's Ride. "He wouldn't win an argument without the whip, And I had Baxter down to Upham to ride the horse this of partridges settled in my garden the morning I came away. I'm sure they are going to stay and nest there. But I'm keen to get home and see if I'm right", he said. And so having realized a cheriahed ambidion one of in a gallop just to impress this fact upon him." And it was the two hefty cracks that Baxter gave King's Ride inside the two furiong

colt to run. King's Ride is the late-maturing type of animal that Wightman loves to handle. A 22,000 grineas

marker that finally persuaded the

THE BIGSTEFP EAST.

As Marco Polo discovered some years ago, the hardest part about doing business in the East is getting there.

It doesn't take so long these days, but 20 hours in an aeroplane can still be a harrowing experience.

From April 2 however, you can go East without, as it were, going West in the process.

Because that's when we begin our new twice-weekly 747 service between London Gatwick and the Philippines.

Now you may have learnt to treat the joys of flight with a certain cynicism.

But our claims to a unique service are fully justified.

We are the only airline to offer First Class passengers comfortable beds that are officially certified for occupancy during take-off and landing.

This means you don't have to get up in Bahrain in the middle of the night just because we're landing for fuel or

at Bangkok if you are not alighting there.

You take off at 2.40, just in time for a cocktail and lunch. Spend the afternoon working or reading. Break for dinner from 6 to 7.30. Watch a movie and then retire to bed, waking up eight hours later refreshed and ready for action.

Our food too, will be a revelation to those who have

sampled their share of airline fare.

We serve 'La Nouvelle Cuisine' in all classes and it has been judged by Plaisir Gastronome, the Swiss gourmet society, to be the finest airline food in the world.

And when you arrive in Manila our extensive network can whisk you direct to all the great commercial centres of the East and Australasia.

From April 2, there's only one way to go East. Catch the Big Sleep.

It could change all your ideas about air travel.

Twice a week to Manila. And all points East.

Geraldine Norman on the controversial first catalogue of a great English painter's works

The courage an expert needs to name the real Constables

John Constable is one of the most English of English painters, and one of the createst. While his work has been avidly studied and written about by art scholars in the 143 years since his death, it was only last year that the first complete ocutre catalogue was

This glaring omission was made good by a Belgian art historian, Robert Hoozee, of the Ghent Museum of Fine Arts his book has been commissioned by the Italian publishers Rizzoli and is in Italian, titled L'opera completa di Constable. Hoozee, who is 31, has been working on Constable since 1969; his doctoral thesis on Constable, which was presented in 1973, won an award from the Belgian Royal Academy of Science, Literature and Fine Art and is to be pubished by them, Continental Britain to the post.

An occure catalogue is a caunting undertaking at the hest of times: the author must track down and assess every known painting attributed to the artist. In the case of John Constable it is a nightmare— inence, presumably, the lack of a catalogue up to now. (Another definitive catalogue by Charles Rhyn and Graham Reynolds is cupected from Yale in a year

Not only has Constable been more extensively raked than almost any other artist, but he had several friends and assistants whose work is easily muddled with his—Dunthorne Senior and Junior, Fros George Harrison, for instanceand at least five of his seven children also drew and painted. Two in particular of the chil-dren, Lionel and Alfred, are I nown to have painted and ex landscapes close to their father in style.

With an euro catalogue you cannot dodge the problems: covery painting must be considered and slotted in. Mr Hoozee has settled for four categories : genuine works by John Constable, works attributable to the children, other works whose auribution to Constable he doubts and works previously attributed to Con-

Even so, the categories have proved too limiting a strait-tacket. There are works that appear in the genuine section with a question mark to indi-cate that he is not quite certain they should be there, and others to which long footnotes are appended indicating that they might well belong elsewhere. Mr Hoozee has told me with

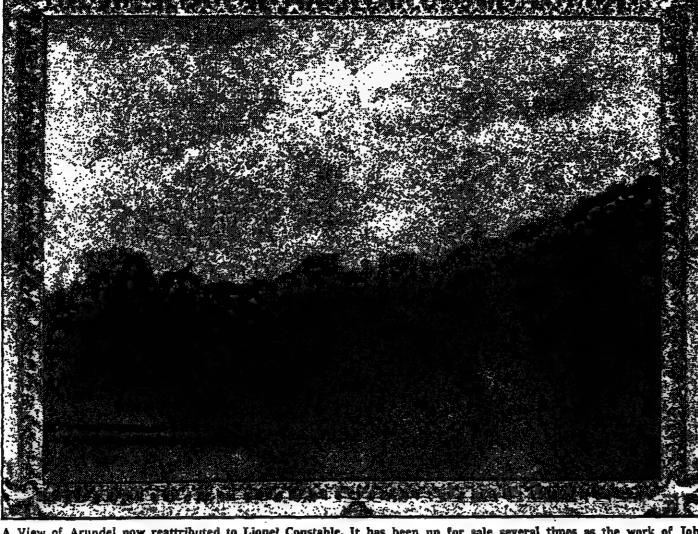

a hint of desperation in his I could have done with 12 or 14 categories." He is also uncomfortably aware of how during he has been in tejecting the attributions— John Constable of paintings in fimous museums and collec-tions—for which he can expect to suffer the ire of curators. his courses failed him: he left

During a Commons debete on child benefits last Tuesday I listened to a speech by a Tory MP which could easily have heen made from the Opposition benches. Some Tory MPs ob-viously believed what their elecand at the end of the debate a while others abstained.

It is rare for new MPs-and most of the "wets" or pinkos" as they are called by the Tory hardliners are new-Parliament. Yet they have, and by doing so have spotlighted the mess the Government is in.

This is revealed by little obvious mistakes such as the bad drafting of the Government's on the Olympic Games, rather than by the bigger issues which underline it. For example, inflation running at 19.1 per cent, unemployment high and ever rising the balance of payments in the red and the forecasts that things will get worse; Mrs Thatcher saying as much in the Tory political broadcast on the eve of the Southend by-election.

Backbench Tory MPs, left and right, are becoming increas-

A View of Arundel now reattributed to Lionel Constable. It has been up for sale several times as the work of John Constable, selling for £1,200 in 1968, £600 in 1971 and £600 again in 1976.

one of the treasured possessions of the National Gallery in Washington, bitherto considered a full scale oil study for The White Horse, he dismisses as "most probably an imitation"; though other Constable scholars agree with him, he is the first who has dared to her it in artist to put it in print.
Mr Hoozee has even ques-

tioned the attribution of paintings included in the vast gift of her father's work made by Isobel Constable to the Victoria and Albert Museum. These works have generally been considered unshakably by John Constable: his daughter could not have got it wrong. But families do set muddled, and she was very old when the gift was

Plants growing by a wall in the Victoria and Albert has been placed in the complete reject section—not even among the doubtfuls. "That was very brave", another Constable scholar commented to me, "but I'm sure he's right". The little oil is inscribed on the back "Minna Ju 27th 47", and Mr Hoozee suggests that it may be by Constable's daughter Minna — mainted in "Yu" 1847 per-

fact that many of Lionel's and Akred's paintings have been masquerading under attributions to their father was first revealed in print by the Constable scholers Mr Leslie Parris and Mr Ian Fleming-Villiams in September 1978. Mr Hoozee's book had already gone to press appeared in the Burlington Magazine but he had discussed

the matetr with them.

His book follows in the main their attributions to the children, but includes many more paintings than were mentioned in the 1978 article—some were left out because they belonged private owners, others because the attribution was still

tentative. The section entitled I figli di Constable (Constable's children) includes 37 landscape sketches, all of which Mr Hoozee contends bave stylistic similarities with known works by Lionel Con-stable. The fact that the "children's" section contains "children's" section contains only works attributed with greater or lesser certainty to Lionel underlines the inadequate present state of know-ledge of the children's work.

them in the genuine section thaps.

The property of the suspicion that some day the suspicion that suspicion that some day the suspicion that suspicion the suspicion that

instead. "We know he was a very good draughtsman," he comments. But the only two paintings which can be attribu-ted with certainty to Alfred give little indication of his individual style.

In a last moment amendment to his text (following the Burlington Magazine article), Mr Hoozee adds a third attriof St Mary, last seem in a Paris auction in 1949; he had previously put it in his reject section, but now saves it with

buted to Lionel, nine were attributed on the basis of fairly conclusive evidence by Mr Parris and Mr Fleming-Williams; the others have been added on stylistic grounds. The original authors agree in the main; they are unconvinced by four or live; the three land-scapes now on anonymous loan to Birmingham City Gallery, for instance, a Bridge still in the Constable family collection and a sketch of an old mill,

Confirmation has turned up in the family records for the attribution of one particular least four versions are known, this adds up to four pictures. It is called merely Extensive landscape and is a low rolling view with a vast expense of

ent sky in each version. He must have loved this particular vantage point. All the versions are in private hands; one was sold at Sotherby's in July 1976 for f3,000 and another in April

The whole group of tree studies are taken from John and given to Lionel, including a wooded landscape which is on loan to the Kunstmuseum in Basic from Paul Steiner, and a Tree study in the Yale Centre for British Art.

The flat, unarriculated treatment of trees is taken to be a characteristic of Lionel. It is found again in Trees and Stormclouds at Yale, Landscape with a wooded valley in the Guildhall Art Gallery, London, and Hampstead with Harrow in the Distance in the Ashmolean. Oxford. The pinkish-mauve times, to be found in the sky of the latter painting are also considered a Lionel ballmark. Mr Leslie Parris, who is deputy keeper of the British collection at the Tate, is still in two minds about the attribution to Lionel of the two Tate pictures Leathes Water and to Lionel. And since at Dedham Vale. He agrees in doubting that either is by John and thinks that there is a better

case for giving Leathes Water to Liquel than the other.

the context of other Lake District oil sketches, he says; Mr Hoozee has placed another three Lake District views in the genuine section, but each with a question mark beside it. We know the speed at which Constable travelled-on footaround the Lake District making drawings and watercolours", comments Mr Parris. "There is no proof that he made any oil landscape sketches at the time—he would have had to carry them with the paint still wet. But then we don't know if Lionel ever visited the Lake District

where Mr Hoozee suggests the ossibility of an auribution to group of 25 small sky studies could be the work of one or other, voicing the view that they of these were in the Newson-Smith sale at Christie's in 1951; quired a large number, now Yale, the Fitzwilliam Cam-Manchester has recently acquired one — Agnew's paid

The Newson-Smith collection of Constables was bought through Leggatt's in the 1890s from Ella Mackinson, John Constable's granddaughter, It is thus fairly certain that the cloud studies came from the Constable family. In a long footnote to the one such study that Mr Hoozee has included in his "genuine" section, he suggests that the Newson-Smith collecrion contained around spurious cloud studies.

He points out that the documentary references in Constable's correspondence and his friend Charles Leslie's writings all connect up with largish, fairly finished cloud studies; most of them have inscriptions on the back in Constable's hand. He suggests that none of the small skerchy studies is by John Constable. He notes that a small cloud study included in Isobel Constable's gift to the Victoria and Albert Museum would have to be rejected as well in this

Where paintings that dellnitely belonged to the family are doubted, the sons are are doubted, the some clearly good contenders authorship-though it is always possible that works by friends or assistants crept into the family possession as well

Alfred's letters speak of him at work on "clouding" and in one he exhorts his brother Lionel: "... if you see a piece of fine sky take the shape of the clouds and remember the colours." Or again: " Dear Lar I must tell you that the pencilling of the mill you sent me is very beautiful you seem to have quite the power of the pencil the sky is so beautiful how well it will paint do make a sketch of it a grand sky will greatly help you. Alfred apparently had no taste for punctuation.

Peter Mayer: a reputation for dynamism.

Willing to take a gamble at Penguin

To introduce change to a firm marketed." To Ulinstrumbich is as much of a British he told me that believe institution as Penguin Books is institution as Penguin Books is not easy at the best of times. It is devilishly difficult when sales and profits are being hit—as throughout British publishing—by the strength of the pound combined with stiffening American competition; by curs in public spending in the library and educational sectors; and, as in all forms of business, by inflation and crippling interest rates.

"One would rather have

"One would rather have come at a more propitious time", comments Mr Peter Mayer, who took over as Penguin's chief executive on November 1, 1978, after a long period of disputes in the firm's higher ways. Perhaps is did higher rungs. Perhaps it did not help either that Mr Mayer was youngish (now 43), American, and had a reputation for dynamism, attributes not uni-versally admired in Britain, "But one is here", he adds, and one is going to prevail".
He is a tallish, rather goodlooking New Yorker of German and Luxembourg origins, with that openness found in so many Americans. One of his chief difficulties at Penguin is that his longer term reforms require time before they can show results. Meanwhile, he and his colleagues have, like a number of other publishers, had to take

act the worsening economic climate.
These include the propose shedding of 38 staff, and a 22 per cent reduction in new sales, and those unlikely to meri: re-printing. Those cuts are being strongly contested by the staff, who accuse Mr Mayer inter alia of naiveté in Hot having foreseen high interest sates, and of going too far "down market" in his search

short term measures to counter-

for sales. But nobody denies that Penguin was in trouble before Mc Mayer was hired. Looking at the books, so to speak, he found several underlying sources of

Penguin still had 25 per cent ket, and some 4,000 titles in print, more than double its nearest paperbuck competitor. Analysis of past sales showed that in Penguin's post-war hey-day, around 75 per cent of pub-lished titles justified reprinting and became part of the backlist. This proportion had gradually fallen to 33 per cent.
Since backlists are eroded, by changes in teste and so on, unless replenished, that was an

starming trend. A prime aim must therefore be to reduce the proportion of titles that failed to make the backlist. A complicating factor here was the vastly increased cost of buying paperback rights. Even while I was talking to

Mr Mover, a senior editorial colleague, Mr Peter Carson, came in to report on a bid to secure the paperback rights of Sir Laurence Olivier's Eurobio-graphy, being written with Mark Amory, Mr Carson said he bad told Olivier's bardback publishers. Weidenfeld and Nicolson, that £40,000 would be their best offer. Since the response bad been "How embarrassing", it had clearly been marched by another firm.
"Play around with other parts of the contract", Mr Mayer urged, deciding that £40,000 must remain the ceiling. In the event the rights went to Coronet Books, part of Rodder & Stoughton, for slightly more. Mr Mayer also came to feel that Penguin was in some ways a sleeping giant, or "under

The four choices facing the Tories

few of them voted with Labour, ingly restless. After the debate on the Olympics a number of them, including Mr Edward Heath, abstained on the Tory motion and some exceedingly harsh things were said about the Government, especially by hardliners.

> The Rhodesian settlement can be chalked up as a relative success, but on that the rightwingers consider that they have been betrayed. The EEC summit presents the next hurdle for the Government, and if a real reduction in the amount Britain pays into the EEC Budger is not secured, and if the Common Agricultural Policy is not radically reformed, then the internal party pressures on the Government will grow.

Whatever the Budget contains on Wednesday, the Government is not going to satisfy many of its backbenchers. The of its backbenchers. The point of the same. "Wets and Pinkos" will react done all the same.

made in public expenditure, four choices. They can soldier especially if affecting social on with the present Thatcherite security benefits, while the hard-line right will complain if the cuts are not severe enough. right, or they can force the Either way, there is bound to

Despite the rumblings in the ranks, Mrs Thatcher is still in control of the Government, but that is not necessarily going to be so in the future. The than Labour when dealing with leaders and individuals. In the Tory Party, if you don't win, you go, and as Mrs Thatcher's policies increasingly run into policies increasingly run into trouble, and the party faithful The Government sum trouble, and the party faithful begin to switch allegiance as serious battles to face. Up to now, there have only been now, there have only been will go into action and the deed will be done, no doubt in a polite and civilized way, but

on with the present Thatcherite policies and hope against hope that things will turn out all Government to carry out some major U-turns, as Mr Heath did after 18 months in office.

They could panic and go early to the country, or they could force Mrs Thatcher to resign and elect or find a new leader. This last suggestion may appear fanciful and at the moment it can rightly be argued that it is premature, yet it may come to that sooner

preliminary skirmishes with the unions, but it is clear that Mrs Thatcher is preparing for a deeper and more serious confrontation. The proposal which

may well be included in the Budget that in future strikers will have been "deemed" to be getting money from the unions, even if they are not, and that the amount "deemed" will be deducted from social security benefit for the striker's wife and children, is not merely mean, it is downright vicious.

As Mr Prior, the "wet hawk", suggested at a recent House of Commons Press Gallery lunch, there is more than one way of killing a cat. Perhaps the Government

hopes that in a climate of rising unemployment, lay-offs and factory closures, the unions will back off from a fight. Certainly, unemployment is a real weakener, but that in itself will not stop the workers from fight-ing back. At the moment, their response may appear ragged and their support for their leaders only half-hearted and

coalfield recently, but as the harshness of Government policies gers across to them their response will grow and real anger will develop. At that point, it will be difficult, if not impossible for the leaders to hold back the rank and file. I do not think that Mrs Thatcher really understands the

tepid, as in the South Wales

resentment that is building up among trade unionists, a resent-ment which will turn to hotred if the Employment Bill becomes law and if the social security benefits are frozen at their present levels, and especially if strikers' families are deprived of financial aid.
The subservient British worker is a thing of the past.

Over the years he has gained self-confidence, and this will show itself increasingly in varying forms of political action.
It will be fascinating to observe the struggle in the Tory Party as it unfolds in the months to come. One can only hope that the British people do not suffer too much while the hawks" continue to control the destiny of the nation. Times Newspapers, 1700.

Liverpool, Walton. DIARY OF A NASTY ACCIDENT

One of the T-sbirts in Joyce Yinger's garden supply and couvenir shop near Middleton. Pennsylvania, bears the slogan: Squeeze me, I radiate. Kiss me. I melt down." Another declares: * Happiness is a cool reactor.

You will have guessed that the shop is not far—only a few hundred yards—from the nuclear power station at Three Mile Island, which has been out of action since a terrifying accident a year ago. During those 11 tense days it may have come perilously close-just how close remains uncertain-to melting its fuel core and spreading poisonous radiation across the

surrounding countryside. Mrs Yinger began selling souvenirs of the near-disaster in June to visitors who flocked to stare at the crippled power station, their bizarre pilgrimage inspired by the puzzling principle that anything famous must for that very reason be interest-

ing.
It is clearly a lucrative business. Even the gift shop at Harrisburg airport nearby has a line of money boxes labelled "canned radiation", as well as note pads and calendars adorned with pictures of the notorious cooling towers.

The humour in most of these offerings borders on the

desperate, a kind of subsumed hysteria which reveals some thing about the mood of the surrounding communities in the wake of the accident. There is tension, edginess, a brittle calm chich barely cloaks nervousness about hazards yet to come as efforts continue to clear the nower station of radioactive substances. For a year, people have scarcely talked about anything

"The accident at Three Mile Island did not end with cold shutdown, nor will it end for some time", said the presiden-rial commission which investi-gated it. It would continue they maintained, until the clean-up was completed.

The residents, even if they wanted to forget it are not being allowed to. Hordes of official and unofficial visitors still pour into the area to investigate, report or simply

The first anniversary of the accident, which will be celebrated by an anti-nuclear demonstration on Thursday, has brought scores of reporters gathering material for articles such as the one you are now reading. Two men from the Minneapolis Star were in Mrs Yinger's shop when I arrived. Her visitors' book revealed

traces of reporters from Time and People magazines, the London Daily Mirror and others.

Nearly 50,000 people attended the plant's visitors' centre, just up the road from her shop, in the last six months of 1979 compared with about 10,000 in the whole year before the accident. Some combined it with a visit to Hershey, a chocolate factory miles away, making a nicely rounded day's outing for the

On fine days, tourists can eat from red picnic tables thoughtfully provided by the power company, staring as they do so at the cooling towers and reactor casing across the thin stretch of the Susquehanna river: a good background for family snapshots.

Inside the visitors' centre, a accident happened. If there was a single cause it was a valve which stuck in the open posi-tion after opening to relieve pressure on the nuclear

reactor's cooling system. Operators in the control room did not know the valve was stuck and that cooling water

was therefore escaping. When

emergency pumps automatically

switched themselves on to pro-

operators switched them off.

The reactor overheated and strates. The Middletown Press vide more cooling water, the core hecame damaged. Radioactive water from the open valve flooded the basement of the building housing the reactor and the auxiliary building next door.

After nearly two hours, some-body noticed the stuck valve and closed it. Had it stayed open for another 30 or 60 minutes, according to the Nuclear Regulatory Commis-sion's report the core would sion's report, the core would have melted, releasing huge quantities of radioactivity.

The polluted debris of the accident remains trapped in the power station. Just how it should be disposed of is the subject of a fierce local debate. The power company, Metropolitan Edison, want to release

44.000 curies of krypton gas 20-minute film explains how the into the atmosphere over a period of 60 days and are awaiting approval from the NRC. They claim that the most radiation anybody could pick up from it would be one tenth of a millirem. People pick up about 100 millrems of radiation a year from natural sources such as sunshine and 36 millirems from one chest X-ray.

All the came the proposal has provoked incase in Middletown

sion of dictatorship, aggression and human arrocities", read one. "The corporate officials of Three Mile Island are dictating the venting of voluminous radioactive poisonous gases over a period of 60 days or more which is against the thinking and will of the vast majority people in this area." Resident are particularly wor-

ried about the effect on young children. This month, when a small quantity of the gas was released, one school would not let pupils go outdoors to play. Last week, at a meeting with NRC officials, residents protes-ted angrily at the plan for the new gas releases. your guts", one woman shouted at a biologist.

Another said: "Take the message home to Washington there shall be no peace in Middletown". And another: "We will never forgive or forget what you have put us through. You are no more worthy than a hunk of cow manure". A letter in the Harrishurg Evening News put it in a more

"The NRC

measured way:

up the krypton gas by one of the several safe but more ex-pensive methods. The health and safery of our children ought to be placed ahead of Met Ed's Mr David Klucsik, a public

information officer for Metro-politan Edison, maintains that this is the safest way of re-leasing the gas, which must be done before the rest of the clean-up can begin. Any alternative method would involve transferring it to a separate container, which would beg the question of ultimate disposal and could be risky, because un-

Until the Krypton is re-moved, Mr klucsik said, no maintenance can be carried out on the ventilation system which keeps conditions stable inside the damaged containment building. It has already run for a year without maintenance longer than it is designed forand if it were to fail then a fresh eccident could ensue. Some of the residents I spoke

others shared the unease. When that question is settled, there comes the potentially more diffictult one of disposing of the contominated cooling water. Only then can engineers look at the core irself to see how should force Met Ed to clean hadly damaged it is.

Few of the people I inter- a mile from the pow viewed were happy about the prospect of the plant resuming nuclear operations. Some hope it will be changed to be fuelled by coal, a proposal which the company is investigating.

Some doubt that it will re-

open in any form. Last week Dr Robert Parente, an engineering consultant, told the Pennsylvania Publicity Utility Commission that because of the high cost of the clean-up and repairs the most likely out-come is for it never to be returned to service

One effect of the accident has been to harm the nuclear power industry. No new orders for nuclear power stations have been placed in the past year and the NRC is being cautious about granting operating licences for those nearing completion.

Locally, the impact has been psychological rather than practical, Mr Paul Thompson, an estate agent, told me that property prices had not dropped as many feared they would, and that any difficulty in disposing of houses was due to the nationwide effect of high interest rates rather than to uncertainty about moving into

JDGETING FOR DECLINE

postantial part of the public differently from other social diture cuts to be announced week as part of the Budget egy will come from econoin social security payments. has been widely forecast and n effect confirmed by the tary of State for Social ces. Mr Patrick Jenkin, in peech to the Conservative al Council on Saturday. In robability it will be this int in the Budget package - ' vill arouse the most controculation has fastened upon

principal possibilities: that benefit will not be uprated taxpayers with and without e full amount necessary to children. ensate for inflation; that term social security paywill not be adjusted in line prices; and that steps will ken to scrap the earningsd supplement to unemploybenefit. All of these possiis raise important issues, would be a mistake to treat all alike-supporting or ing the lot on the grounds of economy or compassion. ld benefits in particular are n on their own. They were luced in 1977 to replace family allowances and child llowances, which were finliminated in April last year. are not means-tested and family policy. are paid to families where readwinner is in work. It. combination of factors that them in a special category. gard them as just another benefit is wholly mistaken. e first place, they are the safeguard against the

ty map; the more their is maintained in real terms nore worthwhile it will be .e low-income earner to take rather than to rely upon ployment benefit. Because benefits are not means-I they do not deter the dual from earning more for If and they can be raised ut any disincentive effect. perhaps the strongest reaor treating child benefits

benefits is that they have taken the place of the old child tax allowances, which were designed not as a social service but to provide equity at any income level for families as compared with the childless taxpayer. These allowances were of particular advantage for those with middle and upper incomes. If the value of child benefits is allowed to dwindle away in real terms they will not be an adequate substitute for the old allowances, which will mean that a new inequity will arise at all income levels between

This is not an argument for keeping child benefits in line with the movement of prices under all circumstances. The capacity to do that must depend upon economic conditions. But it follows that child benefits should he treated on the same basis as the remaining tax allowances: and if they are not all uprated to the same extent, which may well be the case, then child benefits should be put in whatever is the ton category. No tax allowance should have a greater claim on a Government that is supposed to be giving priority to its

There can be no logical case for putting other social henefits on the same footing as tax allowances. The case for them is that it is the mark of a civilized society to do the best it can for those members who are in particular need, from whatever cause. If the state of the economy permits it, there is no reason why these benefits should not be uprated by more than the increase in prices—as indeed was the custom for quite a number of years. When a society is prospering it is right that the unfortunate should have a share in the greater prosperity. But when prosperity is declining it is unrealistic to insist that only those receiving social benefits

should, he sure of maintaining their living standards.

It will not be upreasonable. therefore, if the Government decide to uprate some benefits by less than the increase in prices. The distinction they clearly intend to draw is between short-term and other benefits. This is justifiable on social considerations as well as on grounds of political expediency, Economies have got to be found from somewhere and it is better that they should be sought from those in a category of temporary need-while appreciating that many of the individuals receiving what is supposed to be shortterm assistance today will be getting another form of benefit

The same reasoning might be thought to justify getting rid of the earnings-related supplement which is added for up to six months to the flat-rate unemployment benefit. But that is not so. It would justify a decision not to uprate this supplement in line with inflation. But it would be a mistake to change the long-term structure of a scheme in order to meet an immediate economic necessity. The question is whether this is the right longterm structure. There were two arguments for introducing this earnings-related supplement. One was a consideration of social equity: that it was undesirable for a person to suffer a catastrophic drop in income the moment he lost his job-carastrophic because of the commitments he would have undertaken. The second reason was to reduce the fear of a short spell out of work, and thereby encourage the mobility of labour. These two considerations still apply. The right principle for the Government to follow at this stage is to get the economies they need by refusing to uprate short-term benefits by as much as they would otherwise have done, not by indulging in a bit of structural

XICO TAKES THE SLOW ROAD to has just taken two deci-

which show that it remains o its tradition of going its ray in the world, regardless esures from outside. It has ed not to join the General ment on Tariffs and Trade i, in spite of having nego-. favourable terms for doing nd it has decided to make small, 10 per cent increase ou produccion icans, in particular, wanted make a much larger one. .ew policies were announced way that was calculated to t as much attention as posin a speech by President Lopez Portillo during celeins of the anniversary of the nalization of the foreign oil anies in 1938. Together a third announcement, of a production programme ned to make Mexico selftient in most basic foodi, they constitute the govern-'s answer to the question

best to use the country's ound oil wealth. is essentially a cautious er. Mexico is anxious to use il income to develop its

industry, and the idea of joining the Gatt was that it would make industry more efficient by requiring the gradual removal of the protection which has long shielded it, as well as opening up export opportunities. Most of the larger Latin American the larger Latin American countries, such as Brazil, Argentina, Chile and Peru, already belong, as do developing counterms of entry were published and a public debate was held. there was such an outcry that the President decided not to pursue it further. The main reason he gave was that Gatt membership would cause difficulties for the industrialization programme. But another factor was clearly the fear that though it would have helped big companies, including international ones, it would have threatened the medium-sized and

The Americans wanted an increase in Mexican oil production because they see Mexico as a secure source of supply. They already take the greater part of Mexican exports. But the Mexicans now feel better

equipped than ever before to stand up to pressures from their large neighbour; and they have decided that a big increase in production would simply cause them difficulties because, not being able to absorb the added revenue, they would suffer from inflation and an overvalued peso.

The basic Mexican need is not just economic development, but development which will belo the milions of Mexicans who live in conditions of extreme poverty. The discovery of vast oil reserves provides an opportunity to do something about this situation; if industrialization and food production can be effectively stimulated. Other countries—such as Venezuela with its much smaller population-have found that it is not easy, and the Mexicans hope to avoid their mistakes by being less ambitious. So it is under standable that they have decided to hold back oil production, as indeed some of the Gulf states are doing. But the decision to remain outside the Gatt, and the missed opportunity to modernize Mexican industry, could hold back development.

irs Thatcher 'Iron Lady' the EEC

enter today an ominous poliweek. On Wednesday the cellor of the Exchequer will in a severe anti-inflationary et that will reduce the state's as Everyman's almoner and by touch all our lives.

Wednesday, Thursday, and bly Friday, the EEC Council gricultural Ministers will meet ussels to decide by how much prices for products in costly us should be raised in 1980-81 thieve higher surpluses. Today Mrs Thatcher will join the s heads of government at a nunity summit in Brussels will bluntly refuse to he United Kingdom continue e the almoner to western pe while the British people to be put on short commons

today in Strasbourg the pean parliament opens a threesession on EEC faim prices in a nued though apparently flagartempt to contain agriculspending and make more budy room to spend on urban munity policies.

re we have a political imbroglio the wisdom of Solomon could re expected to resolve in a day wo. Mrs Thatcher cannot senuse the domestic Budget at 2 to bring in public spending to curb a donestic inflationary s and then rush off to the sels summit to accept that the ed Kingdom should continue ing out money as principal neier to the Eight. It is estied that in 1980-81 the United idom will succeed West Gery as the largest contributor to

Community revenue, although it has the third weakest economy. Mrs Thatcher herself has ensured

that politically there is no escape route for the Government if the summit meeting fails to produce the full loaf of Community receipts to belance Community payments during the budget year 1980-81. There will be a domestic political collision or a Community collision either or both head on. She raised the question first at the Strasbourg summit last June. She aggressively summit last june. She aggressively built up the united case for the Dublin summit last November and resorted to diplomacy only when she failed to get her way. Now, she has abandoned diplomacy again for relevision and has returned to aggression for the Brussels summit.
The United Kingdom, she threateningly says, cannot be expelled from the Community, so it will consider withholding payments or bloody minded blocking tactics until jus-tice is done. And Brussels now promises now more than Dublin

Probably to the benefit of domestic political realism, Mrs Tharcher as Prime Minister has done more to kill off the European idea and the European ideal in Britain than all the anti-Community forces rolled into one. She pays lip service to Europeanism because as the leader of the party that took the United Kingdom in she cannot do otherwise without bathos. But, in essence, she must be saying that an industrial country like the United Kingdom, with its history of chesp food imports and relatively high-priced manufactured exports, cannot fit in to the Community regime that it spent 12 years rying to join. Like Harold Wilson and his men, she demands re-negotiated terms of

membership. .Who need question that electors, including deeply committed Euro-pearings of yesteryear, side with her? Her and Community stand has made hers the Gaullist voice of the national interest against the outside world; almost the voice of outside worm; annost the voice of every true patriot. It is almost becoming part and parcel of her anto-Sovietism, which won her the title of the "Iron Lady". Mrs Thanher is profoundly English, and the will never stop seeing the Com-

munity and the world in English

terms. In that she will exactly reflect the broad all-party feeling in the country she now leads.

the question must be asked whether by carrying her argument to a political and diplomatic extreme, with resort to ultimatum, threat, and impossible deadlines, she does not risk throwing away one of the great boons a United Kingdom government now possesses. There is a deep-seated thange taking place in Community attitudes towards the Common Agricultura Policy's domination of the budget The Commission is broadly on Mrs Fhatcher's side. The directly elec-red parliament, which rejected the Council of Ministers' 1980 budget, broadly on her side. Spokesmen for European industrial workers and consumers increasingly move to her

Nobody has made that clearer than Mr Christopher Tugendhat, budget Commissioner, in a Hamburg speech earlier this month. Mr Tugendhat privately considers it the best speech he has made, and he is right. Assuredly he showed the way to the budgetary revolution, or evolution; that is now in prospect. and himself proposed that cash limits over Cap spending should be established by at last rationally synchronizing the Community budet with farm price decisions of the

Council of Agricultural Ministers. Yet fundamental change must take more time than Mrs Thatcher has ever suggested she will allow. Take one example. Last December the European varliament was almost united in throwing out the 1980 budget in the hope of containing farm subsidies and finding scope for expenditure on (say) social and regional policies. This week in Strasbourg two main committees (agriculture and budget) are going to be split about increases in spend ing; and Mrs Thatcher carries much responsibility for throwing the European farming lobby onto the

defensive. Mrs Thatcher has an unanswerable case, even in the terms of the EEC's own rather metaphysical theory of economic convergence Nevertheless, to demand the whole loaf for delivery at the door tomorrow will be to invite rebuff and frihten off friends in need who are friends indeed It is simply an unachievable objective.

LETTERS TO THE EDITOR

Tory voting in

Europe
From Mr David Curry. MEP for
North-East Essex (Conservative) Sir, May I put the record straight about the voting hebaviour of the British conservative members of the European Parliament's agriculture committee during the debate on the farm price proposals earlier

this week.

The amendment to recommend an average 7.9 per cent increase in farm prices was tabled by the Danish Conservative Member, Mr Kent Kirk, who is a member of our group in the European Parliament. Mr Robert Battersby (Humberside), Mr James Provan (North-East Scotland) and myself voted against that amendment and in favour of our products in surplus. Mr Paul Howell (Norfolk) voted for the 7.9 per cent increase. Sir Henry Plumb (Cotswolds) was in the chair and

did not vote.

Those of us who voted in favour of the freeze did so fully aware of the crisis facing British agriculture the crisis racing Bransh agriculture because of the very sharp increases in its costs; the burden of high bank borrowing charges; and its dependence on energy. We were also aware that the closure of the "green pound" gap has deprived our own Government of a means of increasing British form increasing increasing British farm incomes without raising the general EEC price level.

However, we helieved that the reasons to support a freeze were (i) The dominant issue in the EEC at the moment is the United Kingdom budget problem. Every 1 per cent on the level of EEC farm prices adds 520m to the United prices adds £20m to the United Kingdom gross budget contribution. We did not see how we could justify voting to increase the United Kingdom budgetary contribution in the run-up to a vital summit meeting at which Britain's budgetary contribution will be top

(ii) We had no confidence that the Council of Ministers would endorse the radical Commission proposals to limit guaranteed prices in the dairy sector, hence permitting a price increase without the threat of expanded surpluses.

(iii) The Parliament itself voted last year to reject the proposed 1980 budget hecause the volume of agricultural spending was so high a proportion of the whole that it effectively strangled any other common policy at birth without, in many cases, doing the job of sustaining farm livelihoods efficiently and economically. We felt that the and economically. We felt that the Parliament had to face up to the responsibility of its own rejection rote if it was to stake its claim for a responsible share in EEC policy-making. Otherwise it would quite rightly be dismissed as concerned primarily with massaging its own

ego. (iv) We also believed that it was time that the agriculture committee recognized that agriculture had to observe he budgetary disciplines to which any national policy, including national agricultural policies, have to confirm. This notion is, unhappily, entirely novel to some of the nither's continental "big spen-", who are preoccupied with agriculture as a means of social support (a perfectly honourable preoccupation in itself) rather than as an industry.
I am confident that, when it

comes to the vote in the special session of the European Parliament next week on the farm price review the great majority of the British Conservative members will endorse the viewpoint expressed above. Yours sincerely, DAVID CURRY.

The Old Meltings, Arkesden, Saffron Walden.

Spaced-out holidays

From Mr A. J. Davenport Sir, Is it not time that we reviewed the position regarding Bank Holi-days in the months for March, April and May? For many years we had the Monday after Easter Sinday as a movable date, and the Monday after Whitsunday seven weeks after wards. Now we find ourselves in the situation where Easter is still a movable feast, but the Spring Bank Holi-day now appears as the last Monday in May and between these two dates we have inserted the so-called May Day holiday on the first Monday in May. The position in 1981 clearly emphasizes my point. Bank Holidays appear on April 20, May 4 and May 25—three Mondays out of six!

My particular concern as Head my paractian content as intention of a large secondary school is the extraordinary effect that this arrangement has on the school terms. Two years ago, when we had terms. Two years ago, when we near a late Easter, my muthority (ILEA) in consultation with teachers decided to begin the summer term on the last Monday in April and the following Monday was a Bank Holiday; the overall picture for that half term was 19 working days. For 1981 it has been decided, again after consultation that the May Day after consultation, that the May Day holiday will be incorporated in the Easter holiday, and so the summer term will begin on Tuesday, May 5 and we shall then have 14 working days at school before the Spring Bank Holiday. After that ridiculously short had term, we then have

a second half lasting 40 days. I would stress that my criticism is not of my authority or my col-leagues who took part in the con-sultation procedure, but of the whole system. If we must have en additional public holiday, would it not be much more sensible for it to be added as the Tuesday after Easter Sunday?

Yours faithfully, A. J. DAVENPORT. Headmaster, St Paul's Way School, Shelmerdine Close, E3.

Chunnel danger

From Mr S. P. H. Young Sir, Having beard of the future plans for the Channel tunnel one is intrigued to know how the designers are going to take precau-tions for the prevention of rables being transmitted from the Conti-nent to this country via the tunnel. Anyone who travels on the Lendon Underground can testify to the fact that the systems are inferted with vermin, any of which can carry this annalling disease.

Yours anxiously, S. P. H. YOUNG, 16 Berkeley Street, W7.

Hostel fires as a cause for anger

Sir, The two recent fires at London hostels for the homeless have made some people angry. They were indeed sad events. But we hope that the anger will not be directed at the voluntary organizations who are trying to cope with this enormous problem in London on almost non-

existent budgets.

Rather we should he angry about the extent of homolessness and the massive cuts in the housing programme. We should protest that the Government, who take nearly 53,000m in tax and duty from trade in alcohol, put so little back into solving the problems of alcoholism, the detoxification units, education and hostels, and are now going to make matters werse by handing over this impossible problem to the horoughs, and usually to the poorer boroughs at that. We ought to be angry that we can not find some there to replace 5 Mungo's, a large hostel being lost to the cause by the sale of the old Charing Cross

As Bishops in the East End it is our privilege to see the tremendous work being done by voluntary organizations and the volunteers themselves in caring for those, young and old, whom the bulk of society are content to see shuffling their way around the backstreets of our city. The conditions in the hostels sometimes gives us cause for concern, but at least they provide

somewhere to go. This human flotsam is our national responsibility and it would be wrong to scapegoat the few who try to gather it in and restore it because they are not given sufficient resources to do the job. Yours faithfully. TIM STEPNEY.

†VICTOR GUAZZELLI, 400 Commercial Road, E1. From Miss Susan Plowden and others

Sir, following the recent tragedy of the fire at the Missionaries of

From the Bishop of Stepney and the Auxiliary Bishop of Westminster as hospital social workers, would as hospital social workers, would like to make the following observations in view of the reports of over-

> crowding. It is unbelievably difficult to find accommodation for the type of homeless vulnerable people housed by the above charity. Voluntary hostels are not always able to provide either the accommodation or supervision suitable for the type of person we frequently need to help; some will provide help only for a limited num-

Recently, for example, while trying to find a place for a man who had been a vagrant for a number of years, and was to be discharged from hospital, we were informed by various agencies that they were either full or unable to accept re-ferrals from hospitals as their terms of reference were only for people off the street

The Missionaries of Charity have been extremely beloful in providing accommodation for, among others, those who might otherwise have been occupying an acute hospital bed, or have been forced to become

Before the authorities restrict the numbers of those accepted, should not there be a corresponding in-crease of homes able to provide such accommodation?. Or is the down-and-out, whether recovering from illness or not, to be penalized still further? Yours faithfully.

SUSAN PLOWDEN. ALISON SURTEES, RUTH LAXTON. VIRGINIA CUTLER, JANE PARSONS. SHARON RAEBURN, DONALDA McDAVID, JUDY LAGERWEIJ, JUDY JEPSON. ANNE FORGIE,

guidelines of that struggle have

Aims of the Palestinians From Dr Everett M. Jacobs

Sir, It is unbelievable that Lord Carrington could have meant it when he said in the House of Lords on March. 17 that he was unaware that the Palestine Liberation Organization's aim was to destroy Israel completely, and that he did not think the PLO was a terrorist organization " as such ".

Yassir Arefat, chairman of the FLO and leader of the Al Fatah terrorist group, put the record straight as recently as February 11 in an exclusive interview in the Venezuelan newspaper, El Mundo. He said; "Peace for us means the destruction of Israel. . . We are preparing for an all-out war. This war will last for generations. Since the birth of Al Fatah in 1965, we have become the most dangerous enemies that Israel has. We shall not rest until the day when we return to our home, and until we destroy Israel."

He continued by outlining specifi-cally the PLO programme and methods: "The destruction of Israel is the goal of our struggle, and the

remained firm since the establishment of Al Fatab in 1965: 1, Revolutionary violence is the only means for the liberation of the land of our fathers; 2, the goal of this violence is the destruction of Zionism in all its political, economic, and military forms, and its expul-sion from Palestine; 3, our revolutionary activity must remain inde-pendent of any party or state control; 4, this action will be one of long duration. We know that the intention of some Arab leaders is to resolve the conflict by peaceful means. When this occurs, we shall oppose it."
No one has challenged the

accuracy of Arafat's statements which as Lord Carrington must have known, only repeat what numerous PLO spokesmen have said many times before. I fear that Lord Carrington's diplomatic blindness is part of the EEC disease that has recently been affecting this country. Yours faithfully,

EVERETT M. JACOBS.
Department of Economic University of Sheffield.

Protection of souls From Mr K. P. Frampton

Sir. Mr Clifford Longley's article on "Protecting souls in trouble from the fanatics" (March 10) is both timely and of vital importance in this age of proliferating cults. Religious fanaticism has become big business, often under the courtol of unscrupulous men who manipulate their guileless recruits into a state of willing servitude.

These sophisticated organizations use the liberal laws of our country to foist upon the public, usually the young, their own ideology under the guise of religion. This enables them to claim all the protection of religious freedom, regardless of the conduct and practices to which many of them resort, often destroy-ing the personality and soul.

Since the Jonestown suicides many groups in America are now calling for legislation to curb this unbridled abuse of civil liberty. During the warnings that these excesses could happen again, two more people who escaped from Jones were murdered last month. Equally dangerous cults

The growing menace of the cults must convince all who have any experience of the subject that the time has come for us to grasp the nettle. The laws of our land were not framed for the conditions which apply today—the public and the state equally need protection against this whole strategy of deception which, as you indicate, would not be tolerated in the field of com-

merce or medicine.
We have long been pressing for some suitable action in Parliament. In fact after our address to a number from both Houses at Westmin-ster last year one of the members made the fine suggestion that a select committee on the cults should be set up. It is good therefore to see Mr

Longley stating that "there are possible steps that the church and state could take". Several practical remedies have been suggested by American lawyers who have studied the subject deeply, the most obvious being the registration of certain (possibly all) religious groups, also their financial accountability. As you say, a simple change in the law could enable the Charity Commis-sioners to enforce a new code of practice. Other safeguards are also necessary for individual protection

from exploitation.

We shall be pleased to make available to any MPs who wish to pursue this orgent inquiry the above recommendations and other data we have available. We sincerely hope that your new initiative may now gain the active support of parliamenta-rians and all who are concerned for the well being of our country. Yours truly,

K. P. FRAMPTON, Deo Gloria Trust 5-7 London Road. Bromley, Kent. March 11.

Young riders From Mr Patrick Doorly

Sir, An effective campaign to reduce the number of accidents among young motorcyclists would be welcomed by us all. But Mr Minter's suggestion (March 19) that 16-year-olds he banned from riding the small motorcycles (maximum engine size 175cc) which the law presently allows them raises wider issues than he may have considered.

The literary bias of our educational system results in many pupils leaving school at the earliest opportunity with neither academic qualifications nor useful skills and often with a sense of having failed. Contrary to Mr Minter's belief, these youngsters find small motorcycles exciting to ride, and usually take a pride in maintaining them in good working order. (Few have the means either to buy a new machine, or to pay a garage to repair a secondhand one.)

Servicing an engine requires concentration and patience. It develops an ability to think rationally and to coordinate mental activity with manual dexterity (a facility notoriously absent from formal education. It is precisely to foster these qualities among youngsters who joyride on borrowed motorcycles (without insurance cover), that the London Borough of Wandsworth obligues them to attend a course in motorcycle maintenance. The procedure, onerated as Intermediate Treatment under the 1969 Child and Young Persons Act, has proved a cheaper and more effective alternative to institutionalized care.

commend the indirect rowards of caring personally for the machines we all use to those of your readers who are neither 16, nor rejects of the school system. Certainly, they should think carefully before denying 16-year-olds the machines that teach them both useful skills and a new self-respect. Yours faithfully, PATRICK DOORLY.

158 Boundaries Road, SW12. March 20.

Treasure from Tipperary From Mr Hugh Pilkington

Ser, Further () Mr K. R. Smith's splendid suggestion (March 20) that the St Ninian treasure, recently dis-covered in Ireland, should be put on display at the British Museum,

before it is returned to Dublin. Would it not be rather more interesting if the treasure was dis-played at the British Museum in the state in which it was found, for one week and then again after the conservation and restoration work

has been done.

This would not only demonstrate the little-publicized expertise of the British Museum's conservation officers, but also add to the appeal of the artefacts. Yours faithfully. HUGH PILKINGTON. 91 Grant Russell Street, WCI.

Consumer's choice

of bread

From Mr A. J. Buczkowski Sir. We would like to take the opportunity of commenting upon Hugh Clayton's article " Baker's call for cut in EEC wheat levy" (March

For many years our farms in the Vale of Aylesbury have been 5 producing all the wheat (Maris Widgeon and Sappo) and rive (pag. (Athol) we can use in our Takery which has a throughout of some 5 tonnes per week. Within the next

18 months to two years we confidently expect this figure in reach some 15/18 mones per week.

All our breads are of a Continental type, and we are finding there is ever increasing consumer demand for such breads as opposed to the "lily white sponge" which the large bakeries insist is what the consumers bakeries insist is what the consumers want. For many years the consumer has had very little choice in the matter; and it is ironic that the large bakeries should now be contemplating persuading the public to abandon the lily white sponge in fevour of Continental type breads at a time when the sales of the lily white should be about the sales of the lily white should are decreasing rapidly white sponge are decreasing rapidly and the public are demanding better bread in ever increasing quantities l

After several years of involvement wholemeal bread making on an increasingly large scale it appears to us there is no reason why whole-meal and Continental types of bread cannot be produced using wheat grown in the Community on a scale comparable with the largest plants in the country. Indeed, the existing plants could make such bread with relatively minor modifications and a relatively small premium would ensure the right quality of wheat was grown by our British farmers.

If the result of the continued high level of the wheat levy is to make the large bakers start to think about producing a better lost, and will benefit British farmers, then perhaps the levy should be increased even

further. Yours faithfully, A. J. BUCZKOWSKI, Gatehouse Close, Aylesbury, Buckinghamshire. March 20.

Cheaper air fares

From Mr Robert McCrindle, MP for Brentwood and Ongar (Conserva. It Sir, On consecutive days the Civil

29

Aviation Authority has rejected the applications by independent airlines to open up European air routes and Daging the initiative of British Airways for a super cheap fare to Paris has been baulked by the French authorities. In these circumstances has the great thrust towards lower air fares in Europe run out of steam or is it just hureaucratic shortsightedness and

Continental cussedness?

No doubt there is an element of both in what has happened, but in truth the lesson of these events is that while there remains scope for innovation, we must stop enterrainset to plummet. Notwithstanding the EEC's hold initiatives into ward of reducing fares, the refusal by an least two member countries to comtemplate meaningful reductions, allied to the inexorable rise in costs.

surely forces us to reduce our expectations. suspect this will seem to the independent airlines to be a counsel despair but I wonder how many of the hold innovations proposed by them could survive for long in a period of economic recession. I suggest that a more somer assessment of the profitable traffic that could reasonably be attracted would be a better basis on which to huild, and would lead to attainable if less dramatic fare reductions.

In short, rising costs, unrealistic assessments of potential traffic and the stubboromess of France and Gor-many to contemplate any substantial changes surely mean that the most likely happening is limited reductions for tourist traffic at offpeak times and a continuing rise for the Yours faithfully. ROBERT McCRINDLE,

House of Commons.

Burning question From Dr W. G. Borb

Sir. As head of a team of chemists working as translators I was most interested to read your correspon-dent's report on the fungicide muddle. As long as translators who are amateur scientists, or scientists who are amateur translators, are allowed to deal with documents where true scientific precision is needed, such errors will always nccur.

seems blameworthy. The French original should never have used "cuisson", which is a word with several distinct meanings, but should have sought an unambiguous alternative, of which there are several. The translator should never have employed the verb "boiled".
However, the final and allegedly correct translation is still arong.
"Cuisson" does not mean "charring". It means "burning" (in the culinary sense).

I wonder how much money has been spent, with usual EFC of il-ciency, to produce an ambiguous original specification and two wrong translations. Yours sincercly,

W. G. BARB. Europa House Marsham Way, Buckinghamshir-, March 21.

Irish voting rights From Mr Anthony Jaggard

Sir. There have been Irish beautlions in the Papal Army; the French Army and the British Army, Smaller groups have served other countries. I fail to see why this mercenary activity should entitle the civilian population to additional voting rights outside their even country. particularly when many of our own countrymen are disenfranchized while they work shroad.

Yours fait'sfully. ANTHONY JACGIRD. The Cavalra and Guards Club, 127 Figurdilly, W1.

Forthcoming marriage

Mr M. J. Hester and Russ S. Johnson The engagement is announced between Michael James, son of Dr and Mrs K. M. C. Hester, of Baytree House, Burtes, Suffolk, and Susan, only daughter of Mr and Mrs F. G. Johnson, of The Meadows, South Brent, Devon.

Marriages Major A. C. Boyce, RA and Miss A. M. Thompson

Art Nouveau lamp sold for \$360,000

Major A. C. Boyce, RA
and Miss A. M. Thompson
The marriage took place on
Saturday at the Church of St Mary
the Virgin, Shalford, near Guildford, Surrey, between Major
Amony Carlisle Boyce, eldest son
of Colonel H. C. Boyce, of Chard,
Sometset and Shelia Lady Austin,
of Queen's Gate Place, London,
SW7. and Miss Annene Mary
Thompson, elder daughter of the
late Mr Denis Thompson and of
Mrs Betty Thompson, of Grangewood, Velmead Road, Fleet,
Hampshire. The Rev K. Morgan
officiated.

The bride, who was given in
marriage by her uncle, Mr Thomas
Thompson, wore a Spamsh style,
late-trimmed gown and a lace veil
held in place by a mantilla. She
was attended by Charlotte Thompson Bran, Victoria MacEcachran,
Mrs Paul Bran (sister of the
bride) and Miss Jane Thompson.
Mr Ian Boyce (brother of the
bridegroom) was best man and a
guard of honour was found by
the Royal Artillery.

A reception was held at
Worplesdon Place, Guildford, and
the honeymoon will be spent in
the West Country.

Mr R. F. Garton
and Miss J. L. Frank

Sale Room Correspondent

Art Nouveau moved into a new price bracket in New York on Saturday when a Tiffany lamp reached \$360,000, or 1164,383, in a Christie's auction of the Mihalak collection. The rarity which commanded that price was a spiderweb loaded glass, mosaic and bronze table lamp.

Another lamp of that type was sold for \$150,000 (£75,000) from the Gluck collection only a year ago, and that was the highest price on record for a Tiffany lamp. Mr R. F. Garton and Miss J. L. Frank The marriage took place in London on Thursday, March 20, between Mr. Robin Forbes Garton, youngest son of Mr and Mrs J. L. Garton and Miss Jessica Lee Frank, elder daughter of Air Vice-Marshal and Mrs A. D. Frank,

inhibition, but when follicle cells were treated with oestradiol for 48 hours, progesterone production increased. Subsequent treatment with prolactin increased progesterone production still further.

In the pig the apparent reversal of prolactin's effects may reflect the maturation of granulosa cells, possibly mediated by oestrogen. Progesterone production by large mature pig follicles is in fact stimulated by prolactin. In that respect the pig differs from humans in whom high concentrations of prolactin are always inhibitory, regardless of the state of follocular development.

frequencies

Mr R. L. Smith-Rose, CBE, FCGI, FIEE, FIRE, FIC, who was Director of Radio Research at the Department of Scientific and Industrial Research, from 1948 to 1960, died on March 19

1948 to 1960, died on March 19 at the age of 85.
Reginald Leslie Rose was born on April 2, 1894, and educated at Latymer Upper School, Hammersmith, and the Imperial College of Science, where he gained a Board of Education, Royal Scholarship in 1912. He won the Imperial College Governor's Prize in Physics in 1914, graduating BSc with a first in physics in the same year. He gained his PhD in 1923.

He was an Assistant Engineer He was an Assistant Engineer with Siemens Bros at Woolwich from 1915 to 1919 and from 1919 to 1933 was at the National Physical Laboratory as a Scientific Officer in the Electricity Division, He was a Principal Scientific Officer in the Radio Division from 1933 to 1939 and from 1939 to 1947 was 1939, and from 1939 to 1947 was Superintendent, Radio Division, He was a member of various scientific and technical committees of government decartments as well as of outside instiru-tions. He was chairman of the Radio Section of the Institution of Electrical Engineers in 1942-43 and was a Member of the Institution's Council from 1953 to 1956 and again from 1960 to 1961. He was Virg-President from 1961 to 1964. Smith-Rose was also a delegate to many international scientific radio conferences oversees and was President of overseas and was President of the International Scientific Radio Union from 1960 to 1963. He was chairman of the Study Group V. International Radio Consultative Committee from 1951 to 1970, and was honoured at the 50th anniversary of the CCIR for his work on radio wave promagation. He was chairman of the Postmaster-General's Frequency Advisory Committee from 1960 and was Committee from 1960 and was Secretary General of the Interrectains Union Committee on Frequency Allocations for Radio Astronomy and Space Research from 1961 to 1973.

He was appointed CBE in 1952.

He married, in 1919, Elsie Masters. They had two daughters.

SIGNOR MANLIO BROSIO

K.T.N. writes;
May I offer a short note en-May 1 ofter a short note en-larging on that part of your obituary notice of Signor Manlio Brosio which relates to his service as Secretary General of Nato? Signor Brosio had indeed the ability to achieve a consensus as Chairman, whether of the Nato Council of Foreign Ministers, the Defence Planning Committee of Defence

ence. But with Brosio it was much more than diplomacy. He was an ideal chairmen: calm, courteous, attentive, firm when necessary, and above all a master of both the political and the more specialized Defence issues under discussion. His preparation for every meeting had been thorough and searching; every staff brief or draft had been discussed with its authors—and usually im-proved in the process. Add to these fectors his fairness and impartiality and one begins and see how he came to enjoy the confidence of every Government in the Ahlance and could ment in the Amanica and countries find ways (inside or outside the committees) of bringing them together which they had not themselves perceived.

Brosio was indeed dignified

in manner and he had a certain reserve. But his closer colleagues soon found in his hospitable home that he was too good an Italian to let solemnity of thought and purpose take over completely. Music, theatre, films, international sport, all made matter for good talk over good food and drink. He was deservedly admired and respec-ted by all who knew him, and not least the international staff of which he was the head.

The National Farmers' Union of England and Wales said in its

annual report: "It sometimes

seems as though the NFU is the

only body willing to promote better understanding of the com-

mon agricultural policy and the

EEC in general. This lack of

activity from other organizations is regretted."

Since then other organizations have become extremely active, but not in the way desired by the NFU. It has seemed in recent weeks as if other organizations have been queueing up to publicize views about farm prices that are interly opposed to those of the union.

The latest in the queue is the United Kingdom Provision Trade Federation, a relatively new group which makes few public pronouncements. It was furmed in 1976 to

ments. It was formed in 1976 to represent companies which import exchanges which date back to the foundation in the nineteenth tenury of the first provision exchanges

changes.

Their purpose was to give to traders in fats and becon a trading forum similar to those already established in corn exchanges. The present federation is concerned almost entirely with imports. Some of its members were among the few sceptics five years ago when most of the British food and farming industries campaigned for a large affirmative vote in the referendum about EEC membership.

EEC forum demanded for traders in fats and bacon popular cooking fat used in and it is unlikely to encourage sympathy for a cut in tariffs against twice as much lard was used as oil and solid fats blended wants to keep imported fats out, Almost twice as much lard was used as oil and solid fats blended from vegetable and animal fats and fish oils. "This is unique in the EEC", Mr Bdwards explained. Only a twentieth of the lard used in Britain was produced at home. not to encourage more to come in.
The provision trade federation The provision trade federation bases its case on a belief that tariffs on many imported goods are much too high and raise consumer costs without benefiting farmers. Their case is similar to that of British bakers, which was discussed in this column a week ago. The bakers want EEC tariffs against North American wheat to be lowered.

Such claims seem full of sense in Britain. If implemented, however, they would reduce the amount of money flowing into EEC coffers. Since most of that money is used to pay for the common agricultural policy, demands for cuts in levies are seen by farmers' organizations as attempts to undermine support for farming.

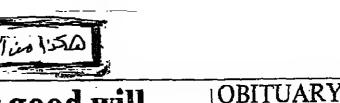

The difficulties of the provision trade federation are made worse by the fact that it is not recognized as a negotiating body by the European Commission. The commission, at one of the main Community authorities, likes to listen only to lobbies which represent interest in all member states. The provision trade federation said that it could not "join any of the surviving trade associations recognized by the commission as the producer/exporter goals of these bodies are unrepresentative of the federation approach.". That, at least, is the view held thou of the gulf between Britain by many farmers' organizations, and the rest of the Community.

loans market

National Westminster, one of Britain's "Big Four" High Street banks. is ready to launch an aggressive challenge to the building societies' dominance of the home loans market.

Mr Robin Leigh-Pemberton, NatWest's chairman, in his annual statement out today, said that the bank has plans to establish a home loans unit "for whose services we see a considerable demand". So far, attempts to establish

such a unit have been inhibited by the Government's controls on the covernment's controls on the expansion of bank lending, the 'corset". Sir Geoffrey Howe, the Chancellor, will make a statement on the future of the corset in his Budget speech on Wednesday, but the bank does not expect relaxation in the immediate future. NatWest, which recorded pre-

tax profits up from £305m to £441m, is "ready to launch" a home loans scheme "as soon as circumstances permit" according to Mr Leigh-Pemberton. Mr Maurice Denton, general manager ofw domestic banking, said yesterday that the acheme could come into the scheme could come into effect- almost immediately if the corset restrictions were lifted. Otherwise, he said, it would be necessary to wait until the benk had significant amount available to lend under the corset restrictions.

Mr Denton confirmed that, unlike the present facilities offered by most of the clearing banks, the scheme would not be restricted to large borrowers in exceptional circumstances; nor would its total scope be restricted, as is the scheme operated by Lloyds Bank, which made £20m initially aviiable for home loans.

He said it was unlikely that

the bank would be trying for the busines of the first-time borrower, partly because the building societies have the edge on rates. But the minimum amount

prices when the scheme is launched—and the bank would be aiming to lend for up to 20 At first, the bank would be aiming to lend at a margin over base rate. Mr Denton said that it would aim to keep its rates more stable than base

rate has been recently, "although we obviously don't want to be lending at a loss". However, Mr Jeffrey Benson, group chief executive, said that the bank was also toying with the idea of making loans available at a fixed rate, at least for part of the term. part of the term.

Mr Benson said that the bank did not see itself as tackling the building societies head on. "We shall not be lending far and wide like the building societies", he said. However, if the bank's plans for "picking up the top end of the mar-ker proved to be successful, and if funds were available, it was possible that the scheme might be extended.

Hitherto the clearing banks have largely refrained from tackling the home loans market, though there have been small scale schemes, like that started have been small scale schemes. by Lloyds Bank in January last year and that run by Yorkshire Bank in cooperation with the National Coal Board for the urchase of miners' houses. Another reason for the banks

refraining from home loans business has been their convic-tion that the money deposited with them was, or ought to be, repayable on demand. However, recent ventures into mediumterm landing, to both commer-cial borrowers and the home improvements market, have tended to undermine this conviction-particularly, as Mr Denton pointed out, as monthly repayments would provide the banks with a high degree of

NatWest set to 'Think tank' backs British nuclear stations

visited the Prime Minister to present the views of the AGR

The AGR lobby feared that Mrs Thatcher preferred the PWR and would be sympathetic to dirching the British design on the excuse that it would not be needed to meet demand and would be a useful saving of

government spending.
In a speech at the weekend Dr David Owen, Opposition energy spokesman, gave a clear hint that a continuation of the AGR programme would be necessary for Labour's support of cautious nuclear expansion. Because of the lead times involved in power station build-ing, a bipartisan policy is

essential for success. The generating board has been pressing for an increase

in its planned £187m cash limit for 1980-81 to enable it to continue with both the nuclear programme and other plans. At one time, it seemed the limit might be reduced, delaying

Heysham station.
As it is, it is believed that the limit will be reaffirmed in the Eudget and Heysham will be protected, unless the Cabinent decides otherwise. Con-sumption in Scotland is believed to be holding up stronger than in England and Wales, and if a cancellation

Regional grants for coal board to end

By Our Energy Correspondent Regional grants to the National Coal Board, which totalled £50m in 1978-79, are to be ended by a government Bill held up so far because of the steel strike.

The Bill, to put the coal board's finances on a better footing to promote its £600m a year expansion plan, is in the final stages of preparation and will be placed before Parlia-ment as soon as possible.

The effect of ending the regional grants will be to reduce sharply the level of NCB published profit. Initially, however, the NCB will not lose financially because the loss will have the loss will be made up by a page speciment. be made up by a new system of "deficit grants".

It is felt that the number and size of grants paid to the coal board, which totalled £172m in 1978-79, produce an unreal profit figure which dis-guises the true state of the

With productivity and output at last beginning to improve, the Government believes it is time the NCB moved more into banks with a high degree of the harsh world of commercial flexibility in the average term of their liabilities.

Financial Editor, page 20

The first moved moved

sive way of generating electri-city than oil. It is intended that the deficit

grants will be phased out as the NCB's profitability improves. Being funds to meet a loss they will not be able to be used, as the regional grants were, to bolster published profits. The Coal Bill will also pro-

mote new schemes to assist miners to move from the high cost unprofitable pits, particu-larly in South Wales, to the newer high productivity profit-able mines such as Selby and, if the go-shead is given from the planning inquiry, the pro-posed pit at the Vale of Belvoir

in north-east Leicestershire.

It is hoped that a system of deficit grants will enable the NCB's progress to be closely monitored. It will no longer be possible for it to rely on continuing subventions from the state. But it may mean that the board will be pushed into closure. ing older pits faster than the miners would like.

A key part of the govern-ment's plans for the coal industry will be the success of the policy to persuade miners to move. As it is designed the productivity pay scheme can give pay rises to miners with-out the total output of the NCB

More curbs Proposed on secondary disruption By Patricia Tisdall

The Engineering Employers Federation (EEF) has joined

Federation (EEF) has joined other industry representatives in seeking righter legal curbs on secondary industrial disruption in the Employment Bill.

In submissions made to the Government at the weekend, the EEP says the proposals to add an extra clause restricting secondary action could create confusion. Like the Confederation of British Industry, it is worried that the Department of Employment's description gives

Employment's description gives too many loopholes.

Mr Anthony Frodsham, the EEF's director general says that his members think the Governments of the covernments of the covernments. ment's description should only be adopted if some other, more precise definition cannot be

As an alternative, the federation suggests that immunity for breach of commercial contract should only be available where companies are actually continthe employer subject to the primary dispute.

It wants to protect those activities of suppliers and customers which have no connextomers which have no connexion with the employer. It also suggests that immunity should only be granted if the secondary action had the objective of affecting the employer in dispute and "was capable of achieving this effect".

In the longer term the EEF, which negotiates national agreements on behalf of its 6,500 member companies' two million

member companies' two million employees, believes that all secondary industrial action 10uid be hanned However in is prepared to support the much limited restraints posed for the time being, given the constraint of achieving an urgently needed measure of reform in the Employment

The proposed new clause on secondary action is intended to change the law to uphold Lord Denning's rulings (later overturned in the House of Lords) in Express Newspapers v MacShane, and Duport Steels and others v Sirs and others which involved independent steel producers. Clause 14 of the Employment Bill will limit secondary picketing, but the Government believed, in the ight of the House of Lords judgments given after the Bill was published, that further legislative measures were legislative measures were needed to restrict secondary blacking and strike

The EEF has now joined

other industry leaders, includ-ing the Institute of Directors and the Association of British Chambers of Commerce as well as the CBI, in making it clear that they regard the Employ-ment Bill only as a stop-gap

Tourism could benefit from low interest loans By Derek Harris

Commercial Editor Low-interest loans for tourism development are being discussed

with the European Investment Bank which until now has been offering help mainly to British manufacturers and schemes like transport improvements. The proposal has been put

forward by regional boards which operate under the aegis of the English Tourist Board (ETB), but if government talks with the bank are successful the scheme is expected to benefit tourism throughout the United

The loans would carry an interest rate of around 13 per cent after allowing for currency adjustments. But it is not expected that such soft loans would be available to the larger companies like the big hotel hains. In England, for instance, the allocation of loans would also be under the surveillance

Improvement schemes simed at developing tourism potential Involving investments between about £50,000 and £2m are expected to be the main candidates for such loans. Such cheaply serviced investments

could make a great difference to the rate of both new hotel building and resurbishing of existing hotels.

Another way of relieving the effects of high interest rates is also being considered by the ETB which may divert more of its grant aid cash in future entirely for this purpose.

But the ETB is still waiting for a decision on the level of grants it will be able to offer during the next financial year. Its spending in this period has already been cut to just over £4m because of last November's public expenditure cuts and a further reduction is possible.

An appeal for greater invest-ment in tourism has been made by Mr Michael Montague, chairman of the ETB. He said at the weekend: "We are only scratching the surface of the potential for tourism develop-ment in this country."

Tourism, a growth industry, would become more important as a source of income and jobs, with competition growing from tourist flercer sbroad. Britain needed to plan the attractions, accommodation and facilities to bring more tourists to this country, Mr Montague added.

Opposition to Fourth Channel monopoly

The Government faces a Independent Broadcasting challenge from some MPs over Authority will be required to its plans to extend the ITV approve Fourth Channel procompanies' monopoly in the gramming schedules there will Fourth Channel.

A number of amendments have been tabled to the Broadcasting Bill which is now going through the committee stage and which, when it becomes law in the summer, will provide the framework for the channel.

A number of the amendments call for further discussions about airtime selling arrange-ments, though it is understood that at least two propose alterpative systems.

The Government extended the monopoly of the ITV com-panies because it believed that competitive selling between the two commercial channels would lead to a ratings wer which would lower the standards of both services and lead to an American-style clamour for high audience ratings.

The ITV companies will not however have a majority on the board of the proposed Fourth Channel company which will control the content of the service.

The prospect of a ratings war has been strongly denied by the advertising industry which is still smarting from last year's 10-week independent relevision strike which soured relations between advertisers and the companies.

advertising industry broader that because the opinion.

be a powerful control against

the onset of a ratings war.

The Incorporated Society of
British Advertisers (ISBA) has British Advertisers (ISBA) has further criticized the companies for operating "unfair practices" by restricting airtime sales to force up prices, packaging together peak and off-peak time, and using discriminatory pricing in the preparation of me highly complex commercial television ratecards. commercial television ratecards. Mr Kenneth Miles, the

director of ISBA, said vaster-day: "They play around with selling arrime in what is a one-sided way. The sale of airtime is not at all a transparent action. In each region there is The ISBA has called for the

setting up of independent regional agents who would not have seats on the Changel Four management board and con-sequently could not influence programming. It is thought that some of the amendments may come up for discussion when the Bill comes before standing committee next

Britain could win assembly line for the next European Airbus Air Correspondent

next European airliner project

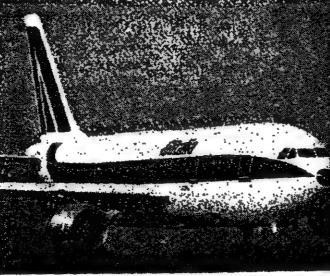

could be in Britain rather than in France, under plans being discussed by Alrbus Industrie, the six-nation Aerospace consortium.

Airbus will decide what type of airliner to make next by the end of this year. If the choice is for a big, wide-bodied airliner, it will be put together in Toulouse, south-west France. But if a smaller airliner with around 150 seats is selected, the job of assembling it from parts made in Europe, plus flight testing, will almost certainly be given to Britain.

This is because the assembly

This is because the assembly facilities at Toulouse are too stretched fulfilling orders for A300 and A310 airbuses, to be able to cope with a new aircraft. A new assembly line would create many hundreds of new jobs in the British Aircraft industry. British Aerospace is dustry. British Aerospace already recruiting steadily as it gears up to increase production of wings for the A300 and A310 from the present three sets a month, to four a month next year, five a month in 1982, six

a month in 1983, eight a month in 1984, and possibly ten a month by 1985. Senior executives of British Aerospace will soon decide which of their factories will be expanded to cope with the large solume of extra work which this programme entails. One option

goes up.
The increased output is necesary to meet record sales, logged last year by the Airbus consortium. It set a sales target of 100 aircraft in 1979, but actually sold 132. The order book now contains the names of 33 airlines, and is virtually full until 1985.

BY THE FINANCIAL EDITOR

Priorities from the Budget

Since coming to office ten months ago, financial markets have been giving the Conservative Government the benefit of the doubt. The Conservatives have been making the sort of noises that the City likes to hear and the moves to cut public spending and the ending of exchange controls has proved to many that the authorities can turn words into action.

Admittedly the sharp rise in interest rates last year has taken the stuffing out of the gilt-edged market and equities in recent weeks have become increasingly preoccupied with the likely squeeze on corporate liquidity — already well signalled by the stream of poor company profits - as the recession deepens.

How long this honeymoon will continue given the unfavourable international climate, both for trade and interest rates. increased pressure on sterling as the dollar recovers and the mounting difficulties of the corporate sector depends on the tone the

budget sets. In front of the Budget, financial markets are showing signs of nerves but are holding up reasonably well. The central concern of the City is the size of the public sector borrowing requirement and there will be some disappointment if this emerges much above the £8,500-£9,000m level and it will want some reassurance in the medium-term financial plan that the money supply will be kept on the straight and narrow.

With the White Paper on public spending coinciding with the Budget this year, the market will, after the Cabinet disagreements of recent weeks, want to see firm indications that spending cuts will be adhered to.

There is however unlikely to be more concrete news in the Budget to help the gilt-edged market since the money supply trends of recent months provide the Chancellor with little scope for a cut in

Equities too are unlikely to find much comfort in the Budget since apart from a reduction in the employer's national insurance surcharge and assistance to companies who will be unable to benefit from stock relief because of a temporary fall in stocks, corporate liquidity will remain

just as strained. But the promised reform of capital taxes and incentives along French lines for small investors should help to make equities more attractive longer term. More parochially traded options could have the uncertainty of their tax treatment removed.

National Westminster

A challenge to building societies

Modestly tucked away in National Westminster's latest annual report is a minor bombshell for the building societies. This is the revelation that the bank is well ad-

vanced with plans to move into the mortgage business in a fairly big way once the present controls on bank lending end. To date Lloyds has gained a lot of kudos

in being the clearer most publicly associated with housing finance, although all the other banks claim to have broadly similar facilities available should a customer have the temerity to ask. But the Lloyds home-loan scheme has been aimed at the top end of the market for which there has been siderable demand" according to the latest annual report

And while Lloyds likes to refer to its scheme as "the borderline of competition with the building societies" only £20m was committed to it at the outset and it was in no way intended to attack the societies head

NatWest however is proposing something much more ambitious. While the outlines of its scheme also suggest that it is not intended as a direct challenge to the societies -after all NatWest's cost of funds means that 15 per cent mortgages are a pipe dream —it is for the first time treading into some of the societies' traditional territory, paving the way for a more concerted banking assault on the societies.

Hitherto, the banks have shied away from the housing finance field, partly because of the tax advantages enjoyed by the building societies, particularly the composite rate, meant they could always undercut the banks, and partly because conventional banking business holds that you do not lend long and borrow short.

The world has now moved on a bit. With the push into medium-term corporate lending and to a lesser extent personal loans as well, banks now have a much better feel for liability management while regular mortgage payments and the satisfactory bad debt record in the housing field has convinced the bank that this area of business is not quite the minefield they once thought.

Building societies, too, are changing their spots. Last week the chairman of the BSA said that the mortgage rate cartel was likely to go and increasingly the societies are gearing themselves up to dip into the wholesale money markets if they are to satisfy mortgage demand, which will push up their cost of money.

All of which NatWest plainly feels provides it with scope to take up the mortgage mantle on not too unequal terms. And it is after all the last major financial service in which the clearing banks have yet to get a foothold after the major expansion of their activities in the past decade.

After all that the annual report is pretty tame stuff. NatWest is inching towards more disclosure in providing more detail about its income and expenditure although after the shock of Iran a geographical breakdown of its profits would have been more welcome.

The next major step for the clearers on the disclosure score is probably more information on the maturity structure of assets and liabilities. But that is some way

Mr Robin Leigh-Pemberton, chairman

Meanwhile, NatWest's balance sheet is benefiting from the tapering off of the substantial capital spending programme of recent years related to the Tower, Coutts and the computing centre. True the free capital ratio has slipped from 4.2 to 3.9 in a period when those of the other banks have improved a little.

But this is entirely down to the purchase of National Bank of North America, where a \$25m capital transfusion has taken the total cost up to \$456m, and the £88m of goodwill that has now been written off.

NBNA has yet to prove itself and the part financing of it through a \$100m floating rate note is probably costing more than NatWest bargained for. But the dollar is strengthening and NBNA was bought at the trough of its profitability, and its problems are slowly being ironed out.

Eurobonds

A false

In the short-term at least the Carter package of a week ago has brought some welcome relief to the bard-pressed dollar markets. ine immediate effect last week was to prompt a rise in short-term rates, which in turn generated strong demand for dollars. Short rates accordingly eased back again and the Eurodollar bond market moved healthily ahead.

In this encouraging climate the first straight Eurodollar bond issue since Christmas, a \$125m three-and-a-half-year issue for Sweden, is being launched as the initial tranche of a \$500m deal. Does all this mean that the markets think President

Carter, has, at least, done the trick? There is not, as yet, much reason to be lieve they do. The dollar-buying has been quite simply to take advantage of high shortterm interest rates now standing at an unprecedented margin over the returns available in the erstwhile hard currencies.

Significantly, when dollar rates eased back last week the dollar began to weaken again, picking up on Friday only when a set-back in New York prompted another upturn in interest rates-which, incidentally, sorely unsettled the bond markets.

Investor interest thus remains focused almost solely on the high yielding deposit mrakets. There is, admittedly, a growing belief that long-term rates are now close to a peak level. But at the same time there is little confidence they will fal lback for some

A diplomatic approach to arms sales

·VERTARISE FREE

Paris When President Giscard d'Estaing went on his tour of the Gulf states at the beginning of the month little secret was made of the fact that the French hoped to get a profit-able batch of arms orders out of the visit

The President however did not see himself as a travelling arms salesman. The trip to the Gulf and Jordan, the longest La had undertaken abroad since he came to office, resulted from a desire to show his hosts that France believed they had a role in ensuring world stability through remaining strong and non-aligned.

The President would argue, French arms sales contribute to the region's strength and thus to its stability. As long as Kuwait or the emirates are well-defended they will be able to use their economic strength acquired from oil-to counterbalance the influence of the superpowers.

There is no doubt that France realizes that keeping on good terms with the oil producers by selling them arms means it has a greater chance of ensuring the continuity of its own oil supplies.

because he believed that France should not rely on any individual country or group of countries for its defence. That meant building its own nuclear deter-rent and all its own military equipment.

Equipping a modern army is expensive, yet if France were to have its military indepen-dence it had to pay the bill. The only sensible solution was to FRANCE'S MAJOR IDENTIFIED ARMS AGREEMENT (July 1978—June 1979)

ST \$23,5 3 1 1

arms industry. It was realized that a brisk export market would enable the industry to keep production lines going when there was no domestic need in case the day came when there was. The in-dustry would be kept on its toes, since exporting provided the driving incentive that would be lacking if the only client were

Finally it was appreciated that meeting the requirements of an ever more demanding and sophisticated foreign market would ensure that development continued to keep French technology in the forefront.

The success of the operation is evident from the figures. In 1970 French arms exports amounted to 2,350m francs (£246m), or 2.48 per cent of total French exports. In 1978 (the last year for which full figures are available) these figures had grown to 8,410m francs (£880m) and 5.01 per cent respectively. Exports have risen by 30 per cent every year since 1971.

That business is really boom ing is clear from the orders re-ceived last year for 25,000m francs (£2,615m) worth of arms; not all of course to be delivered in one year, but proof of the fact that the French thrust into Source : International Institute for Strategic Studies...The Militar: Balance 1979-80. The arms market is going to be

Apart from its value to French defence and foreign earnings, the arms industry is an important provider of work. It employs 287,000 people, including 155,000, in the private sector, and about 75,000 are working exclusively on foreign contracts. In terms of employment, it is as large as cars, which is generally regarded as the most successful

dustry in the country. The many different skills required in the arms industry provide work for many specialists, with valuable benefits from their skills going into high technology. This gives a greater develop the export side of its competitiveness to industries such as aerospace and elec-

Many small fims which supply specialized units are spread around the country and provide high quality employment in deressed areas such as the South west, the capital of the French aerospace industry despite the fact that local moemployment is well above the national average. With all these military, econ-

omic and social pressures, it is not surprising that France has become probably one of the most aggressive arms sellers in the free world. The result is that countries which have been traditional enemies are often both equipped with French arms. Pakistan, for example, has Mirage jets while India has hought the Anglo-French Jaguar. It often looks as though France's need to sell weapons takes precedence over other considerations.

This theory would however be difficult to prove. France has obeyed the United Nations embargo on arms sales to South Africa and there is absolutely no evidence that even by the use of middle men France has knowingly supplied weapons for use by a repressive regime.

Why the Chancellor's mailbag is bursting

From the end of November onwards, the Chancellor of the large and small, all telling him what he ought to do in the Budget On Wednesday, the authors will know just how much nodce has been taken of their special pleading.

The value of these exhortstions is debatable. Some groups are clearly playing to the gal-lery—designed more to please their members than to influence the Chancellor; others, recom-mending, for example, wholesale abolition of a main tax. have never understood the art of the possible; others hold what can only be called idiosyncratic views.

On the other hand, the detailed technical recommenda-tions of some leading institu-tions are likely to be received with attention and sympethy as well as courtesy. Detailed examination of the submissions which are released

to the press does show that tax pleas, like hemlines, are subject to the vagaries of fashion. This year, for example, the capital taxes take the lion's share of the pre-Budget pleading; stamp duty is another from runner. Of course, it is true that efforts have been made before to change the Chancellor's

mind on these subjects, but perhaps it is the scent of victory in the air that makes these Exchequer's mail bag is in the air that makes these weighed down with submissions particular topics such favour-from a welter of organizations, ites.

The over-riding consideration, however, is to establish the principle of indexation. Indexetion, or at least an annual review of thresholds, is urged by virtually all the bodies making representations to the Chancellor for all taxes where it would be relevant. Capital transfer tax changes are

wanted by the Confederation of British Industry, the Law Society, Institute of Taxation. the Association of the British Chambers of Commerce and the Income Tax Pavers' Society which all recommend that the nil rate band should be doubled to £50,000; the National Council of Social Service has gone out on a limb asking for the threshold to be £100,000. They all want a reduction in the rates and most have asked for a revision of the thresholds.

The Country Gentlemen's Association wants specific extra relief for woodlands; the National Federation of Self Employed and Small Busi-nesses wants full relief where family businesses are passed on to the next generation; and the Engineering Employers' Federation calls upon the Chancellor to honour the Tories' rather optimistically state the tors, in particular to commitment in opposition to case for the reintroduction of tions on bed debrardicables. case for the reintroduction of tions on bed debrardicables.

urged in a variety of wayslighted by the economic straincluding its sholition recommended by the Consultative Committee of Accountancy Bodies (CCAB) which feels that it should be replaced by specific speculative and deve-

lopment gains taxes.

The Institute of Taxation prefers indexation and a new disposal exemption of £2,500, while the Law Society wants a fixed percentage increase to the assets each year. Tapering over ten years is recommended by the CGA and over seven by the Income Tax Payers' Society and the Chambers of Commerce exemption after 10 years with indexation before. Stamp duty is viewed with disfavour by both the Law Society and the Building Societies Association who recommended scrapping it on houses costing under \$50,000 and thereafter applying a modest single fee (0.25 per £50 the BSA says) on the excess-not the whole sum as at present

Mortgage interest relief now only available on loans of £25,000 and under should be allowed on loans of up to £50,000 say the BSA and the CGA. The Chambers of Commerce want no threshold and

Capital gains tax reform is Stock relief has been high-

tors and CBI both want action to cover temporary dips" in stock. The National Federation of Self Employed wants the deferred liability to become permanent when small businesses cesse trading and the Institute of Taxation thinks it unfair that claims for stock relief are not permitted. Capital allowances for com-

mercial as well as for industrial premises is one of the CBPs priority representations and it has the support of the National Federation of Self Employed and the Chambers of Commerca. Development land tax should be modified, says the CBI, sup-ported this time by the CGA which argues for the determent of liability to be extended to development for business pur-poses as well as industrial ones. The Chambers of Commerce think the tax should be scrapped and so does the Con-sultative Committee of Accountancy Bodies which thinks it unnecessary.

Windfall profits tax on banks and oil companies' profits is urged by the TUC, which has also asked for import controls. Value-added tax has its detrac-

Business Diary profile: Goldsmith and the Institute of Directors

For Walter Goldsmith, who became director-general of the Institute of Directors last July, tomorrow's annual convention is a new experience. British by birth and outlook, Goldsmith brings none the less a fresh eye to the loD, and to British business in general. He took on the IoD because

of annoyance of his country's reputation for poor industrial relations and performance. His own experience, he believes, shows that British companies can perform as well as any when well led. He came to these conclusions

in the Californian sun where belief in change, opportunity and self confidence come more naturally. Gold mith was there as corporate vice president of Black & Decker. An account-ant by training, he moved to the United States four years ago, having become managing director in his mid thirties (he is still only 42).

Black & Decker is one of those companies, like Mars and Procter & Gamble, whose products are better known than its management. He may have lacked City contacts (Black & Decker is not quoted in Britain). but he has run a successful company here. He is proud that Black & Decker lost not one day's production through an internal industrial dispute. He felt that he had reached his ceiling with Black & Decker and wanted to move back to

and the chance to spread his gospel led him to take up the loD's offer, even though it meant a salary cut by half.

Goldsmith stepped in after a sensational internal row be-tween Jan Hildreth, his predecessor, and the chairman at the time, Deny Raudolph (now vice-president) over whom staff report to. Hildreth is now a company director. Randolph was later dismissed as chairman of Wilkinson Match in another public row. Goldsmith has the advantage of being elsewhere at the time, and has been better able to cheer up the loD staff and help the institute look less silly as a result. The institute,

which was founded in 1903 is evolving from little more than a loss making luncheon club into an organization capable of accurately representing the views of more than 30,000 individual business leaders.

The CBI's constituency is of companies' and employers' associations; the British Institute of Management's patch is of managers rather than main board directors which the IoD takes care of.

The IoD had already developed a disrinctive voice on issues such as worker directors and company law, by the time Goldsmith arrived. He gives a lot of credit to his staff for this and continued with representations, formal and informal, on Britain partly because he topics such as the taxation of wanted his four children fringe benefits and industrial be educated here. This, relations legislation.

Industry in the regions

Optimism in the face of decline kong-made shirts. But it is a below that for the North

In a town that recently held a festival in honour of Samuel Crompton, one of its most famous sons, the news that one of the world's best-known textile names, now prefers to pin its hopes for the future on Lisnaskea instead of Lancashire has caused only mild surprise. Bolton—where two centuries ago old Sam invented his spinning mill and lined the

pockets of sharper lads such as Arkwright rather than his own —has, like most of Lancashire. become case-hardened to mill ciosures. The loss of another 280 jobs this May, as Tootal shuts its nineteenth-century Sunnyside weaving mill in Adelaide Street to concentrate on a £5m devel-

opment programme in Northern lreland, may be a personal disaster for some of the workers concerned but it is relatively small beer in a region that has shed almost 100,000 textile jobs in the past decade. Bolton's MPs have been making the predictable noises of shock and Mr Joe Quinn,

general secretary of the Bolton Textile and Allied Workers Union has demanded publicly: How many more closures are we going to have before Govern-ment decides to cut back on foreign cloth and yarn? It is a fair question to ask.

se the town's evening newspaper-itself first published in the mid nineteenth centurycarries a front page story about House of Commons catering staff being issued with Hongrhetorical one because Mr. Quinn is not alone in knowing a whole. However the textile closures are not aiready that the answer is lot", if not the lot. With its industrial an The rate of decline in textiles mercial base already divi in the North-west is a path leading to extinction well within with everything from order to electronics, Bolt

this decade. No one really expects that to happen but even men such as William Barnes, a former director of Carrington Viyella now chairman of the

national economic development committee for the spinning, weaving and finishing sectors, can still see some grounds for optimism—provided that the right steps are taken by government. But he freely admits that the North-west is bound to suffer-mony more mill closures. -So what of a town like Bolton, in the heart of the Lancashire cotton belt and with its grey statues to some of the industry's greatest men dotted around its town hall and elegant town centre crescents?

There is a paradoxical air of optimism about the place, a feeling that Bolton has come to terms with the fact that it must write off its textiles past and concentrate on the future; and that it is managing to do so with some success.

The latest figures for in-stance show that while nationally and regionally the number of unemployed was increasing, in Bolton there was a fall of 0.5 per cent, putting the local figure only marginally ahead of the national average, and well

Clothing industry's problems

From Mr B. J. Clayman Sir, I agree with some of the points raised by Mr Aler Smith of the Nazional Union of Tailors and Garment Workers in his letter on March 11. However, he fails to mention those sea sonal factors, weather and fashion, which create problems disassociated from both fiscal and extra-territorial production.

These problems have been

around for many years, and are executated by the industry's inability to moderate production in line with demand. This produces a glut of merchandise in an already soft market place, with predictable results.

The opportunity for employers and the union to get regether on this problem have been available since the late If there is a case for using 1940s. However, all that has been done has been to develop a series of wages councils for the clothing industry, that have done and are doing mose damage to the industry than any or all of the other internal and external factors that affect us.

Yours faithfully, B. J. CLAYMAN, Director, Kingagate (Clothing Produc-tions) Ltd. kingspare Works, The Pinnacles, Harlow, Essex, CM19 5AS.

Standardization of video equipment

From Mr W. H. Fulton

From Mr W. H. Fulton

Sir, I would be grateful if I could record a slight, but very significant, amendment to the article in The Times Business News of March 14, based on an interview with Mr Akio Morita, chairman of Sony Corporation.

It could be construed from the article that Sony is currently conducting negotiations on standardization of video cassethe recorders with video cassette recorders with

smother unnamed manufacturer of home video equipment.

On Mr Morita's behalf, I would like to state that the negotiations to which he referred were held some years ago and that they were inconclusive. No such negotiations are currently in hand or nlamed.

planned. Yours faithfully, W. H. FULTON, Managing Director, Sony (UK) Ltd., Pyrene House, Sunbury Cross, Sunbury on Thames, Middleser

FINANCIAL NEWS

Autumn sales help Church footwear

By our Financial Stuff

expected. second-half As results of the footwear company Church & Coupany were not as good as those recorded during the first half of the year to end-December 1979—though the company still achieved a 17 per cent improvement to leave profits for the year some 20 per cent better at a record \$3.11m pre-tax.

With successful autumn sales helping to counteract the adverse effects of higher prices and the increase in VAT, turnover in fact rose by more in the second half of the year than in

A sharp reduction in the tax charge (thanks in part to stock relief stemming from leather price increases) has left auributable profits almost £1m higher at £2.55m; and the directors have, as promised at the time of the interim, substamially increased the dividend-in fact the total has been more than doubled to 7.5p net, at which level it absorbs £391,000.

The directors have commis sioned a revaluation of free-bold properties, which has thrown up a surplus of £2.8m. Ner asset value is in conse-quence increased to 263p per share, which means, as the the first six months, and ended 22 per cent higher overall, at shares are selling at a 28 per 529.32m.

Gundry Bridport's profits dip during the first half

Despite an outstanding per- subsidiaries up into identifiable formance from the subsidiary supplying civil and military air freight nets, profits of the netting and cordage manufacturing company Bridport Gundry fell during the six months to the end of January.

However, the company points out that profits—£309,000 pre-tax, as against £324,000 in the corresponding period—were close to budget, and that some reduction was to be expected because the comparable total was swollen by early shipments. Nevertheless, the perform-

Nevertheless, the performance of the operating subsidiaries was, the directors say, uneven, with the fishery side, in particular, suffering from low demand. Over the longer-term they believe that there are further benefits to come from splitting the operating

remain uncertain until at the Chancellor's speech Wednesday. OC

This week

Insurance companies dominate proceedings this week with full-year figures from the Prudential Corporation on Wednesday, and Eagle Star Holdings and Alexander Howden Group on Thursday. Other companies of general

interest reporting include dis-tillers Arthur Bell, and from the Car industry the Appleyard Group of Companies and Lucas

Industries.

With all eyes in the market focused on the Budget on Wednesday, economic indicators are fairly thin on the ground. The only figures of any consequence arrive before the Budget with the retail sales from the Department of Trade today and the unemployment figures from the Department of Employment

However, on the equity front Prudential issues it annual statement on Budget day. Analysts are predicting heavier losses on the underwriting side as a direct result of bed weather and one or two disasters during

last year. Mr Peter Martin of Capel Cure Myers expects the group's net surplus to rise from £41.2m to about £46.2m, helped by an improvement on investment in-

This should have risen from 17ms should have risen from 127m to £31m, a rise of 13 per cent, but will have been offset to an extent by heavier losses in its underwriting business. This might have risen to about £10m compared with last year's £42m.

Mr Martin has worked his net surplus out on a per charge of about 30 per cent, but this will vary depending on how large the underwriting losses are.

Life investment income will be a surplus of the content of the co have experienced a small rise at about f8m compared with

£7.8m last time.

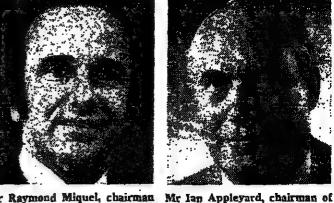

A dividend of 15p gross, which would be a rise of 1.7p over the corresponding period,

Analysts are going for a moderate increase in pretax

Prospects for the current year remain uncertain until after

Most observers are now re-signing themselves to an

Mr Raymond Miquel, chairman

increase in duty with the average figure of 80p a bottle being quoted. This would do little for the group, which is heavily reliant on the home market. Full-year profits of 5194m, compared with £16.8m last year, would seem to be on Finally on Wednesday, full-

year profits from the Apple-yard Group of Companies are presented and are likely to repeat the pattern established at the balkway stage when profits fell from \$1.27m to \$988,000.

Analysis believe the group will have made up little of the leeway from the first half with profits this time dropping from £1.9m to about £1.4m.

The problems of the first half.

arising mainly from the troubles at Britins Leyland, will have been compounded in the second half by the rise in interest rates. Nevertheless, the group's Ford franchise continues to prosper. Last year the group's non-Leyland activities accounted for two-thirds of group profit

and are expected to show a further increase this time.

Still in the automotive industry, interim profits from Lucas Industries on Thursday will reflect the scars inflicted by the engineering strike last year. This should account for a loss of about 220m, a figure much higher than that which arose from the Ford strike duing the corresponding period.

As a result pretax profits have been downgraded from the previous year's £24m to about £18m-£19m. On a brighter note demand for the group's diesel car, particularly on the Continent, remains strong, although the strength of sterling and pressure on margins remain de-

pressing factors.

Despite this, last year's dividend of 3.6p gross should be meintained with expectations for the present year ranging between £62m and £70m, compared with £73m last time. TODAY,-Interims :- C. H. Beazer (Hdgs), Br. Car (Hdgs),

can exert a crucial influence by demonstrating concern for long-term growth, and by giving sympathetic consideration to relevant requests for revenue and capital.

and capital.

If company directors followed
Dr. Parker's guidelines they
would obtain a forecast of the
expected financial benefit, cost
of achievement and the time
needed for completion for each new idea.

The most commonly used financial method of evaluating new products is, he says, the discounted cash-flow approach which estimates cash in-flow and out-flow from which is cal-culated the net yield. However, this method must be used with discretion of conditions of high risk and high inflation.

Once a forecast is obtained it is then up to the directors to select the best ideas and in-corporate them in a board strategy which is in line with the group corporate plan.

The problem is that initial

estimates are often innacurate.
Dr Parker found that benefit
estimates are commonly as
much as three times too high,
while both costs and duration while both costs and direction exceed early forecasts by a fac-tor of two. Once work begins, forecasts continue to improve with time and become reasonably accurate half-way through

the life of the project.
To counteract the consequences of this de recommends that new projects should be evaluated after the design studies are completed. Once under way, their status should be examined regularly and a deterioration not allowed to

Attention should be paid to changes which are innovative as well as to those which are evolutionary. In Parker said thet the difference becatae clear to him only after he had reviewed the highlights of 15 years operation of a research and development laboratory. When historic data was correlated with development re-

ay only lip service to querters, because of its relative changes had a positive effect to guidelines just be aware of this sequence and p the British Institute gement.* Yet few company's group head-cords it showed that innovative changes had a positive effect in reducing costs white evolutionary developments merely produced a plateau. Before the growth is needed to overcome review he said that he had these crisis periods. Indeed they velopment work was probably as efficacious as innovation. Innovation is based on in-

Innovation is based on in-spiracion drawn from two cen-turies of scientific progress, and tends to start at the tech-nical level and proceed to commercial exploitation. Evolu-tion on the other hand gives greater heed to painstaking analysis and synthesis and normally starts with technology, although it may need to involve science once the obvious solutions have been exhausted", he wild.

It is important to use fore-tight in planing new products. Action must be taken which will extend beyond the normal five-year plan of corporate planning.

Every company division and all management levels should be involved. The aim should be to embark first upon low cost innovative strategies to build up profits and reach a level that will allow resources to be

reward endeayours.
One distinguishing feature which Dr Parker found in successful companies was that the senior boards publish their future plans overtly and clearly spell our their policy on the marketing of new products. In this way, he says, awareness of the executives' thinking permeates the organization and increases the likelihood of

Among the guidelines for innovation in research and development is that companies should search for benefits from technology transfer and should periodically re-assess earlier unsuccessful attempts to introduce novel rechniques. *Guidelines for Product Innova tion by R. Bill Johnstone looks at a manufacturing

Board meeting of Young Enterprise Craft.

Youth gets down to business

board all under 19 years old, but the entire venture has been launched with £100 worth of capital raised by selling 25p shares to its employees.

The company is one of the Young Enterprise projects designed specifically to assist young people in gaining experience in business. The idea rook root in the United Stares in the 1920s and proved to be such a success

the individual states in which it had been practised that in 1941 a national campaign was launched called Junior Achievement. In 1959 while on a trip to America Mr Walter H. Salmon,

a London merchant banker,

was so impressed by the results of the scheme that he tried to bring the idea to Britain. Brighton has had a number Parker Street, London WC2. Price £2 to members and £3 to of arrempts at using the scheme but the present company, which for legal reasons must be put into liquidation after only seven mouths has been one of the most successful projects to

> In effect every aspect of company life is experienced by the members of the group. Before its formation four months ago virtually none of the group knew each other but within weeks, in response to advertisements placed by Young Enterprise and their sponsors, two dozen people came together as the embryo of the venture. From the beginning all the stages of setting up a company and running it had to be experienced. The first of those stages in deciding who would do what within the company, what product they could produce within

Young Enterprise Craft of market would they be trying ment described as "non-uniform product resulting from product resulting from product resulting from people just doing their thing".

The reminiscences of the members of its workforce and directors and the workforce are based all under 19 years old, and dissimilar to those expected

not dissimilar to those expected from the lips of hardened cam-paigners who had been running some multinational corporation. Although the social element has not been divorced from the exercise, all the activities are performed with real serious-Those early days gave the group their first taste of com-

pany politics and industrial relations. Steven Mooney, the managing director, a 19-year-old apprentice who works for Kearney and Trecker Marwin, one of the sponsors, remembers: "We had to stand up in front of everyone it we were running for a particular office on the board and justify how we were best suited for the we were vest since for the job." There was no secret ballon-all the board members were chosen on a simple show of hands. Marketing, production, accounting and administration of the production tration are all represented at board level and all directors holding those positions have to be voted into power.

Four months ago, after selecting its board, Young Enterprise Craft was raring to get started. However since the company only comes together for two hours each week and all the employees have commuments to school or college, the type of product they were able to select or design was strictly limited. Their own market research con-firmed that simple products for the tourist market of the south coast would be ideal.

They designed and built small ornamental rocking chairs from clothes pegs which although selling well were to present the board with its first personnel

their limited means and what producing what the manage-

force for a realistic wage agree-

force and board it was agreed to introduce a bonus scheme while at the same time redesigning the product to ensure uniformity—and the sanity of the company's work-The result of much debate

After discussions with work-

and many trial models was the design of a circular table mat, again, destined to attract the tourist market of the south roast, but its production techniques were to prove more configuration to assembly line. satisfying to the assembly line. The early lessons experienced by the group were basic man-agement skills, selling produc-tion and the subtle art of industrial relations.

All the problems such as investment in the company are scaled up but are no less real.

Even the division of management and shop floor is a reality and one which is readily admitted by the board in sentiments professed by every company manager in the world is "Do you know that the workers on the assembly line actually think we do nothing when we have a board meeting?" one said. Those meetings are held

every formight and to allow as many as possible to experience decision-making at that level, the board is changed in composition after about three months. Sessions are conducted with professionalism and seriousness where any suggestion that would identify the venture as

Production figures for the selling well were to present the board with its first personnel problems.

The work force became bored and therefore careless, producing what the manage-

artificial is never aired.

product involve all the direc-tors who, like their counter-perts in professional life, balance the arguments of availability, cost and quality of the pegs purchased against the cost of production and its possible recovery in the wholesale price of the product.

What do the members get out of the venture and what has morivated them to join? Obviously the social aspect has greater prominence now that the employees know each other a little more but again no more than one would expect from relationships formed in a normal company environment.

All two dozen are either pupils of Cardinal Newman, Hove Park or Blatchinton Schools or apprentices working in local industry. The three apprentices, Stephen Mooney, John McBride and John Downward are all employees of Kear-ney and Trecker Marwin and members of the board of Young Enterprise Craft. All admit to joining the company to learn about business and to add to their curriculum vitae when applying for a job.

To ensure that experience is made available, the company has a steering committee made up of local educational and business interests while the Young Enterprise provide all the documentation and procedure manuals which give out-lines for the directors to run the company.

The sponsor provides mangement, training, premises for the new company to operate from and the finance for the documentation. After seven months when the company goes into liquidation, the employees sit an exam to assess how much they have learned. Then the exercise begins again with a new batch of young recruits eager to find out at first hand the traumas of management and

A subtle blend of science and management

The treatment of invironmental issues with in a company is to be examined at a one-day conference at the Royal Society in London in April. The confer-ence, which is being organised by the Operational Research Society of Birmingham, will ex-plore how this type of research can contribute to the produc-tion and utilization of energy. Operational research (OR),

Operational research (OR), according to Dr Roy Stainton, a spokesman for the society, involves "the application of the merhods of science to the complex problems arising in the direction and management of large systems, materials and money in industry, business, government and defence, health and welfare".

OR techniques are used in the control of North Sea oil revenues, industrial profit planning, stock and production control.

The society, also is looking into the effects of money supply on economics and the implications for business management; what use accountants make of OR; and the use of OR in energy conservation and control.

Fifty per cent of The Times
Top 100 Companies do not bave
their own OR units and the OR Society is planning a pro-motional campaign to en-

courage the setting up of new courage the setting up of new OR groups and revive those that are ailing."

The society has recently completed a "diagnosis of the current state of OR in the United Kingdom" and it has appointed Dr John Ranyard as supervisor of its "drive on the organization industries." engineering industries.

According to Mr Rick Whiteman, a member of the society who works for the National Westminster Bank in Bishorsgate, the market for OR is greater among accountants than bankers, because bankers are a closer, tightly kuit group, many of whom are aircredy using OR techniques, while accountants have to cope with the more diversified and widespread problems, thoughout in-dustry, for which OR solutions

are still being found. Operational research techniques enable managements (and governments) to exercise choice between the various options and energy mixes open to them. For example, the de velopment of a fully informed energy policy, and of the most efficient techniques to analyse and control it is, the society believes, a metter in which companies and governments are becoming increasingly inv-

Freight

Argentina is Russia's only source of grain

Russia's grain buying from Argentina which has weakened considerably the full impact that President Carter's sales ban might have had, came under the spotlight last week as Soviet chartering figured prominently in the dry cargo market.

The United States Department of Agriculture also released some estimates of the extent of these purchases.

Based on Japanese sources, the United States estimates that as of March 17 Argentina has sold some 2.5 million tonnes of grain and soya beans since the ban was initiated in January.

Prior to this action, Russia purchased 4.5 million ronnes of grain and soya beans, making a full total of seven million tonnes for this season, as against the previous season's sales which were in the region of 2.6 million tonnes.

With most grain producers supporting the Carter ban, Argentina has become the only source of grain for Russia to fill the gap in its needs. The United States department puts Argentina's total exportable volume of grain at eight million tonnes which, if all taken by the Soviet Union, will still leave a big deficit. However, it is hig deficit. However, it is helieved that further purchases are being made in the resale

To cater for the Argentine shipments. Soviet charterers were active chartering tounage mainly for transatlantic round trips. While full details were as ever difficult to come by brokers indicated that at least 10 vessels were booked.

All but three of these were All but three or these were in the 35 to 46,000 ton range at rates of between \$11,600 and \$12,500 a day. Terms were generally on the basis for a north or South American round trip with delivery in the Mediterranean or European continent and redelivery in the Cape Passero (Sicily)—Skaw

(Denmark) range. This Soviet activity combined with other time trip chartering and period fixing-largely for between one and two yearsovershadowed voyage business. Grain fixing was quieter although rates remained as firm as ever. North Atlantic bookings included \$16.90 and \$17 being paid for carriers of 72-75,000 tons from the United states Gulf to the Answerp/

Hamburg range. Shipments to Japan secured \$25.75 to \$27.55 for vessels from 30 to 51,000 tons with loading in the United Gulf or North Pacific

In the oil trade the picture is much bleaker and here all the signs of a depressed market are displayed. Demand for Inconesian crude continued to be

the one strong point.
The Gulf is weighed down with substantial surplus ton-nage, including some 30 vices, keeping rates at rock bottom level. Some tankers are reported to have reduced crews on board until fixed and resistance among owners to the appelling

in increasing. A few owners are understood to be refusing to accept business for vices at below world-scale 45 whereas the current going rate is worldscale 30. By all accounts they could be in for a long wait.

Another indicator of the poor times is that inquiries are being made about time chartering vices for periods of up to two

'Overall 1980 will be a tough year for the rubber sector'

Demand for rubber during 1980 will be hard hit by the recession according to the Economist In-telligence Unit's latest issue of Rubber Trends.

The report says that latest figures indicate that the experted slowdown in demand is now taking place. Figures for the third quarter of 1979 show that world consumption rose by only 2.5 per cent in this period, com-pared with a growth in demand of more that 6 per cent in the first half of 1979.

Figures for the fourth quarter are not yet available, but it is believed that this downward rend has been accelerating and a growth of only 2 per cent have been recorded in the Octo-ber to December period.

Tyre sales have been badly hit in most Western countries, particularly in the United States and the United Kingdom, says the report. New car sales have been very disappointing in the United States and the latest indicators show that new registra-tions during 1980 may decline by between 15 and 20 per cent.

In addition, with the rising price of oil, the average mileage per car has been falling and it is believed that the demand for replacement tyres has been, and will be, declining significantly.
The EIU's forecasts for 1980

have been reduced and it is now expected that rubber demand will show minimal growth during the current year.

The first half is expected to be particularly difficult with a growth in demand of only 0.5

per cent. A small recovery is expected in the second half of the year but, "overall, 1980 will be a tough year for the rubber sector and particularly for synthetic producers."

The report says that the level of stocks is likely to increase and overcapacity in the synthetic sector will become quite

of synthetics (which were already quite high at the end of 1979) will increase further and, in view of the uncertain level of demand, production of synthetic rubber will be limited possibly to show an increase

of less than 2 per cent. The price of synthetic rubber will undoubtedly continue to rise, it is stated, since the latest cost increases for naphtha and other raw materials have not

yet been taken into account. Due to the depressed level demand, synthetic rubber

Commodities

ful to limit their increases and, as in 1979, will raise their prices by gradual stages. It is believed that currently their margins are fairly tight and in order to absorb the current cost rises, synthetic producers are likely to pur up their prices by at least 25 per cent over the next 12 months."

The report notes that con-siderable speculation has been going on in the natural rubber sector, partly because of poli-tical and economic uncertainries. In recent weeks, it is pointed out, the price of RSS 1 spot has shot ahead but, due to the poor level of actual demand for rubber, these price levels have not been maintained.

"It is believed that on economic grounds, a price of between 70p and 75p per kilo can be justified in the short term. Over the longer term a rise of about 20p per kilo is quite possible. Normally the price of natural rubber moves fairly closely in line with syn-thetics and, if cost pressures

cause the price of synthetic rubber to move ahead, RSS 1 is likely to follow suit.

"Naturally, these forecasts have to be treated with some caution because of the various conflicting factors affecting the rubber sector. For one thing, overall demand is weakening considerably, but this is coun-terbalanced by political and psychological influences which

are, obviously, difficult to fore-

cast at this stage." On the marked decline in the level of demand for tyre products, the report says that latest figures for the United States indicate that shipments of tyres for passenger cars fell by 16 per cent in September and 11 per cent in October compared to 1978, while tyres for trucks and buses also declined by an average of 15 per cent during this period.

The only area which held up reasonably well was the tractor tyre sector, but this is a relatively small part of the business and cannot be compared to the importance of passenger car tyre shipments.

The fall in car tyre demand in the United Kingdom was also significant. In the third quar-ter of 1979 the number of units sold in this sector amounted to 5.8 million. Other sectors, such as commercial vehicles and tractors, held up quite well but it is believed that sales of tyres for commercial vehicles have eased off during the remainder

In other countries the picture or tyre products was mixed. understood that tyre de mand in Japan and Canada has been reasonably satisfactory. In France and West Germany the growth rate has fallen significantly, but demand was still somewhat higher than in 1978.

New jump likely in prime rate

Prices of longer-maturity Eurobonds were marked down by between 1 and 2 of a point on Friday as investors realized that the rally observed in midweek was essentially technical and that Eurodollar interest rates are on their way up again, crites AP-Dow Jones.

Market participants said they see no reason to expect things will get any better this week. since the consensus is that another round of prime rate in-creases by United States banks

Many bankers said they were surprised when the market did not weaken early last week after the announcement of anti-inflation measures by President Carter, since they felt the measures lack teeth. Some said they had seen some short-covering bargain-hunting and very little

selling interest. Typifying the market sentiment was the weekly bond marthe market charterers were becoming more reluctant to reveal fixture details.

ket telex from Merrill LynchIt said: "Yet again, a major United States policy initiative has failed to mention—let alone attack-the fundamental problem of the supply of modey.

"The short-term implications look to be a liquidity squeeze for the banks in the face of increased reserve requirements and tighter administration of

was not considered that the Carter package would make any dent in inflationary ex-

pectations nor that the long end of the bond market will escape a further decline in Contributing to the generally

depressed market sentiment was the news on Thursday after-noon that the United States Treasury will offer shortly a huge \$26bn in securities. This sent bond dealers running for shelter, and some long-

maturity bonds on the United States domestic market fell by as much as two points

Euromarkets

Another factor behind the comparatively buoyant tone of the market early in the week was the lack of new issue activity. This support dis-appeared in mid-week with the announcement of a GWPP \$1m floating rate note issue for Ciricorp Overseas Finance Corporation and expectations that the Kingdom of Sweden will come to the market this week end of the year at the bor with a mammoth \$500m fixed rower's option.

Mining

Nobody, to my knowledge, has eaten a diamond and found it nourishing. Gemstones are the epitome of a luxury product: beautiful, decorative,

expensive, and useless.

De Beers is probably the largest company in the world whose fortunes are founded on such a commodity. Since people can manage without diamonds, De Beers's profits suffer when prices and interest rates are high.

That in essence is why the company's most recent full-year pretax profits of R1,106m (£614m) represent the first fall since 1974. It is also why sales by the Central Selling Organistion are likely to be in the current financial year. But De Beers is a highly unusual company for other reasons as well. The CSO, which was set up by Sir Ernest Oppen-heimer. Mr Harry Oppen-heimer's father, and which is effectively controlled by De Beers, unashamedly regulates the market for diamonds

Mr Harry Oppenheimer that controlling the argues that market by fixing the prices of about 80 per cent of all diamonds sold wholesale is in the interests of everyone involved. To the extent that many producers, including the Soviet Union, sell stones through the CSO his case appears to command widespread

The second obvious point about De Lears is that it mines so many of the stones marketed through the CSO. If one takes world diamond production to be between 47m and 48m carats a year, the CSO sells about 38m carats. De Beers digs out about 12m carats a year, 7.5m from South Africa, So the company provides, from its various sources, a quarter of all CSO

Equally important, De Beers is the only diamond producer in the world able to finance large stocks for a significant period. The latest consolidated balance sheet shows assets of R2,441m (£1,364m). Diamond stocks are worth R409m, some 60 per cent more than in 1978. and net current assets amount to R787m, about R100m less than in the previous year.

The real secret of De Beers's power in the market is there- effective deterrent to anybody fore not its production or con-misbehaving in the diamond trol of the CSO-though both market. As the speculators dis-

clients to make up their own minds.

After the fluctuations of the past fortnight, which left the price at \$525 an ounce on Friday, it would also be wise of me to keep my mouth shut.

But I want to bazard a brief assessment of

the position nevertheless. First, the fundamental

adjustment of gold to other prices seems to have been achieved. Since, however, some of the political reasons for the excitement earlier

disappeared. Afghanistan, the hostages in Iran, the outcome of the American presidential election, the future of détente—the trading range is erratic and hard to determine.

steel unions to implement their strike within the private sector has lead Mr Peter Cooper and David Butler of brokers Heury Cooke, Lumsden to take an-other look at the sadly-neglec-

sector appears to be ending. After a four-week strike they have had to make quite significant reductions in profit forecasts for steelmakers. Hadfields, part of Lourbo, have estimated that the strike has cost them over film and should be regarded as a good guide. This as a result has brought into question already thinly covered

The steel strike has also had sumables such as ferrous scrae and mill rolls and of capital plant, they add. But so far it has made little impact on BSC's own customers. The engineering strike last year resulted in heavy overstocking and BSC was able to give sufficient warning to its customers of the impending strike to allow them to build up their reserves.

In the present gloomy eco-nomic climate it has been proved that the payment of maintained dividend can no longer remain sacrosanct. But there are several companies with high yields based on actual or confidently expected dividends which are adequately

A fresh look at engineering by reasonably assured earnings recovery which they recom-mend. These include Associated The apparent failure by the

Engineering, John Brown, Hop-kinsons, IMI, Lake and Elliot, Northern Engineering and Tube. On the recovery scene they recommend Bridon, Stone Plant and F. H. Lloyd, although the latter is described as specuted engineering sector. The strike in the private

and Canada will not last long.

lative. Finally they recommend Myson Group on the back of a buoyant home improvement market with buy labels on T. W. Ward and Ransome Hoffman and Pollard where there is further room for improvement The better than expected full year figures from Cadbury Schweppes recently, have earned

Brokers' views

it a buy recommendation from Mr Keith Hann of brokers Capel Cure Myers,

Now that the company hasdelivered the material profit improvement it promised last year, Mr Hann believes the company is destined for better

He states that the recovery was based on a sound long term strategy rather than a short-term policy of profit maximisation. So that now there is potential for continued above average profit and dividend growth over the next two or covered by current results, or three years.

The current rating he Is undemanding, with a cu-p/e in line with the market a 35 per cent yield pren and gives the group little co or its prospects.

Elsewhere in the food se Rowe & Pitman's Ste Carr feels that the share British Sugar Corporation look overly depressed recommends them as a buy He points out that the re results were up to expectat with pre-tax profits up 27 cent at £32.5m, on turnove per cent higher at E381m the ner dividend being creased by 45 per cent.

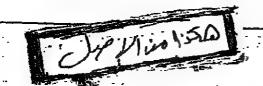

However, he warns that ing fuel costs, labour interest rates and the pres on sugar prices as the comp aims to further increase market share can be expen to cut profits in the curl

But from 1980 some of additional fuel costs will absorbed by the farmers not the corporation. Farm will also bear their share of "B" quota levy and any falthe the debt/interest burden. A question mark continue

hang over the renegotiation the EEC production quotas.

Mr Carr feels it is unskely this will have any implessed. before the 1980/1981 crop y Michael Cha

"In 1979 the Group continued to make good progress in its development as a leading world-wide banking organisation."

Robert Leigh-Pemberton, Chairman.

International bank has continued to be at the heart of our strategy and in this context we welcome the management and staff of the National Bank of North America to the Group. However, the greater part of our earnings is still derived from the Group's UK operations. Interest rates were a dominant factor in 1979 but income from other sources continues to increase. This is a key objective, for there is every sign that costs will continue to rise and we must remain profitable at interest rate levels considerably lower than those which obtain today."

International In the ten years since we defined the strategy to develop National Westminster as a diversified international banking organisation, not only has the contribution from international activities increased significantly but total international assets have grown from £1 billion to over£12 billion. There was an 18% increase in earnings from international business in 1979; this sector produced over£100 million towards Group profits—a significant milestone—despite high levels of liquidity in the international markets which created increased competition.

The substantially increased volume of advances and an active foreign exchange market were both factors in the improved performance.

Immediate steps have been taken to ensure the integration of
National Bank of North America into
our Group strategy. A significant
early development has been the
acquisition of a further 16
branches to complement the
existing network of 141
branches.

United Kingdom There was a significant increase in volume during the year, both in our banking activities and in our other operations in the UK. We have improved our range of services, with special attention to the needs of small businesses, by introducing schemes in conjunction with the Council for Small Industries in Rural Areas (CoSIRA) and the Welsh Development Agency (WDA). We have also introduced a scheme to provide venture capital through a new subsidiary, Growth Options Limited.

Within the limitations imposed by Government restrictions on the growth of the money supply, we have given priority to customers requiring finance to increase exports and to reduce imports.

The main UK subsidiaries all expanded their operations. Lombard North Central increased its total new business by 40% over 1978; Isle of Man and Ulster Banks achieved good profit growth; County Bank significantly expanded all its services, particularly in the international field.

Social Responsibility Our social contribution as a Group rests primarily on the effective performance of our role as a major financial institution. As instances, we have sustained many businesses through a difficult year, and have financed a significant part of the North Sea oil development.

We sponsored a major new campaign entitled 'Action Against Grime', launched in association with Age Concern, which is intended to help elderly people avoid the dangers of violence and fraud, and to assist those who unfortunately become victims.

Through our project known as
'National Westminster Enterprises,
we made over 100 experienced staff
available for extended periods to a
wide variety of charities and other
organisations, to assist them mainly in
their administration; the direct cost to the
Bank was in excess of S1 million. The
number of staff on secondment will increase
substantially in 1980 in response to the
challenge to the private sector represented by
public expenditure cuts. We shall also increase
substantially our expenditure on sponsorship
and support of community projects.

Salient Points from the Chairman's Statement to Shareholders

Pre-tax profits expressed on an historic cost basis show an increase of 44% over 1978 at £441.5 million. Adjusted on a current cost accounting basis this reduces to £285 million.

Development necessitates a sound capital base and, whilst retained profits form an important element in maintaining the Group's capital structure, steps have again been taken during the year to supplement capital resources through additional loan issues to keep them in line with the requirements of our expanding operations.

Removal of dividend constraints has enabled us to declare an increase in distribution which goes some way to restoring the loss in purchasing power which our shareholders have had to bear since restrictions were introduced in 1971.

A slower growth in advances and current account balances is expected in 1980 because of the current tight monetary policy.

There is a strong demand for our services and we have an excellent basis on which to build. Our resources will be directed to seek out new opportunities and to strengthen and widen our relationships with existing customers.

Our Business Development Loan Scheme now extends to terms of up to ten years and amounts up to £100,000. We now operate a fixed rate lending scheme for larger amounts and for cases where more flexible repayment arrangements

Figures taken from the Group's Accounts 1979

£234 million Ordinary share capital £1,306 million Reserves Current, deposit and £26,542 million other accounts £18,115 million Advances Group profit after allocation to staff £441 million profit-sharing £112 million Tax Retained profit £289 million

Copies of the Report and Accounts, which include the Chairman's Statement, may be obtained from the Secretary's Office, National Westminster Bank Limited, 41 Lathbury, Landon EC2P 2BP. Working with Export Credits Guarantee Department the Bank has financed, and given bonds in connection with, a substantial number of large export contracts.

Abolition of exchange controls has presented many new opportunities and the Group has the necessary skills to advise both companies and individuals on these points.

The second decade of National Westminster Group, which we are now entering, will bring significant technological advances. We shall take advantage of developments to ensure the most economical use of our computer centres and to automate many activities in our operations.

The first phase of an on-line computer operation for the NBNA branch network will be completed in 1980 using National Westminster's experience and expertise.

We have continued to obtain lead management roles in syndicated currency loans. County Bank has enhanced its reputation by participation in currency lending and in Eurobond management.

Further examples of our social responsibility programmes are Project Respond, a community award scheme for secondary schools, and Matching Support, under which members of staff can obtain funds for charities and community organisations in which they are actively and voluntarily involved.

Public and Educational Appointments

Also on Pages 6 and 25

As a result of the appointment of Mr. Anastasios Christodoulou, C.B.E., M.A., as Secretary General of the Association of Commonwealth Universities; the Council of the Open University invites applications, from men or women, for the position of

of the University, subject to the direction of the Vice-Chancellor. The University has a full-time staff of some 2,500 and approximately 80,000 students and operates throughout the United Kingdom through 13 regions.

Further particulars of the post may be obtained from: Dr. Lindsay Young, Vice-Chancellor's Office, The Open University, Walton Hall, Milton Keynes,

MK7 BAA. Applications must be received by 30th April, 1980.

Solicitor's Articled Clerk

A vacancy has arisen in my Department for an Articled Clerk Immediate applications are invited from Graduates who should preferably have obtained passes in at least five Heads of Law Society's Part II Qualifying Examination. The successful applicant will be articled to the Solicitor to the Council, and will have the opportunity to obtain wide experience in a busy legal office.

Commencing salary, depending upon age and qualifications, but minimum salary at age 21 vears will be £3,477 p.a. inclusive, with a qualification bar point at £3,894 p.a. inclusive, rising to a maximum of £4,383 p.a. For application form write to J. J. Warren, Chief Executive, Town Hall, East Ham, E6 2RP or telephone 01-471 0619, night or day, in both cases quoting reference ADM/B/AC.110.

Closing date of return of completed forms by 21st

BEDALES SCHOOL Petersfield, Hampshire, GU32 2DG

MATHMATICS - COMPUTING

We think to appoint for September, 1980, a well-qualified mathematician with concuting experience to help with the continuing development of computing within the School. This is an opportunity to join an active team in a reporty expending area of the curriculum. This ability to teach Mathematics to Open Scholarship level would be an

ability to space transfer or open serious and present aged 11-18. Seclates is a co-educational school of 450 students aged 11-18. Statematics is taught in purpose-built facilities and present equipment includes 3 computers housed in their own room. The successful applicant will be a person prepared to enter fully into the life sur application with the a person prepared to enter only fixed the line of a residential school.

Salary. Scale 1 Surmium plus. (The appointee who made his/her mark would quickly be considered for a Scale 2 post.) Accommodation is usually available. The Headmaster welcomes applications (letters—no forms—including curriculum vitae and names of three referees) and will send further particulars.

LONDON REGIONAL EXAMINING BOARD ASSISTANT SECRETARY

£7,173-£8,229 (Increase Pending)

Applications are invited for the post of Assistent Secretary. Applicants should here substantial teaching experience in Secondary, Further or higher Education. Administration experience is desirable. Forms and further details should be requested by postcard from the undersigned (or telephone 01-270 2144). Closing date 15 April 1990.

D. H. BOARD, MA. Secretary to the Board, London Regional Examining Board,

194 Wandsworth High Street, London SW18 4LF.

UNIVERSITY OF OXFORD NISSAN JAPANESE LECTORSHIP

The L'aurenty proposes to appoint the first Nitsain Lector in Japanese to hold office from 1 October, 1980. The Lector is to exist with all forms of modern Japanese toaching union; the direction of the Board of the Faculty of Oriemal Studies the Lector will be expected to assist in college tearthing up to a maximum of a hours a week (which will be paid separately by the colleges) in addition to the maximum of 8 hours teaching por week for the Jardity board. Applicants should have a metire command of Japanese and experience of teaching Japanese as a foreign language. The post is teached for one year in the first instance, ronewable for one tear in the first instance, ronewable for one iterater 2017 only. Salary is a the first instance, ronewable for one tear in the first instance, and the instance of the first of the salar would be subject to any account of the Feculty of Oriental Salarity and the panet of two referees should be sent in the Secretary. Board of the Feculty of Oriental Salarity. Page Lane. Oxford, OXI 2LE, to arrive not later than Monday, 12 April, 1980.

University of Strathclyde LECTURESHIP

IN the DEPARTMENT OF COMPUITE SCIENCE from graduates with suitable qualifications in Computer Science or Electronic Engineering. The past is to be filled in commortion with a new degree course entitled in commortion with a new force of the pattern to those with experience in one of more of the following: Logic and flartware design, Systems and Communications programmage of programmages. LINGUISTS

Joint Technical Language Service

Posts at Cheltenham, in the Linguist Specialist Class, requiring an interest in the practical applications of language. Vacancies are expected to be for linguists offering Arabic, Czech, Greek, Persian, Russian or Turkish. There may also be vacancies for candidates offering a non-European language other than Arabic. Persian, or Turkish; and for candidates, preferably but not necessarily offering Germen, to be retrained in one of the languages mentioned. Evidence of capacity to learn difficult languages will be looked for.

Candidates should normally be aged, at least 20 and must have a thorough knowledge of one or more appropriate foreign languages, such as is provided by a degree or by relevant experience. Those taking hnal examinations for an

appropriate degree in 1980 may also apply. Appointment will normally be to the

Assistant Linguist Specialist grade, but successful candidates with at least 3 years' relevant experience may be appointed to the Linguist Specialist grade. SALARY (under review): Linguist Specialist £4,765—£6,150; Assistant Linguist Specialist £4,200—£5,700. Sterting salary may be above the minima. Promotion prospects. Non-contributory pension scheme.

For further details and an application form (to be returned by 25 April 1980) write to Civil Service Commission, Alencon-Link Basingstoke, Hants, 8621 1JB, or telephone Basingstoke (0256) 58551 (answering service operates outside citice hours). Please quote ref 389/S/80.

me as title-chasing boxer, Kenny Fox in the third the family saga, Fox (ITV, 9.00)

w that's over—the British Academy Awards, I mean—Budget to look forward to, and there is a scal feel about Panorama (BBC 1, 8.10). The subject tax revolt in California in 1978, when a referendum the halving of property taxes (similar to domestic had been the largest single source of revenue in the ris of dire predictions had preceded this vote, and tent to find out if any of them came true. Reporter ld discovered that the state has enjoyed an industrial in is being credited to the tax cut—but on the debit shorities are finding it hard to keep up the services shorities are finding it hard to keep up the services sected to provide. And the main force behind the vote, Howard Jarvis, is now compaigning to have a tax reduced by half. Meanwhile Money-Go-Round 15) examines our own economic problems and asks buy British?" On the face of it, buying our own a to be a simple way of boosting our economy. But n the modern world is a far from simple subject.

mention Horizon (BBC 2, 9.30) almost every week, ton is that its subject matter is usually fascinating and fion excellent. Tonight the programme explores an ir planet that few people ever consider—its magnetic etism is a fundamental force which affects all life on ply now is it beginning to be understood by science. It is some fundamental questions, and discovers that if things on a giant magnet, things would be very

w and then we read in our newspapers of the trial of re Nazi war criminal, yet how many of us know that men suspected of having once been leading Nazis have in safety in the United States since the early 1950s? ction (ITV, 8.30) has picked up their trail. One, who squads against Jews in Bucharest in 1941, is now a hurch leader in Detroit. The United States ion is aware of the records of such men, yet nothing me, and is some cases investigations have been why did America become a haven for ex-Nazis?

ith marks the centenary of the birth of Sean O'Casey, nday Play (Radio 4, 7.45) is his first work ever to be The Shadow of a Gunnan. Donal Davoren is rumsured man on the run and sees in this a way to attract a the lives in the same Dublin tenement.

ANNOUNCEMENTS

THE TIMES

The Times deeply regrets the inconvenience and: reduction in service to its classified advertisers. This is caused by severe staff shortages in the Telephone Sales Department. Whilst everything possible is being done to improve the situation, we would ask advertisers to continue sending advertisements and notices in writing to The Times, Room N315, PO Box 7, New Printing House Square, Gray's Inn Road, London WCIX 8EZ. If you require any further help, please ring 01-837 3311; we apologize should there be a delay in getting through.
